Prosperity Without Progress Manila Hemp And Material Life In The Colonial Philippines:

Prosperity Without Progress Norman G. Owen, 1984-01-01 The Making of a Hinterland Kenneth Pomeranz, 2023-12-22

This wholly original reassessment of critical issues in modern Chinese history traces social economic and ecological change in inland North China during the late Qing dynasty and the Republic Using many new sources Kenneth Pomeranz argues that the development of certain regions entailed the systematic underdevelopment of other regions He maps changes in local finance farming transportation taxation and popular protest and analyzes the consequences for different classes sub regions and genders Pomeranz attributes these diverse developments to several causes the growing but incomplete integration of North China into the world economy the state's abandonment of many hinterland areas and traditional functions and the effect of local social structures on these processes He shows that hinterlands were made not merely found and were powerfully shaped by the strategies of local groups as well as outside forces This wholly original reassessment of critical

issues in modern Chinese history traces social economic and ecological change in inland North China during the late Qing dynasty and the Republic Using many new sources Kenneth Pomeranz argues that the dev *Power and Intimacy in the Christian Philippines* Fenella Cannell, 1999-03-18 What kind of reciprocity exists between unequal partners How can a culture which makes no attempt to defend unchanging traditions be understood as such In the Christian Philippines inequalities global and local are negotiated through idioms of persuasion reluctance and pity Fenella Cannell's study suggests that these are the idioms of a culture which does not need to represent itself as immutable Her account of Philippine spirit mediumship Catholicism transvestite beauty contests and marriage in Bicol calls for a reassessment of our understanding of South East Asian modernity Combining a strong theoretical interest in the anthropology of religion with a broader comparative attention to recent developments in South East Asian studies she offers a powerful alternative to existing interpretations of the relationship between culture and tradition in the region and beyond This book addresses not only South East Asianists but all those with an interest in the anthropology of religion and post colonial cultures *Power and Intimacy in the Christian Philippines* has won the Harry J Benda prize for 2001 **The End of the Peasantry in Southeast Asia** R.E. Elson, 2016-01-13 This book analyses the changing context and conditions of production and livelihood amongst Southeast Asia's peasants since the beginning of the nineteenth century It argues that with demographic growth and the nineteenth century development of great global markets based on small scale production the size and economic significance of peasantries throughout the region was magnified However such changes brought with them new forces stronger states more regular legal systems a revolution in communications intensive commercialisation which themselves worked to undermine the foundations of peasant society and eventually to transform peasants into farmers workers and citizens

Political Booms Lynn T. White, 2009 Why have Taiwan rich parts of China and Thailand boomed famously while the Philippines has long remained stagnant both economically and politically Do booms abet democracy Does the rise of middle

OC classesOCO promise future liberalization Why has Philippine democracy brought no boom and barely served the Filipino people This book unlike most previous studies shows that both the roots and results of growth are largely political rather than economic Specifically it pays attention to local not just national power networks that caused or prevented growth in the four places under consideration Violence has been common in these polities along with money Elections have contributed to socio political problems that are also obvious in Leninist or junta regimes because elections are surprisingly easy to buy with corrupt money from government contracts Liberals should pay more serious theoretical attention to the effects of money on justice and Western political science should focus more clearly on the ways non state local power affects elections By considering the effects on fair justice of local money and power largely from small and medium sized firms that emerge after agrarian reforms this book asks democrats to face squarely the extent to which electoral procedures fail to help ordinary citizens Students and scholars of Asia will all need this book OCo as will students of the West whose methods have become parochial The Representation of External Threats ,2019-03-27 In The Representation of External Threats Eberhard Crailsheim and Mar a Dolores Elizalde present a collection of articles that trace the phenomenon of external threats in a multitude of settings across Asia America and Europe The scope ranges from military threats against the Byzantine rulers of the 7th century to the perception of cultural and economic threats in the late 19th century Atlantic and includes conceptual threats to the construction of national histories Focussing on the different ways in which such threats were socially constructed the articles offer a variety of perspectives and interdisciplinary methods to understand the development and representations of external threats concentrating on the effect of threat communication for societies and political actors Contributors are Anna Abalian Vladimir Belous Eberhard Crailsheim Mar a Dolores Elizalde Rodrigo Escibano Roca Simon C Kemper Irena Kozmanov David Manzano Cosano Federico Niglia Derek Kane O Leary Alexandr Osipian Pedro Ponte e Sousa Theresia Raum Jean No l Sanchez Marie Schreier Stephan Steiner Srikanth Thaliyakkattil Ionut Untea and Qiong Yu

