

Psychiatric Services in Jails and Prisons POSITION STATEMENT

*Approved by the Assembly, November 1988
Approved by the Board of Trustees, December 1988*

"Policy documents are approved by the APA Assembly and Board of Trustees. . . These are . . . position statements that define APA official policy on specific subjects. . ." -- APA Operations Manual.

This statement was prepared by the Task Force on Psychiatric Services in Jails and Prisons¹ of the Council on Psychiatric Services.

The American Psychiatric Association accords a high priority to the care and treatment of patients from groups that are underserved, especially groups that lack strong political constituencies. Such groups include the chronically mentally ill and the mentally ill homeless. Also included, but less visible, are the mentally ill in jails and prisons.

The mentally ill are especially vulnerable to the difficult conditions that typically prevail in our jails and prisons. Psychiatrists practicing in such facilities attempt to provide adequate services under the most difficult working circumstances, with inadequate professional recognition and remuneration, and, perhaps most burdensome of all, in the midst of frequently deplorable conditions.

In the 1974 "Position Statement on Medical and Psychiatric Care in Correctional Institutions" (1), APA called for a "full range of . . . psychiatric services" in jails and prisons. Noting that "an essential part of a minimal medical care delivery system consists of the early detection, diagnosis, treatment, and prevention of psychiatric illness," the APA position statement went on to forcefully state that "the fact of incarceration imposes upon public authority the special duty to provide adequate medical services, including psychiatric services. Availability of such services is and should be a right of the incarcerated individual."

However, a decade later, in 1983, APA was obliged to observe that "providing mental health treatment for persons in jails and prisons has, over the years, proved a refractory problem" (2). In part, this situation persists because of the altered social context of the operations of correctional facilities, which has resulted in tightened admission criteria for psychiatric hospitalization, fewer beds, limits on length of stay, reduced availability and use of civil commitments, and changing sentencing practices that have increased the number of inmates needing mental health services. Legislative demands for fiscal austerity and associated public policies, such as deinstitutionalization, have led to a complex set of circumstances that have been associated with an increase in the number of mentally ill persons who are at risk of incarceration in local jails because of minor charges used to address their disturbed behavior. This situation has resulted in a substantial increase in the population of inmates requiring mental health care.

Severe overcrowding is an additional factor often contributing to the inadequacy of psychiatric services in jails and prisons. Conditions are often so bad in contemporary jails and prisons that both state and federal courts have mandated sweeping changes in their operations. The Supreme Court has ruled that it is the obligation of correctional officials to ensure that the civil rights of the mentally ill are protected. This obligation includes the right to adequate mental health care. Providing adequate mental health care in this context rests on the following principles:

The American Psychiatric Association is a national medical specialty society, founded in 1844, whose 36,500 physician members specialize in the diagnosis and treatment of mental and emotional illnesses including substance use disorders.

Psychiatric Services In Jails And Prisons:

Psychiatric Services in Jails and Prisons American Psychiatric Association, 2015-06-02 The long awaited report of the APA's Work Group to Revise the APA Guidelines on Psychiatric Services in Correctional Facilities Psychiatric Services in Correctional Facilities comes at a time of growing incarceration rates more rigid sentencing policies harsher sanctions and tougher public attitudes toward crime The result is a near doubling of the incarcerated population since the first report was issued in 1989 and a significant increase of inmates with serious mental health issues The work group members address the implications of this troubling state of affairs for psychiatrists and other mental health practitioners who diagnose and treat within the correctional environment On the basis of extensive input from multiple sources and perspectives they have developed clear guidelines that equip clinicians to navigate the special challenges they face This edition has been thoroughly updated and is structured to flow from the foundational principles that govern the delivery of psychiatric care in correctional facilities to the guidelines for screening referral evaluation treatment and community reentry planning to special applications of the principles and guidelines to specific disorders syndromes patient populations housing locations treatment modalities and inmate special needs Readers will find the book well written with clear guidance for the clinician as well as challenges to think beyond the needs of individual patients to the larger relationship between mental illness and incarceration Approximately three of every four incarcerated people with a serious mental illness have a co occurring substance use disorder complicating both diagnosis and treatment The book offers strategies for treating co occurring disorders and explores the need for evidence based screening tools Because some inmate populations have unique evaluation and treatment needs because of their disorders demographics or other characteristics separate sections are devoted to women youths in adult correctional facilities geriatrics lesbian gay bisexual and transgender patients veterans and patients with intellectual and developmental disabilities New management and programmatic topics include hospice mental illness and segregation seclusion and restraint telepsychiatry and the spiritual lives of inmates The appendix is a valuable resource that includes a selection of APA position statements on topics relevant to psychiatric services in correctional settings such as capital punishment access to care for transgender and gender variant individuals and the adjudication of youths as adults in the criminal justice system Correctional psychiatry is an evolving field and serious questions remain The work group sees an expanded role for clinicians as physician leaders managers and directors more effectively advocating for their patients and helping to shape optimal care delivery systems that empower patients and support successful transition back to the community Psychiatric Services in Correctional Facilities provides the current knowledge and professional support clinicians need to meet these challenges

