Psyche And Society Explorations In Psychoanalytic Sociology:

Psyche and Society Robert Endleman, 1981 Available for the first time in English this is the definitive account of the practice of sexual slavery the Japanese military perpetrated during World War II by the researcher principally responsible for exposing the Japanese government's responsibility for these atrocities The large scale imprisonment and rape of thousands of women who were euphemistically called comfort women by the Japanese military first seized public attention in 1991 when three Korean women filed suit in a Tokyo District Court stating that they had been forced into sexual servitude and demanding compensation Since then the comfort stations and their significance have been the subject of ongoing debate and intense activism in Japan much if it inspired by Yoshimi's investigations How large a role did the military and by extension the government play in setting up and administering these camps What type of compensation if any are the victimized women due These issues figure prominently in the current Japanese focus on public memory and arguments about the teaching and writing of history and are central to efforts to transform Japanese ways of remembering the war Yoshimi Yoshiaki provides a wealth of documentation and testimony to prove the existence of some 2 000 centers where as many as 200 000 Korean Filipina Taiwanese Indonesian Burmese Dutch Australian and some Japanese women were restrained for months and forced to engage in sexual activity with Japanese military personnel Many of the women were teenagers some as young as fourteen To date the Japanese government has neither admitted responsibility for creating the comfort station system nor given compensation directly to former comfort women This English edition updates the Japanese edition originally published in 1995 and includes introductions by both the author and the translator placing the story in context for American readers

Clinical Sociology Puspa Melati Wan, Abdul Halim Wan, 2020-07-29 This lucidly written textbook covers the historical background of clinical sociology as a field and its developing trends around the world It addresses the urgent need for sociologists to develop a clinical approach in their effort to improve society with the emphasis that clinical sociology should complement the work of other disciplines such as clinical psychology social work and social anthropology This book discusses in depth the concept of clinical sociology itself and the obligations of clinical sociologists It fills a gap in the literature which reveals a lack of discussion and consensus on the roles and responsibilities of clinical sociologists therefore making an important contribution to clinical sociology and sociology more broadly Graduate students practitioners and professionals in the field of clinical sociology social work and other related disciplines will find this book very useful

Averting Global Extinction Louis S. Berger, 2009 The extensive literature about averting ecological disasters nuclear catastrophe and unsupportable overpopulation typically describes dangers analyzes their implications and presses for remedial action It seems that what is taken as too obvious and well understood to mention let alone to address seriously is humanity's failure to give global and human survival top priority More careful consideration of this irrational self destructive sociocultural negligence shows that it is complex puzzling and ensconced and perpetuated by pathological societal defenses This paradox is Averting Global Extinction's subject Berger argues that if these psychological defenses were reduced so would be society's indifference to necessary action The book's clinically informed approach conceptualizes society's self destructiveness as an analogue to the self destructive psychopathologies of individuals identifies society's ubiquitous and destructive psychological defenses denial projection and avoidance as the chief element in that sociocultural psychopathology and devises a sociocultural therapy This therapy is accomplished by translating a carefully selected individual psychotherapy framework a subtype of the so called analysis of defense into a corresponding societal therapeutic methodology society becomes the patient This intervention is intended to complement and facilitate not replace the usual recommended approaches to rescuing the globe Thus three analogies are deployed between individual and societal pathology defenses and psychotherapy The book's new and valuable principal contributions are the identification of sociocultural psychopathology as the underlying cause of our near indifference to the threat of global extinction the recognition of societal defenses as key elements in that pathology the conceptualization of a therapeutic analogue applicable at the societal level to counter that indifference and the construction of an exemplar of that analogue

Routledge Revivals: Homosexuality: A Research Guide (1987) Wayne R. Dynes, 2017-02-17 First published in 1987 this book encompasses a broad range interdisciplinary research into homosexuality displaying a full spectrum of points of view and given that the major traditions of modern homosexual research began in Europe is not restricted to works in English In general topics that are densely covered in the literature are presented in this guide selectively with some less studied topics such as Economics and Music

fleshed out with signposts to more comprehensive research It seeks to not only mirror existing publications but also to stimulate new work by pinpointing neglected themes and methods This book will be of interest to students of sociology

National Library of Medicine Current Catalog National Library of Medicine (U.S.),1982 **Problem of Order** Dennis Wrong,1994-01-31 At the end of the twentieth century many fear that the bonds holding civil society together have come undone Yet as the noted scholar Dennis Wrong shows us our generation is not alone in fearing a breakdown of social ties and a descent into violent conflict **Ideologies and the Corruption of Thought** Joseph Gabel,2018-01-16 Edited and with an introduction by Alan Sica In 1975 Joseph Gabel published a modern masterpiece which appeared in English as False Consciousness An Essay on Reification Combining his special knowledge of existential psychiatry axiology Marxism and political history Gabel proposed the utterly novel idea that victims of serious mental disturbances especially paranoia and schizophrenia reproduce those distorted thought patterns commonly associated with ideological beliefs at the collective level Such beliefs initially had been laid bare in the 1920s by Gabel s intellectual progenitors Karl Mannheim and George Lukacs Gabel s remarkable innovation was to transfer the private crisis of mental collapse into the analytic framework previously reserved for ideological critique making him an expert on what was later called the micro macro problem Ideologies and the Corruption of Thought includes Gabel s essays over the last 40 years characteristically treating micro and macro theoretical matters simultaneously Originally written in French and German they have been recast in idiomatic English and bibliographically updated Using a unique mode and vocabulary of analysis Gabel offers theoretical investigations of McCarthyism and Stalinism original and more recent types as well as Althusser Orwell and Jonathan Swift in his capacity as a psychiatric theorist He also explores anti Zionism anti Semitism and a fascinating case study of a paranoid who regarded himself as the pope In addition this volume includes a range of general commentaries on ideological thought utopianism and false consciousness This rich feast of social and political analysis and theory illuminates a range of contemporary concerns racism utopian fantasy ethnocentrism anti Semitism the interplay of social structure and mental illness and ideological transformations of social life which only Gabel s unique mixture of the clinical and the political could achieve It will be studied with interest by all theorists and politically alert readers in the social sciences philosophy and related fields of study

