*Lead-Based Paint Handbook* Jan W. Gooch, 2005-12-08 Lead based paint has become a national issue and will continue to be a hi priority focus of national state and local agencies until there is no lead based paint in the United States Lead based paint has become a tremendous health hazard for people and animals Lead based paint has been in widespread use throughout Europe and the United States Lead has been known to be a health hazard since the time of Pliny the Elder A D 23 79 but it was deemed that the advantages of lead in paint outweighed the health hazards There has been a change in outlook and in 1973 the U S Congress banned all lead paint from residential structures A voluminous number of law suits have been initiated since and continue to be litigated with the purpose of determining the parties responsible for the lead poisoning of children and others and to exact the indemnities Lead based paint is still authorized for use on bridges and nonresidential structures and thousands of city state military and federal government housing projects still contain lead based paint This paint must be removed if these dwellings are to be safe living quarters especially for children Abatement techniques continue to be evaluated some have been used successfully Lead based paint abatement will continue into the next century and it is hoped that this comprehensive volume will serve as a guide for those seriously interested in this important subject
