Provincial England W. G. Hoskins, 1968 **British Economic and Social History** R. C. Richardson, William Henry Chaloner, 1996 **Provincial England** William G. Hoskins, 1965 *Rural Society and Economic Change in County Durham* A. T. Brown, 2015

In the middle of the fifteenth century the economy of north east England was beset by crises population was low production was stagnant and many landowners faced penury By the end of the sixteenth century however the precocious development of the coal industry and high levels of inflation provided opportunities for investment and profit in the Durham countryside This book examines the development of agrarian capitalism estate management tenure and the land market social mobility the gentrification of merchant wealth and the emergence of the yeomanry during this period in the region It looks at such questions as how the coal industry was affected by the fifteenth century recession and the effects its rapid expansion had upon landed society reassesses debates on the rise of the gentry and the crisis of the aristocracy and considers how the wholesale economic changes of this period affected the social structure of late medieval and early modern England Although this period is often seen as a transitional era this book argues that it needs to be studied as one long agrarian cycle showing the degree to which patterns of landholding fixed during the fifteenth century recession affected the distribution of profits between different types of lords and tenants in the sixteenth and early seventeenth century A T Brown is an Addison Wheeler Fellow at Durham University

Revolution and Rebellion in the Early Modern World Jack A. Goldstone, 2016-12-19

What can the great crises of the past teach us about contemporary revolutions Jack Goldstone shows the important role of population changes youth bulges urbanization elite divisions and fiscal crises in creating major political crises Goldstone shows how state breakdowns in both western monarchies and Asian empires followed the same patterns triggered when inflexible political economic and social institutions were overwhelmed by cumulative changes in population structure that collided with popular aspirations and state elite relations Examining the great revolutions of Europe the English and French Revolutions and the great rebellions of Asia which shattered dynasties in Ottoman Turkey China and Japan he shows how long cycles of revolutionary crises and stability similarly shaped politics in Europe and Asia but led to different outcomes In this 25th anniversary edition Goldstone reflects on the history of revolutions in the last twenty five years from the Philippines and other color revolutions to the Arab Uprisings and the rise of the Islamic State In a new introduction he re examines his pioneering look at the role of population changes such as rising youth cohorts urbanization shifting elite mobility as continuing causal factors of revolutions and rebellions The new concluding chapter updates his major theory and looks to the future of revolutions in the Middle East Asia and Africa

[Edinburgh and the Reformation](#) Michael Lynch, 2004-01-20

Edinburgh s reformation was one of the last of the great city reformations of the sixteenth century It took on a highly distinctive shape due to the burgh s social and economic problems and its position as a cockpit for English policy in Scotland and the shifting factionalism of Scottish politics In studies of the Scottish Reformation too little attention

has been paid to the nature of Scottish society itself In a society so conscious of rank tradition and precedent the Reformation was only likely to make progress where it did not disturb the existing order and in Edinburgh the new religion was obliged to work within the natural constraints of burgh life This book shows that the early promise of the Protestant reformers of a new society provoked a backlash and had to be abandoned for a new conciliatory approach The result was that power remained in much the same hands in the 1580s as it had in the 1540s with one real difference there was more of it

Bowker Company. Department of Bibliography,1978 **Famine, Disease and the Social Order in Early Modern Society** John Walter,Roger

Schofield,Andrew B. Appleby,1991-04-26 An examination of the complex interrelationships among past demographic social and economic structures demonstrates how the impact of hunger and disease can enhance the exploration of early modern society *The Transformation of a Peasant Economy* John Goodacre,2017-07-28 The market town has been dismissed as an incompletely formed urban community in fact it was the primary urban unit in pre industrial England This study places the market town at the centre of the transformation of early modern England both catalysing changes in agriculture and experiencing in a distinctive fashion the urbanisation that was to occur a century or more later in the great industrial and commercial centres of Europe In the two centuries after 1500 the rural economy changed from a pattern of subsistence to improved farming The first great enclosures took place during this time but the economic base for this revolution was the growth of local trading centred on markets and local communications networks This redistribution of produce provisions and information was the motor of specialisation and hence modernisation The strength of this study is in its detailed research into this process in one representative locality and the sensitive extrapolation of local experiences on to the national and European scale By integrating in one book the themes of rural transformation and early urbanisation this account of one typical midland market town demonstrates the continuing vigour of the discipline of local history **Handbook for History Teachers** W. The Middling Sort and the Politics of Social Reformation Richard Dean Smith, 2004 The interrelated demographic economic religious and cultural transformations that England experienced in the late sixteenth and early seventeenth centuries were most pronounced in larger towns in the south and east such as Colchester in Essex The effects produced by these changes led to an effort at social and sexual regulation by the town s more prosperous residents in order to control and modify the negative impact on the local population especially the poor This book provides an in depth portrait of an urban setting discussing both wrongdoers themselves and the motivations of the craftsmen and tradesmen the middling sorts who enforced local standards of conduct Vernacular Architecture Mr. Rohit Manglik, 2024-01-15 EduGorilla Publication is a

Hunger Movements in Early Victorian Literature Lesa Scholl, 2016-05-05 In *Hunger Movements in Early Victorian Literature* Lesa Scholl explores the ways in which the language of starvation interacts with narratives of emotional and intellectual want to create a dynamic evolving notion of hunger Scholl's interdisciplinary study emphasises literary analysis sensory history and political economy to interrogate the progression of hunger in Britain from the early 1830s to the late 1860s Examining works by Charles Dickens Harriet Martineau George Eliot Elizabeth Gaskell Henry Mayhew and Charlotte Bronte Scholl argues for the centrality of hunger in social development and understanding She shows how the rhetoric of hunger moves beyond critiques of physical starvation to a paradigm in which the dominant narrative of civilisation is predicated on the continual progress and evolution of literal and metaphorical taste Her study makes a persuasive case for how hunger as a signifier of both individual and corporate ambition is a necessarily self interested and increasingly violent agent of progress within the discourse of political economy that emerged in the eighteenth century and subsequently shaped nineteenth century social and political life
