Psychological Torture Pau Perez Sales, 2016-11-03 Sadly it is highly likely that psychological torture is committed by governments

worldwide and yet notwithstanding the serious moral questions that this disturbing and elusive concept raises and research in the area so limited there is no operational or legal definition This pioneering new book provides the first scientific definition and instrument to measure what it means to be tortured psychologically as well as how allegations of psychological torture can be judged Ground in cross disciplinary research across psychology anthropology ethics philosophy law and medicine the book is a tour de force which analyses the legal framework in which psychological torture can exist the harrowing effects it can have on those who have experienced it and the motivations and identities of those who perpetrate it Integrating the voices both of those who have experienced torture as well as those who have committed it the book defines what we mean by psychological torture its aims and effects as well as the moral and ethical debates in which it operates Finally the book builds on the Istanbul Protocol to provide a comprehensive new framework including practical scales that enables us to accurately measure psychological torture for the first time This is an important and much needed overview and analysis of an issue that many governments have sought to sweep under the carpet Its accessibility and range of coverage make it essential reading not only for psychologists and psychiatrists interested in this field but also human rights organizations lawyers and the wider international community

Perspectives Dario Paez, Juan Carlos Oyanedel, 2021-10-18 **Social Belongingness and Well-Being: International Politically Reflective Psychotherapy** Manuel

Llorens, 2020-10-27 This book shows how clinical psychology has been deliberately used to label control and oppress political dissidence under oppressive regimes and presents an epistemological and theoretical framework to help psychologists deal with the political dilemmas that surround clinical practice Based on his own experience working as a clinical and community psychologist in Venezuela for almost twenty five years the author recounts the controversial history of how the Bolivarian Revolution has used psychology to persecute and oppress political dissidents recovers the experience of doing psychotherapy under oppressive regimes in other countries and stresses the importance of developing an ethically and politically aware clinical practice The first part of the book presents the dilemmas psychotherapists have faced in different parts of the world such as the former Soviet Union USA China Spain Hungary Argentina Brazil Uruguay and Venezuela when dealing with the intrusion of the political domain in clinical research and practice and the difficulties clinicians have had in dealing with these issues The second part of the book presents an epistemological and theoretical framework from which these issues may be tackled effectively The book helps raise awareness of the risks of framing psychotherapy as apolitical as well as the benefits of thinking of our lives as contextualized in our political settings It draws from several theoretical options that have been useful to challenge traditional clinical theory and include the political in our clinical comprehensions In particular Latin American Community Psychology that has developed tools to favor awareness of political issues has been used to expand the psychotherapeutic conversation Politically Reflective Psychotherapy Towards a Contextualized Approach will help clinical psychologists psychiatrists and other social and mental health workers reflect on the challenges psychotherapy faces in a

politically polarized society showing how the political dimension can be incorporated into clinical practice

Methodologies in Peace Psychology Diane Bretherton, Siew Fang Law, 2015-09-03 This volume looks at research methods through the lens of peace studies and peace values. Apart from reviewing established methods from peace psychology, it presents some innovative ideas for conducting research in the area of peace psychology. Many of these methods are drawn from the field from activities used by active peace practitioners. A critical component of this volume is its core argument that peace research should be conducted by peaceful means and should model peaceful processes. Organized thematically, the volume begins with a review of the established best practices in peace psychology research methodology, including methods for qualitative research, for quantitative research, and participative action networks. In doing so, it also points to some of the limitations of working for peace within the tradition of a single discipline and to the need to expand psychology methodology to methodologies. Therefore, the second half of the volume proceeds to explore the realm of innovative, relatively unorthodox research methods such as participatory and workshop methods, the creative arts, and sports for research purposes. The use of new advances in information technology to conduct peaceful research are also discussed. The concluding chapters synthesize key issues from the previous chapters and link peace psychology with ideas and implementation of research designs and practices. Finally, it discusses the nature of academic knowledge and more specifically academic knowledge in peace psychology and where that fits into the mission to build a more peaceful world. Overall, this book aims to provide peace psychologists with an array of possibilities and best practices for approaching their research. Many researchers find the experience of doing research a somewhat lonely, if not isolating experience. *Methodologies in Peace Psychology* aims to alleviate this feeling as the use of these more innovative methods leads to a closer engagement with the community and a much more social experience of research. This volume is a useful tool for both new and experienced researchers because it provides leads for idealistic young researchers who want their work to make a difference, in addition to encouraging more reflection and analysis for experienced peace psychologists.

Writings for a Liberation Psychology Ignacio Martín-Baró, 1996-09-01 A Spanish-born Jesuit trained in psychology at the University of Chicago and killed by a Salvadoran death squad in 1989, Martín-Baró devoted much of his career to making psychology speak to the community and to the individual. This collection clarifies his importance in Latin American psychology and reveals a major force in social theory.

Towards a Society that Serves Its People John J. Hassett, Hugh Lacey, 1991 This collection presents a representative sample of the writings of three of the six Jesuits who were slain in El Salvador on November 16, 1989. Although little known in the United States, these men were significant scholars who possessed an original conception of the university. They affirmed in difficult circumstances the pursuit and teaching of truth as a collaborative, collegial process that transcends international boundaries.
