Protein Carbohydrate Interactions In Biological Systems:

Protein-carbohydrate Interactions in Biological Systems David L. Lark, 1986 Orwell's 1945 fable about the power struggles among animals on a farm parallels the situation in Russia at the time as Orwell saw it the characters include the ruthless pig Stalin his idealistic Trotsky like adversary and the simple kindly horse who represents the common man All animals are equals but some animals are more equal than others George Orwell's classic satire of the Russian Revolution is the account of the bold struggle initiated by the animals that transforms Mr Jones's Manor Farm into Animal Farm a wholly democratic society built on the credo that all animals are created equal Out of their cleverness the pigs Napoleon Squealer and Snowball emerge as leaders of the new community in a subtle evolution that proves disastrous The climax is the brutal betrayal of the faithful horse Boxer when totalitarian rule is re established with the bloodstained postscript to the founding slogan but some animals are more equal than others War is peace Freedom is slavery Ignorance is strength

Protein-carbohydrate Interactions in Biological Systems, 1986 Chemical Probes in Biology Manfred P. Schneider, 2012-12-06 This NATO Advanced Study Institute co sponsored by FEBS and INTAS under the title Chemical Probes in Biology was designed to summarize and disseminate recent expert knowledge regarding a deeper understanding of biological phenomena on a molecular level Such scientific activities frequently termed Bio organic Chemistry or Chemical Biology are constituting a highly interdisciplinary branch of chemistry beyond the traditional ways in which chemists and biologists have been working in the past Thus on this occasion we were bringing together senior experts from the disciplines of Chemistry and Biology in order to amalgamate their diverse yet basically common interests in this area Ultimate goal was next to an exchange of information between the two scientific cultures the communication of exciting possibilities in interdisciplinary research to the young scientists present The meeting was held in the Anargyros and Korgialenios School on the Island of Speteses Greece from 18-30 August 2002 The ASI was attended by a total of 91 scholars from 23 different countries A group of 27 speakers presented a series of 34 highly stimulating informative and educational lectures covering a broad range of topics relevant to the general theme of this meeting Science at the Interface of Chemistry Biology and Medicine The lectures were complemented by a total of 89 posters presented by the young scholars and a series of short lectures derived thereof This was clearly one of the highlights of the meeting creating a lively atmosphere of interaction and intellectual creativity typical phenomena for the whole meeting

The Molecular Immunology of Complex Carbohydrates Albert M. Wu, L. Garry Adams, 2012-12-06 During the past three decades the sugar moiety of complex carbohydrates has been found to be involved

in important interactions of immunological specificity of antigens and to participate in a variety of cellular functions The long polysaccharide side chains of the lipopolysaccharides on the outer membrane of Gram negative organisms provide surface antigens for differential serodiagnosis Bacterial surface lectins are important in mediating the attachment of bacteria to host cells in the of infectious diseases The carbohydrate pathogenesis moieties of cell surface glycoconjugates glycoproteins and glycolipids of mammals are the sites for intercellular recognition and for the regulatory molecular interactions such as interaction of complex carbohydrate with hormones or hepatic lectins The carbohydrate side chains of many complex carbohydrates play essential roles as antigenic determinants b of human blood group ABH Lea Le I and i activities as the Forssman specific determinant and as tumor associated antigenic determinants Prompted by these and other advances in the field a Symposium on Molecular Immunology of Complex Carbohydrates was organized as a satellite meeting of the 8th International Glycoconjugate Conference held on September 8 13 1985 in Houston Texas U S A Many eminent scientists contributed their knowledge at this meeting The lecture and poster materials of the symposium are contained in this proceeding book which is divided into four Sections and one Appendix Section I is entitled Antibody Specificity Epitope and Lectinology Dr Elvin A Proceedings of the Symposium on Molecular Recognition and Protein-Carbohydrate Interactions, at the University of Washington, Seattle, Washington, July 23-29, 1989 Howard M. Biochemistry of the Eye Elaine R. Berman,2013-11-22 My first introduction to the eye came more than three decades ago when my close friend and mentor the late Professor Isaac C Michaelson convinced me that studying the biochemistry of ocular tissues would be a rewarding pursuit I hastened to explain that I knew nothing about the subject since relatively few basic biochemical studies on ocular tissues had appeared in the world literature Professor Michaelson assured me however that two books on eye biochemistry had already been written One of them a beautiful monograph by Arlington Krause 1934 of Johns Hopkins Hospital is we II worth reading even today for its historical perspective The other published 22 years later was written by Antoinette Pirie and Ruth van Heyningen 1956 whose pioneering achievements in eye biochemistry at the Nuffield Laboratory of Ophthalmology in Oxford England are known throughout the eye research community and beyond To their credit are classical investigations on retinal corneal and lens biochemistry beginning in the 1940s and continuing for many decades thereafter Their important book written in 1956 on the Biochemistry of the Eye is a volume that stood out as a landmark in this field for many years In recent years however a spectacular amount of new information has been generated in ocular biochemistry Moreover there is increasing specialization among investigators in either a specific field of biochemistry or a particular ocular tissue Research Awards Index , **Self-assembling Biomaterials** Helena S.
