Esta apuesta no implica relegar el valor cient fico de la creaci n te rica y pr ctica lo que se afirma es una cr tica al modelo positivista y se propone la creaci n de una ciencia psicol gica que se afirme en otros postulados epistemol gicos crticos hist ricos basados en la praxis Quien busque encontrar en la psicología popular modelos positivistas de explicaci n y creaci n encontrar que hay otras formas de construir ciencia ciencia hist rica ciencia social ciencia cr tica y creadora La propuesta del presente texto consiste en identificar en la esquizofrenia un relato ideológico del poder que armado de un discurso cientificista ha construido a esta condici n humana en una enfermedad que cataloga a las personas esquizoides como enfermos para justificar por un lado la represi n y el control social sobre toda conducta que atente contra el orden impuesto y adems que convierte al sujeto psicotizado en el chivo emisario de todo el malestar social resultado de una sociedad que se levanta sobre la alienaci n de los seres humanos El capitalismo es un sistema que se levanta sobre la acumulaci n de capital la misma que se produce cuando el obrero enajena su fuerza de trabajo para producir mercanc as la misma que producen una plus ganancia que no le es devuelta al trabajador que luego se convierte en capital y que se enfrenta al obrero como trabajo muerto alienando al sujeto de su trabajo y el producto de su trabajo La sociedad capitalista por tanto es una sociedad estructuralmente alienante y esquizofrenizante y todos aquellos que somos separados de nuestro trabajo estamos esquizofrenizados
