Excerpt from *The Handy Book on Pruning Grafting and Budding* The present work deals with a branch of horticulture which is often imperfectly understood although a thorough knowledge of it is absolutely essential to success No operation is less speculative in its results than good pruning or more quickly and certainly productive of good results enhancing not only the profits but the pleasure of horticulture On the other hand unskilled pruning or neglect of pruning causes mischief that cannot be repaired and undoubtedly reduces the annual produce of orchards and cottage gardens to a degree which must in many cases extinguish all chance of profit For it cannot be too strongly insisted upon in these days of keen competition and low prices that profit from the cultivation of the land is not to be expected unless both industry and skill are employed Skill undoubtedly can be acquired by practice and experience and cannot be perfected without them But to learn from one's own mistakes is an expensive process especially in the department of pruning where one mistake may effect the productiveness of a valuable tree for the rest of its life The fewer mistakes therefore the better and it is with this truth in mind that this little book is written for the benefit chiefly but not exclusively of beginners amateurs and untrained gardeners and I recommend it most cordially to their attention About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **The Science and Practice of Grafting, Pruning, and Training Fruit Trees, Tr. by W.