Psychiatric Services in Jails and Prisons American Psychiatric Association. Task Force to Revise the APA Guidelines on Psychiatric Services in Jails and Prisons, Henry C. Weinstein, 2000 For the past decade the first edition of this unique book has lighted the way for those seeking to navigate the perilous shoals of providing mental

health services in jails and prisons These guidelines have been used and cited extensively in many contexts educational planning and legal They also have been used by surveyors and monitors of correctional facilities Since the publication of the first edition American jails and prisons have seen many changes including considerable litigation the development of consumer groups and the creation of some exemplary programs However there has also been a dramatic increase in the population of U S jails and prisons In September 1989 when the first edition of these guidelines was published our nation s jails and prisons held an estimated 1 2 million men and women This number is now 1 8 million Many studies have consistently demonstrated that about 20% of these inmates have serious mental illnesses and as many as 5% are actively psychotic With upward of 700 000 men and women entering the U S criminal justice system each year with active symptoms of serious mental disorders with 75% of these people having co occurring substance abuse disorders and with these persons likely to stay incarcerated four or five times longer than similarly charged people without mental disorders what are our duties and responsibilities How do we live up to our personal moral principles our professional ethics and our public service obligations in the face of these overwhelming numbers This is the question to which this book is addressed This book is intended both to prod to action and to provide comprehensive guidance on how to fulfill these responsibilities to ourselves our profession and these badly underserved patients We have the technologies for treatment and the knowledge and the skills yet limited resources and public and professional resistance often impede appropriate response We believe that these guidelines can help overcome many of these sources of resistance through informed action More active involvement of our profession as described in these guidelines is needed is possible and will make a difference

Psychiatric Services in Correctional Facilities American Psychiatric Association, 2015-06-02 The 15 years since publication of the second edition of the American Psychiatric Association s task force report on psychiatric services in correctional facilities have seen increasing rates of incarceration of mentally ill individuals continuing criminalization of substance use disorders and a lack of accessible and appropriate care in the community The purpose of the new edition Psychiatric Services in Correctional Facilities and the aim of the work group that authored it over many years of research dialogue and development is to provide leadership in addressing the needs of the often disenfranchised population of the incarcerated and to provide guidance to mental health clinicians working in correctional settings Urging an expanded role in leadership and advocacy the work group members present the foundational principles that apply to providing care in correctional facilities outline the basic types of services that should be provided and apply the principles and guidelines previously established to specific disorders patient populations treatment modalities and special needs Working with these patients and in these settings presents particular challenges that clinicians are unlikely to have encountered elsewhere in practice such as the use of seclusion and restraint and administrative issues Psychiatric Services in Correctional Facilities provides critical guidance and support for mental health professionals operating in this often frustrating environment enabling them to provide both effective treatment and

