Psicología Educacional:

Psicología de la Educación Jesús Beltrán, 1995-10 Esta obra en la que han intervenido una treintena de profesores universitarios como coautores constituye un excelente y sólido manual de introducción a la temática de la psicología educativa tanto por su rigor científico como por sus aciertos didácticos. Articulada en siete partes: historia, conceptos y métodos, aspectos cognitivos del estudiante, personalidad y motivación, aprendizaje, interacción educativa, enseñanza y contexto social, mantiene no obstante unidad en su corpus temático y completitud en la problemática general de la disciplina. El psicólogo educacional, el educador y la institución Rosa Jaitin de Langer, 1988 Psicología Educacional Jorge Catalán, 2011 Texto que propone rumbos porque hace falta una orientación visionaria que se aleje y descubra caminos por donde transitar tanto para fines científicos como profesionales especialmente cuando hay algunos senderos que podrían no ser los últimos. Problemáticas porque en un medio cambiante hay demandas que no pueden esperar como también otras más o menos advertidas que deben desplegarse y erigirse en prioridades. Aportaciones porque en Chile la psicología educacional ha alcanzado un nivel de desarrollo tal que impele a los formadores de la educación superior a apropiarse de la responsabilidad de incrementar y difundir el saber acumulado. **The Promise of Educational Psychology** Richard E. Mayer, 1999 Covering the latest advanced in the field this brief easy to read introduction to educational psychology focuses on learning and teaching in subject areas and on helping students develop specific cognitive processes that are required to accomplish real academic tasks. Shows how psychological theories and research influence the development of better instructional practices and how real instructional problems influence the development of better psychological theories and research. Deals with the educational psychology of five major subject areas: reading fluency, reading comprehension, writing, mathematics and science. Includes three to six major cognitive processes involved in mastering the subject area in each chapter. Analyzes the types of knowledge that are needed to perform academic tasks in the domain in several chapters. Provides concrete examples and connections between cognitive research and practical educational problems. Covers the core advances in educational psychology. For educators at all levels. Manual de psicología educacional Violeta Arancibia, 2008 Este libro entrega a psicólogos educadores y alumnos de psicología educativa y ciencias afines una visión integral y actualizada de la psicología educacional con el fin de apoyar su formación en esta rama de creciente interés. Con un enfoque tanto teórico como aplicado presenta sus conceptos y teorías fundamentales e introduce algunos temas de discusión más recientes en la disciplina. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and suspenseful novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
