Developing Sustainable Food Systems, Policies, and Securities Obayelu, Abiodun Elijah, Obayelu, Oluwakemi Adeola, 2020-04-17 A food system is sustainable if it delivers food and nutrition security for all without compromising the economic social and environmental bases to generate food security and nutrition for future generations Sustainable food systems are vital in ensuring global health and ending malnutrition in all its forms Assessing important dimensions of the food system such as nutrition sustainable agriculture food loss and waste can provide stakeholders with necessary information to evaluate the strength of their country s food systems and determine where more support is needed *Developing Sustainable Food Systems Policies and Securities* is a pivotal reference source that explores the nature extent and causes of nutrition problems across the world as well as the role that agricultural policy plays in these issues The book supports the development of sustainable food systems policy options and securities by various countries in order to successfully maintain sustainable food production systems Featuring research topics such as food security carbon emissions and nutrition the book is ideally designed for economists environmentalists food producers policymakers researchers academicians and students seeking coverage on agricultural and sustainability issues

Food Security, Food Prices and Climate Variability Molly E. Brown, 2014-06-05 The agriculture system is under pressure to increase production every year as global population expands and more people move from a diet mostly made up of grains to one with more meat dairy and processed foods This book uses a decade of primary research to examine how weather and climate as measured by variations in the growing season using satellite remote sensing has affected agricultural production food prices and access to food in food insecure regions of the world The author reviews environmental economics and multidisciplinary research to describe the connection between global environmental change changing weather conditions and local staple food price variability The context of the analysis is the humanitarian aid community using the guidance of the USAID Famine Early Warning Systems Network and the United Nations World Food Program in their response to food security crises These organizations have worked over the past three decades to provide baseline information on food production through satellite remote sensing data and agricultural yield models as well as assessments of food access through a food price database These datasets are used to describe the connection and to demonstrate the importance of these metrics in overall outcomes in food insecure communities

Trade,

Food Security, and Human Rights Ying Chen, 2016-02-24 Most scholars attribute systemic causes of food insecurity to poverty human overpopulation lack of farmland and expansion of biofuel programs However as Chen argues here another significant factor has been overlooked The current food insecurity is not absolute food shortage since global food production still exceeds the need of the entire world population but a problem of how to secure access to resources Distorted agricultural trade undermines world food distribution and uneven distribution impedes people s access to food particularly in poor developing countries Examining EU and US agricultural policies and World Trade Organization negotiations in agriculture the author argues how they affect the international agricultural trade claiming that current food insecurity is the result of inequitable food distribution and trade practices The international trade regime is advised to reconcile trade rules with the consideration of food security issues Several other enforceable solutions to reduce world hunger and malnutrition are also advanced including national capacity building the improvement of governance and strategic development of biofuel programs This book will be of great interest to agricultural trade professionals and consultant policy makers in the EU US and developing countries Students and researchers with a concentration on international trade agriculture economics global governance and international law will benefit greatly from this study

Food Systems Resilience , 2022-07-13 This book addresses some of the major challenges of food systems associated with a diversity of agricultural contexts and priorities It contributes to the conversation on global food and nutrition security by unpacking the intertwined connections between food system resilience food policies and global food markets The contributing authors provide careful analyses of how shocks to food systems e g COVID 19 pandemic lockdowns and crises to global food systems e g the global food price crisis of 2008 have disrupted the food value chains in ways that undermine global initiatives to achieve food and nutrition security for all The book is divided into two sections Section 1 focuses on global food systems transformation with the goal of moving towards resilience Two chapters in this section employ a global context approach to address the key factors undermining food systems resilience and sustainability Section 2 presents case studies drawn from Africa Asia and Europe with different pathways for the transition to food systems resilience highlighting the importance of policy approaches as well as smart and innovative strategies to ensure the production of nutritious foods at affordable costs the reduction of food wastage and the valorization of sub products

The Russia-Ukraine conflict and global food security Glauber, Joseph W., Laborde Debucquet, David, 2023-07-10 When Russia invaded Ukraine in February 2022 sparking fears of a global food crisis IFPRI responded rapidly to the need for information and policy advice to address the crisis From the first moments of the conflict a new IFPRI blog series provided critical information and insights into the impacts on food security caused by rising food fertilizer and fuel prices and trade disruptions for vulnerable countries and regions This book is a compilation of those blog posts which include analysis of trade flows tracking of food prices and policy responses and results of impact modeling Together they provide an overview of how the crisis has progressed how the international community and individual countries responded

with efforts to ensure food security and what we are learning about the best ways to ensure food security in the aftermath of a major shock to global food systems The State of Food Security and Nutrition in the World 2023 Food and Agriculture Organization of the United Nations, International Fund for Agricultural Development, United Nations Children's Fund, World Food Programme, World Health Organization, 2023-07-12 This report provides an update on global progress towards the targets of ending hunger SDG Target 2.1 and all forms of malnutrition SDG Target 2.2 and estimates on the number of people who are unable to afford a healthy diet Since its 2017 edition this report has repeatedly highlighted that the intensification and interaction of conflict climate extremes and economic slowdowns and downturns combined with highly unaffordable nutritious foods and growing inequality are pushing us off track to meet the SDG 2 targets However other important megatrends must also be factored into the analysis to fully understand the challenges and opportunities for meeting the SDG 2 targets One such megatrend and the focus of this year's report is urbanization New evidence shows that food purchases in some countries are no longer high only among urban households but also among rural households Consumption of highly processed foods is also increasing in peri urban and rural areas of some countries These changes are affecting people's food security and nutrition in ways that differ depending on where they live across the rural urban continuum This timely and relevant theme is aligned with the United Nations General Assembly endorsed New Urban Agenda and the report provides recommendations on the policies investments and actions needed to address the challenges of agrifood systems transformation under urbanization and to enable opportunities for ensuring access to affordable healthy diets for everyone