Healing the Herds Karen Brown,Daniel Gilfoyle,2010-01-15 During the early 1990s the ability of dangerous diseases to pass between animals and humans was brought once more to the public consciousness These concerns continue to raise questions about how livestock diseases have been managed over time and in different social economic and political circumstances Healing the Herds Disease Livestock Economies and the Globalization of Veterinary Medicine brings together case studies from the Americas western Europe and the European and Japanese colonies to illustrate how the rapid growth of the international trade in animals through the nineteenth century engendered the spread of infectious diseases sometimes with devastating consequences for indigenous pastoral societies At different times and across much of the globe livestock epidemics have challenged social order and provoked state interventions often opposed by farmers and herders The intensification of agriculture has transformed environments with consequences for animal and human health But the last two centuries have also witnessed major changes in the way societies have conceptualized diseases and sought to control them

From the late nineteenth century advances in veterinary technologies afforded veterinary scientists a new professional status and allowed them to wield greater political influence While older methods have remained important to strategies of control and prevention as demonstrated during the outbreak of foot and mouth disease in Britain in 2001 the rise of germ theories and the discovery of vaccines against some infections made it possible to move beyond the blunt tools of animal culls and restrictive quarantines of the past Healing the Herds Disease Livestock Economies and the Globalization of Veterinary Medicine offers a new and exciting comparative approach to the complex interrelationships of microbes markets and medicine in the global economy

Cultures of Disaster Greg Bankoff,2003-08-27 In this fascinating and comprehensive study Greg Bankoff traces the history of natural hazards in the Philippines from the records kept by the Spanish colonisers to the Calamitous Nineties and assesses the effectiveness of the relief mechanisms that have evolved to cope with these occurrences He also examines the correlation between this history of natural disasters and the social hierarchy within Filipino society The constant threat of disaster has been integrated into the schema of daily life to such an extent that a culture of disaster has been formed

Conquest and Pestilence in the Early Spanish Philippines Linda A. Newson,2009-04-16 Scholars have long assumed that Spanish colonial rule had only a limited demographic impact on the Philippines Filipinos they believed had acquired immunity to Old World diseases prior to Spanish arrival conquest was thought to have been more benign than what took place in the Americas because of more enlightened colonial policies introduced by Philip II Conquest and Pestilence in the Early Spanish Philippines illuminates the demographic history of the Spanish Philippines in the sixteenth and seventeenth centuries and in the process challenges these assumptions In this provocative new work Linda Newson convincingly demonstrates that the Filipino population suffered a significant decline in the early colonial period Newson argues that the sparse population of the islands meant that Old World diseases could not become endemic in pre Spanish times She also shows that the initial conquest of the Philippines was far bloodier than has often been supposed and that subsequent Spanish demands for tribute labor and land brought socioeconomic transformations and depopulation that were prolonged beyond the early conquest years Comparisons are made with the impact of Spanish colonial rule in the Americas Newson adopts a regional approach and examines critically each major area in Luzon and the Visayas in turn Building on a wide range of primary and secondary sources she proposes a new estimate for the population of the Visayas and Luzon of 1 57 million in 1565 slightly higher than that suggested by previous studies and calculates that by the mid seventeenth century this figure may have fallen by about two thirds Based on extensive archival research conducted in secular and missionary archives in the Philippines Spain and elsewhere Conquest and Pestilence in the Early Spanish Philippines is an exemplary contribution to our understanding of the formative influences on demographic change in premodern Southeast Asian society and the history of the early Spanish Philippines