Fire in the Dragon and Other Psychoanalytic Essays on Folklore Géza Róheim,2021-08-10 The only Freudian to have been originally trained in folklore and the first psychoanalytic anthropologist to carry out fieldwork Gza Rcheim 1891 1953 contributed substantially to the worldwide study of cultures Combining a global perspective with encyclopedic knowledge of ethnographic sources this Hungarian analyst demonstrates the validity of Freudian theory in both Western and non Western settings These seventeen essays written between 1922 and 1953 are among Rcheim s most significant published writings and are collected here for the first time to introduce a new generation of readers to his unique interpretations of myths folktales and legends From Australian aboriginal mythology to Native American trickster tales from the Grimm folktale

canon to Hungarian folk belief Rcheim explores a wide range of issues such as the relationship of dreams to folklore and the primacy of infantile conditioning in the formation of adult fantasy An introduction by folklorist Alan Dundes describes Rcheim s career and each essay is prefaced by a brief consideration of its intellectual and bibliographical context **Violence, Culture And Censure** Professor Colin Sumner, Colin Sumner, 2005-08-12 Essays reflecting on our understanding and moral judgement of violence The essays argue that even serious violence is not a simple fact but a category of thought and practice rooted in history culture and society **Psychodynamic Treatment of Children with Severe Emotional Disturbances** Gertrude Pollitt, 2020-01-09 In Psychodynmaic Treatment of Children with Severe Emotional Disturbances author Gertrude Pollitt demonstrates the best practices of treating severely emotionally disturbed children and adolescents to help them adapt and thrive in the real world while also addressing their own intimate needs Pollitt translates complex theoretical concepts and clinical paradigms in simple language so that the reader will find them readily accessible Throughout this book clinical vignettes illustrate various conceptual frameworks including that of Anna Freund and the developmental ladder and Donald Winnicott s ideas of the importance of a facilitating environment *Disavowed Knowledge* Peter Maas Taubman, 2012-05-22 This is the first and only book to detail the history of the century long relationship between education and psychoanalysis It provides not only a historical context but also a psychoanalytically informed analysis **Readings in the Political Economy of Aging** Meredith Minkler, Carroll Estes, 2019-03-19 Includes 16 essays which address many issues from a different perspective suggested by the experience of aging in America This study explores the political social and economic realities which have an impact on Americans as they grow older **Current Catalog** National Library of Medicine (U.S.), 1982 First multi year cumulation covers six years 1965 70 *In Search of Self in India and Japan* Alan Roland, 2021-04-13 Drawing on work with Indian and Japanese patients a prominent American psychoanalyst explores inner worlds that are markedly different from the Western psyche A series of fascinating case studies illustrates Alan Roland s argument the familial self rooted in the subtle emotional hierarchical relationships of the family and group predominates in Indian and Japanese psyches and contrasts strongly with the Western individualized self In perceptive and sympathetic terms Roland describes the emotional problems that occur when Indians and Japanese encounter Western culture and the resulting successful integration of new patterns that he calls the expanding self Of particular interest are descriptions of the special problems of women in changing society and of the paradoxical relationship of the spiritual self of Indians and Japanese to the familial self Also described is Roland s own response to the broadening of his emotional and intellectual horizons as he talked to patients and supervised therapists in India and Japan As we were coming in for a landing to Bombay he writes the plane banked so sharply that when I supposedly looked down all I could see were the stars while if I looked up there were the lights of the city This is the world turned upside down that he describes so eloquently in this book What he has learned will fascinate those who wish to deepen their understanding of a different way of being *Return from the Natives* Peter

Mandler, 2013-05-07 DIV Celebrated anthropologist Margaret Mead who studied sex in Samoa and child rearing in New Guinea in the 1920s and 30s was determined to show that anthropology could tackle the psychology of the most complex modern societies in ways useful for waging the Second World War This fascinating book follows Mead and her closest collaborators her lover and mentor Ruth Benedict her third husband Gregory Bateson and her prospective fourth husband Geoffrey Gorer through their triumphant climax when Mead became the cultural ambassador from America to Britain in 1943 to their downfall in the Cold War Part intellectual biography part cultural history and part history of the human sciences Peter Mandler's book is a reminder that the Second World War and the Cold War were a clash of cultures not just ideologies and asks how far intellectuals should involve themselves in politics at a time when Mead's example is cited for and against experts involvement in Iraq and Afghanistan div

Explorations in Psychoanalytic Ethnography Jadran Mimica, 2007-05 Whereas most anthropological research is grounded in social cultural and biological analysis of the human condition this volume opens up a different approach its concerns are the psychic depths of human cultural life worlds as explored through psycho analytic practice and or the psychoanalytically framed ethnographic project In fact some contributors here argue that the anthropological interpretation of human existence is not sustainable without psychoanalysis others take a less extreme radical stance but still maintain that the unconscious matrix of the human psyche and of the intersubjective social reality of any given cultural life world is a vital domain of anthropological and sociological inquiry and understanding
