## **Psychiatric Terror How Soviet Psychiatry Is Used To Suppress Dissent:**

**Psychiatric Terror** Sidney Bloch, Peter Reddaway, 1977-09-17      Russian/Soviet Military Psychiatry, 1904-1945 Paul Wanke, 2005 Psychiatry like most professional fields in Russia gained its legitimacy from its ability to serve the Tsar and later the Bolshevik party. The militarised nature of these governments meant that psychiatry would have to prove its worth to the military. This study will cover Russian Soviet military psychiatry from its first practical experience during the Russo Japanese war to its greatest test during the Great Patriotic War 1941-45. Throughout this study the continuity between Russian and Soviet military psychiatry will be emphasised. For example psychiatry's materialist school dominated throughout this period and that Russia's acceptance that psychiatric casualties will occur allowed them to focus their resources on treatment rather than prevention.

Jongman,2017-07-28 While there is no easy way to define terrorism it may generally be viewed as a method of violence in which civilians are targeted with the objective of forcing a perceived enemy into submission by creating fear demoralization and political friction in the population under attack At one time a marginal field of study in the social sciences terrorism is now very much in center stage The

1970s terrorist attacks by the PLO the Provisional Irish Republican Army the Popular Front for the Liberation of Palestine the Japanese Red Army the Unabomber Aum Shinrikyo Timothy McVeigh the World Trade Center attacks the assault on a school in Russia and suicide bombers have all made the term terrorism an all too common part of our vocabulary This edition of Political Terrorism was originally published in the 1980s well before some of the horrific events noted above This monumental collection of definitions conceptual frameworks paradigmatic formulations and bibliographic sources is being reissued in paperback now as a resource for the expanding community of researchers on the subject of terrorism This is a carefully constructed guide to one of the most urgent issues of the world today When the first edition was originally published Choice noted This extremely useful reference tool should be part of any serious social science collection Chronicles of Culture called it a tremendously comprehensive book about a subject that any who have anything to lose from property to liberty life to limbs should be forewarned against *The Roots of Evil* Ervin Staub,1992-07-31 How can human beings kill or brutalise multitudes of other human beings Focusing particularly on genocide Erwin Staub explores the psychology of group aggression He sketches a conceptual framework for the many influences on one group s desire to harm another and within this framework considers four historical examples of genocide Madhouse Jennifer L. Lambe,2016-12-22 On the outskirts of Havana lies Mazorra an asylum known to and at times feared by ordinary Cubans for over a century Since its founding in 1857 the island s first psychiatric hospital has been an object of persistent political attention Drawing on hospital documents and government records as well as the popular press photographs and oral histories Jennifer L Lambe charts the connections between the inner workings of this notorious institution and the highest echelons of Cuban politics Across the sweep of modern Cuban history she finds Mazorra has served as both laboratory and microcosm of the Cuban state the asylum is an icon of its ignominious colonial and neocolonial past and a crucible of its republican and revolutionary futures From its birth Cuban psychiatry was politically inflected drawing partisan contention while sparking debates over race religion gender and sexuality Psychiatric notions were even invested with revolutionary significance after 1959 as the new government undertook ambitious schemes for social reeducation But Mazorra was not the exclusive province of government officials and professionalizing psychiatrists U S occupiers Soviet visitors and above all ordinary Cubans infused the institution both literal and metaphorical with their own fears dreams and alternative meanings Together their voices comprise the madhouse that as Lambe argues haunts the revolutionary trajectory of Cuban history Empire of Terror Mark D. Silinsky,2021-07 In Empire of Terror Mark D Silinsky argues that Iran is one of the United States deadliest enemies The Islamic Revolutionary Guard Corps known as the Guards bring Iran s sway over much of the greater Middle East and pose a growing existential threat to Western security Providing insights gained from his thirty eight years as an analyst in the U S defense intelligence community Silinsky argues that Iran s political leaders and Guards are animated by aggressive unforgiving and totalitarian principles He draws historical parallels to the Soviet Union and Nazi Germany to compare the intelligence and security

services of states with totalitarian aspirations and to illustrate ideological points of intersection a collectivist mindset intolerance for political deviation strongly defined sex roles and hypermasculinity and a ruthless determination to ferret out and destroy their enemies Silinsky offers biographies and explanations of the ideology that propels some of Iran's leaders with global implications Profiling the perpetrators victims heroes villains and dupes Silinsky shines light on the human and inhumane elements in this distinctly Iranian drama Although the Soviet Union and Nazi Germany have been defeated and belong to history the Iranian threat is very much alive *Delusions and the Madness of the Masses* Lawrie

Reznek, 2010-11-16 We all think that we can tell the difference between someone who is mad or whom psychiatrists call psychotic and someone who is sane But can we really tell who is mad and who is not Do we really know what madness is and how it should be recognized Have psychiatrists made a sensible distinction between the patient who believes that aliens are beaming messages to him from a foreign planet and the religious fanatic who believes God communicates to him via automatic writing Is there a difference between the paranoid patient who believes that the FBI is after him and the sizeable proportion of our normal population that believe that the US government orchestrated the 9 11 bombings Here Reznek hopes to shed light on the delusions of the masses those delusions that are common to everyday people living so called ordinary lives He provides an understanding of madness and the psychological processes that drive us to adopt delusions arguing that it is a mistake to view only schizophrenic patients as delusional while excluding large groups of society from such an analysis If we abandon the idea that whole communities cannot share a delusion we can come to a better understanding about why the world is such a dangerous place **Problems of Communism**, 1981 *Lethal Politics* R. J. Rummel, 2017-07-05 While

there are estimates of the number of people killed by Soviet authorities during particular episodes or campaigns until now no one has tried to calculate the complete human toll of Soviet genocides and mass murders since the revolution of 1917 Here R J Rummel lists and analyzes hundreds of published estimates presenting them in the historical context in which they occurred His shocking conclusion is that conservatively calculated 61 911 000 people were systematically killed by the Communist regime from 1917 to 1987 Rummel divides the published estimates on which he bases his conclusions into eight historical periods such as the Civil War collectivization and World War II The estimates are further divided into agents of death such as terrorism deportations and famine Using statistical principles developed from more than 25 years of quantitative research on nations he analyzes the estimates In the collectivization period for example about 11 440 000 people were murdered During World War II while the Soviet Union had lost almost 20 000 000 in the war the Party was killing even more of its citizens and foreigners probably an additional 13 053 000 For each period he defines counts and totals the sources of death He shows that Soviet forced labor camps were the major engine of death probably killing 39 464 000 prisoners overall To give meaning and depth to these figures Rummel compares them to the death toll from major wars world disasters global genocide deaths from cancer and other diseases and the like In these and other ways Rummel goes well beyond the bare bones of statistical

analysis and tries to provide understanding of this incredible toll of human lives Why were these people killed What was the political and social context How can we understand it These and other questions are addressed in a compelling historical narrative This definitive book will be of interest to Soviet experts those inte The Only Super Power Paul Hollander,2008-12-16 In The Only Superpower Reflections on Strength Weakness and Anti Americanism Paul Hollander examines anti Americanism including the relationship between the foreign and domestic varieties American culture especially mass culture the lingering political and cultural influences of the 1960s and the controversial relationship between the realms of the personal and the political He also revisits the part played by hatred and especially the scapegoating impulse in social and political conflicts The essays range widely from Michael Moore s political celebrity the American love for SUVs and getting old in America to Islamic fanaticism and the aftermath of the fall of Eastern European communist systems
