Hearnshaw, 2019-11-28 Originally published in 1987 The Shaping of Modern Psychology presents a systematic survey of the development of psychology from the dawn of civilization to the late 1980s Psychology as we find it today has been shaped by many influences philosophical theological scientific medical and sociological It has deep roots in the whole history of human thought and its significance cannot be properly appreciated without an understanding of the way it has developed This book covers the history of modern psychology from its animistic beginnings through the Greek philosophers and the Christian theologians and developments such as the Scientific Revolution to the time of first publication The author drew on many years teaching experience in the subject and on a lifetime s interest in psychology The growth of psychology had been particularly impressive during the twentieth century and Professor Hearnshaw also looked to the future of the discipline He showed that the new vistas opening out in fields such as neuropsychology information theory and artificial intelligence for example were hopeful indications for the future provided the lessons of the past were not forgotten With the benefit of

hindsight we now know that he was right *Psychology Library Editions: History of Psychology* Various, 2021-08-19 Originally published between 1928 and 1987 the volumes in this set provide an interesting look back at how psychology has developed as a discipline and some of the problems it has encountered along the way It includes volumes focusing on the history of specific fields such as developmental and experimental psychology as well as examining the roots of psychological theory as a whole and how it has informed many of the fields of psychology we know today Economies of Representation, 1790?2000 Leigh Dale, 2017-11-30 Although postcolonialism has emerged as one of the most significant theoretical movements in literary and cultural studies it has paid scant attention to the importance of trade and trade relations to debates about culture Focusing on the past two centuries this volume investigates the links among trade colonialism and forms of representation posing the question What is the historical or modern relationship between economic inequality and imperial patterns of representation and reading Rather than dealing exclusively with a particular industry or type of industry the contributors take up the issue of how various economies have been represented in Aboriginal art in literature by North American Caribbean Portuguese South African First Nations Australian British and Aboriginal authors and in a diverse range of writings that includes travel diaries missionary texts the findings of the Leprosy Investigation Commission early medical accounts and media representations of HIV AIDS Examining trade in commodities as various as illicit drugs liquor bananas tourism adventure fiction and modern Aboriginal art as well as cultural exchanges in politics medicine and literature the essays reflect the widespread origins of the contributors themselves who are based throughout the English speaking world Taken as a whole this book contests the commonplace view promoted by some modern economists that trade in and of itself has a leveling effect equalising cultures places and peoples demonstrating instead the ways in which commerce has created and exacerbated differences in power **The Spiritual Meaning of the Sixties** Tobias Churton, 2018-11-27 Unveils the spiritual meaning that fueled the artistic political and social revolutions of the 1960s Investigates the spiritual principles that informed everything from the civil rights and anti war movements to the hippies rejection of materialist culture to the rise of feminism gay rights and environmentalism Reveals how medieval troubadours Gnosticism Renaissance hermetic magic and the occult doctrines of Aleister Crowley helped shape the psychedelic Sixties Offers in depth analysis of many of the era s most famous books films and music No decade in modern history has generated more controversy and divisiveness than the tumultuous 1960s For some the 60s were an era of free love drugs and social revolution For others the Sixties were an ungodly rejection of all that was good and holy Embarking on a profound search for the spiritual meaning behind the massive social upheavals of the 1960s Tobias Churton turns a kaleidoscopic lens on religious and esoteric history industry science philosophy art and social revolution to identify the meaning behind all these diverse movements Engaging with views of mainstream historians some of whom write off this pivotal decade as heralding an overall decline in moral values and respect for tradition Churton examines the intricate network of spiritual forces at play in the era He reveals spiritual principles that

united the free love movement the civil rights and anti war movements the hippies rejection of materialist culture and the eventual rise of feminism gay rights and environmentalism He traces influences from medieval troubadours Gnosticism Hindu philosophy Renaissance hermetic magic and the occult doctrines of Aleister Crowley He also examines the psychedelic revolution the genesis of popular interest in UFOs and the psychological consequences of the Bomb and the assassinations of the Kennedys and Martin Luther King In addition Churton investigates the huge shifts in consciousness reflected in the movies music art and literature of the era from Frank Sinatra to the Beatles from I Love Lucy to Star Trek from John Wayne to Midnight Cowboy much of which still resonates with the youth of today Taking the reader on a long strange trip from crew cuts and Bermuda shorts to Hair and Woodstock from liquor to psychedelics from uncool to cool and from matter to Soul Churton shows how the spiritual values of the Sixties are now reemerging with an astonishing influx of spiritual light to once again awaken us
