It contains an organized collection of articles from Teaching of Psychology TOP the official journal of the Society for the Teaching of Psychology Division 2 of the American Psychological Association. Volume III contains 89 articles from TOP that have not been included in other volumes. Another distinction between this volume and its predecessors is its emphasis on testing and assessment. The book is divided into two sections. Section One Issues and Approaches in Teaching Introductory Psychology contains 52 articles on critical issues such as how to approach the course, understanding students' interests, perceptions, and motives; students' existing knowledge of psychology, including their misconceptions; a comparison of introductory textbooks and tips on how to evaluate them; test questions and student factors affecting exam performance; an overview of different forms of feedback; giving extra credit; and how to deal with academic dishonesty. Section Two consists of 37 articles that present demonstrations, class and laboratory projects, and other techniques to enhance teaching and learning in both the introductory as well as advanced courses in the discipline. This section is organized so as to parallel the order of topics found in most introductory psychology textbooks. Intended for academicians who teach the introductory psychology course and/or oversee grad assistants who teach the course, all royalties of the book go directly to the Society for the Teaching of Psychology to promote its activities to further improve the teaching of psychology.

An Introduction to Criminal

Psychology Russil Durrant, 2013-05-07 Crime is a topic that is of considerable interest to policy makers, politicians, and the public alike. We want to know what factors can explain the nature and prevalence of crime in society and use this knowledge to better develop approaches for managing criminal behaviour. This book provides a comprehensive overview of approaches to understanding crime and criminal behaviour with a focus on psychological perspectives. A wide range of different types of criminal behaviour are considered, including juvenile crime, violent offending, sexual offending, collective violence, and drug use. For each type of offence, a clear overview of key conceptual and methodological issues is provided, along with a detailed consideration of the major theoretical approaches that have been developed. The book concludes by considering how our theoretical understanding of crime can inform our responses to criminal behaviour in terms of punishment, prevention, and rehabilitation. Key features of the book include an in-depth coverage of a broad range of different types of criminal behaviour; inclusion of a diverse range of different theoretical perspectives; accessibly written with extensive use of case studies, boxes, and activities; an extensive use of up-to-date references that highlight the current state of knowledge in the field of criminal psychology. This book should be of interest to students, academics, researchers, and practitioners with an interest in criminal behaviour and is particularly suitable for undergraduate courses in criminal psychology, forensic psychology, and psychological criminology.