The Criminalization of Mental Illness Risdon N. Slate, Jacqueline K. Buffington-Vollum, W. Wesley Johnson, 2013-10-03 For a myriad of reasons the criminal justice system has become the de facto mental health system This book explores how and why this is the case Sensationalized cases often drive criminal justice policies that can sometimes be impulsively enacted and misguided While there are chapters that examine competency insanity and inpatient and outpatient commitment the primary focus of the book is on the bulk of encounters that clog the criminal justice system with persons with mental illnesses pwmi Criminal justice practitioners are often ill equipped for dealing with pwmi in crises However via application of therapeutic jurisprudence principles some agencies are better preparing their employees for such encounters and attempting to stop the inhumane and costly recycling of pwmi through the criminal justice system Coverage runs the gamut from deinstitutionalization to specialized law enforcement responses to mental health courts to jails and prisons to discharge planning diversion and reentry Also criminal justice practitioners in their own words provide insight into and examples of the interface between the mental health and criminal justice systems Throughout the book the balance between maintaining public safety and preserving civil liberties is examined as the state's police power and parens patriae roles are considered Reasoned collaborative approaches for influencing and informing policies that are often driven by crises are discussed this book also reflects more psychological underpinnings than the 1st edition as one of the co authors new to this edition is a forensic clinical psychologist The following Teaching Materials are available electronically on a CD or via email Please contact Beth Hall at bhall@cap press com to request a copy and specify what format is needed Teacher's Manual with notes and extensive test bank in Word pdf formats Test bank is also available in separate files by chapter in Word and Blackboard formats Other LMS formats may be available let me know what you need Upon adoption only the following are also available 3 Videos Upon adoption only One video illustrates Crisis Intervention Team scenarios another explores PTSD and the third video is of a lecture author Risdon Slate gave to law enforcement in training that describes his own personal story PowerPoint slides will be available upon adoption Email bhall@cap press com for more information I am so grateful that I have decided on this book and the resources are amazing Joseph C Marinello lecturer in the Department of Criminal Justice and Criminology UNC Charlotte on classroom adoption of second edition Notorious criminal cases tend to drive public opinion and policy when it comes to how our criminal justice system deals with persons with mental illnesses Drs Slate and Johnson's book is a far brighter star to steer by By most accounts including the US Department of Justice our criminal justice system is in crisis In The Criminalization of Mental Illness the authors explain how our justice system has failed persons with mental

illnesses the public and its own self interests But rather than place blame the authors focus on illuminating the history and anatomy of the problem and offering real solutions Because they are based on careful scholarship their proposals are authoritative and make sense But it is their informed empathy for all the players involved in the tragedy not just persons with mental illnesses that makes this book a must read for anyone involved in the criminal justice system or simply interested in knowing the truth of how it is broken and can be fixed Xavier F Amador Ph D Adjunct Professor Columbia University Author of the National Best Seller I am Not Sick I Don t Need Help and I m Right You re Wrong Now What The book confronts myths and social political policy failures directly and with great honor recognizes those advocates whose work has moved social justice and mental health policy forward Their dedication and passion to the subject of promoting human rights and recovery is evident in every word It is a masterful relevant and inspiring work Ginger Lerner Wren the nation s first mental health court judge and member of the President s Commission on Mental Health This book provides extraordinary insights into the manner by which people with mental illness are processed through the criminal justice system I thoroughly enjoyed this work and would recommend it to anyone who has an interest in issues involving mental illness and the criminal justice system I have seen a few books in this area but have never found one quite as comprehensive and well researched It is without exception one of the best academic books that I have read in many years Penn State Altoona Professor Robert M Worley in his book review for The Southwest Journal of Criminal Justice Fall 2008 This is a highly insightful and important book which corrections staff academics students and the general public should know about Ken Kerle Ph D American Jail Association Overall this very readable book provides a good survey of the various sectors of the criminal justice system and their response to the substantive changes that have affected persons with mental illness during the recent past These authors provide a valuable guide for mental health professionals interested in appropriate treatment and placement of persons with mental illness Frederick J Frese Ph D Psychiatric Services A Journal of the American Psychiatric Association Without a doubt it is the most comprehensive explanation of what has happened between the two systems during the past 40 or so years It explains not only the crisis that exists and how we got here but some interesting and innovative ways that local governments are providing solutions More important than the chronicling of the impact of this social crisis it demonstrates with pointed examples how the two systems intertwine with well intentioned judicial and treatment policies No matter how you view the issue of the mentally ill in prison the book demonstrates that the person left out of the discussion is the defendant offender patient Corrections Today
