

PROTOCOL ON STRATEGIC ENVIRONMENTAL ASSESSMENT TO THE CONVENTION ON ENVIRONMENTAL IMPACT ASSESSMENT IN A TRANSBOUNDARY CONTEXT

The Parties to this Protocol,

Recognizing the importance of integrating environmental, including health, considerations into the preparation and adoption of plans and programmes and, to the extent appropriate, policies and legislation,

Committing themselves to promoting sustainable development and therefore basing themselves on the conclusions of the United Nations Conference on Environment and Development (Rio de Janeiro, Brazil, 1992), in particular principles 4 and 10 of the Rio Declaration on Environment and Development and Agenda 21, as well as the outcome of the third Ministerial Conference on Environment and Health (London, 1999) and the World Summit on Sustainable Development (Johannesburg, South Africa, 2002),

Bearing in mind the Convention on Environmental Impact Assessment in a Transboundary Context, done at Expo, Finland, on 25 February 1991, and decision II/9 of its Parties at Sofia on 26 and 27 February 2001, in which it was decided to prepare a legally binding protocol on strategic environmental assessment,

Recognizing that strategic environmental assessment should have an important role in the preparation and adoption of plans, programmes, and, to the extent appropriate, policies and legislation, and that the wider application of the principles of environmental impact assessment to plans, programmes, policies and legislation will further strengthen the systematic analysis of their significant environmental effects,

Acknowledging the Convention on Access to Information, Public Participation in Decision-making and Access to Justice in Environmental Matters, done at Aarhus, Denmark, on 25 June 1998, and taking note of the relevant paragraphs of the Lucca Declaration, adopted at the first meeting of its Parties,

Conscious, therefore, of the importance of providing for public participation in strategic environmental assessment,

Acknowledging the benefits to the health and well-being of present and future generations that will follow if the need to protect and improve people's health is taken into account as an integral part of strategic environmental

assessment, and recognizing the work led by the World Health Organization in this respect,

Mindful of the need for and importance of enhancing international cooperation in assessing the transboundary environmental, including health, effects of proposed plans and programmes, and, to the extent appropriate, policies and legislation,

Have agreed as follows:

Article 1

OBJECTIVE

The objective of this Protocol is to provide for a high level of protection of the environment, including health, by:

- (a) Ensuring that environmental, including health, considerations are thoroughly taken into account in the development of plans and programmes;
- (b) Contributing to the consideration of environmental, including health, concerns in the preparation of policies and legislation;
- (c) Establishing clear, transparent and effective procedures for strategic environmental assessment;
- (d) Providing for public participation in strategic environmental assessment; and
- (e) Integrating by these means environmental, including health, concerns into measures and instruments designed to further sustainable development.

Article 2

This fully updated second edition of *Corporate Accountability in International Environmental Law* examines systematically all international sources of corporate accountability standards with specific reference to environmental protection and elaborates on their theoretical and practical implications for international environmental law The book argues that although international environmental law does not bind multinational corporations and other business entities growing practice points to the emergence and consolidation of international legal standards These standards allow adapting and translating inter State obligations embodied in international environmental law into specific normative benchmarks to determine the

legitimacy of the conduct of the private sector against internationally recognized values and rules The role of international organizations who in the absence of State intervention identify and promote the application of selected international environmental standards is analyzed in depth This analysis demonstrates how these international organizations are a driving force in establishing and operationalizing international standards for corporate environmental accountability The new edition includes a recent assessment of the Rio 20 Summit analysis of the UN Framework on Business and Human Rights and the 2012 Performance Standards It contains a discussion on the role of fair and equitable benefit sharing under the Convention on Biological Diversity and international human rights law and analysis of the monitoring practice of the UN Special Rapporteur on Indigenous Peoples Rights This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is offered as a free PDF download from OUP and selected open access locations

Implementing the Environmental Protection Regime for the Antarctic D. Vidas, 2000-09-30 When the Protocol on Environmental Protection to the Antarctic Treaty entered into force on 14 January 1998 a new phase commenced for the Antarctic Treaty System The parties to the Protocol are today confronting issues related to the implementation of a complex international environmental protection regime both in international and domestic contexts Several crucial implementation questions need to be solved in order to enhance and make possible the implementation of the Protocol What would be the consequences for the parties of a possible failure in resolving the pending implementation issues on what premises can the solutions be based and what then are the options available This book provides a systematic overview of the implementation issues in sections on jurisdiction control and enforcement in the Antarctic Part I institutional support to the implementation of the Protocol Part II normative support to the implementation of the Protocol an Antarctic liability regime Part III relationship with other international instruments and arrangements Part IV and through a series of selected case studies issues involved in domestic implementation of the Protocol Part V This is a book that will appeal to Antarctic specialists and to all those interested in environmental law and policy
