*Fundamentals of Forensic Practice* Richard Rogers, Daniel Shuman, 2006-04-07 Forensic psychologists and psychiatrists are increasingly asked to provide expertise to courts and attorneys in the criminal justice system To do so effectively they must stay abreast of important advances in the understanding of legal standards as well as new developments in sophisticated measures and the methods for their assessment *Fundamentals of Forensic Practice* is designed to address the critical issues that are faced by mental health experts in their role of conducting assessments presenting findings and preparing for challenges to admissibility and credibility Uniquely practical and comprehensive this volume operationalizes legal standards and describes empirically validated methods for their evaluation Not only is this essential for mental health professionals but it is equally valuable to criminal attorneys Lawyers require both clinical knowledge and understanding of legal standards in order to prepare their own experts and to challenge those on the opposing side For both clinical and legal experts *Fundamentals of Forensic Practice* offers a full view of all phases of criminal proceedings Pretrial diversion determinations of bail waivers of Miranda rights and the capacity to consent to searches Trial competency to stand trial and criminal responsibility Beyond insanity the latter addresses mens rea automatism and psychological context evidence such as battered woman syndrome Post trial sentencing capital sentencing competency to be executed and other post conviction issues Other key features include Chapters on specific criminal issues in a consistent format with comprehensive coverage of legal standards and relevant clinical methods Guidelines for conducting more effective forensic evaluations In depth coverage of specialized

assessments eg malingering sexual predator cases and the insanity defense A detailed overview of direct and cross examination strategies This book is the second collaboration between Rogers and Shuman As individual authors each received the American Psychiatric Association s prestigious Guttmacher Award for their outstanding contributions to forensic psychiatry *Psychiatry — Law and Ethics* Amnon Carmi, Stanley Schneider, Albert Hefez, 2013-03-08 The prostitution of the German psychiatric profession into a Nazi inquisitional tool was a major factor producing the total degradation of German medicine and morality Its low point was its psychiatrists killing the patients they were sworn to care for and its other physicians performing inhuman experiments on patients they were pledged to treat In America also psychiatry has been performing some of the functions of an Inquisition injuring innocents both patients and dissenters and exculpating criminals terrorists especially Innocents are being injured both in and out of psychiatric hospitals The increased fragmentation of care the augmentation of its discontinuities and assigning the responsibility for organizing it to non medical managers are some of the factors worsening the treatment results of our hospitals Wrongful deaths due largely to the specialty s intoxication with drugs while ignoring the importance of common human decency have become a national scandal **Psychiatric Aspects of Justification, Excuse and Mitigation in Anglo-American Criminal Law** Alec Buchanan, 2000-07-24 Violent crimes committed by the mentally disordered attract academic and public attention They raise issues of moral responsibility and public protection This study systematically analyses the principles underlying those legal and medical devices which enable the courts to make special arrangements for the mentally disordered *Psychiatry in Law / Law in Psychiatry, Second Edition* Ralph Slovenko, 2009-03-03 Psychiatry in Law Law in Psychiatry 2nd Edition is a sweeping up to date examination of the infiltration of psychiatry into law and the growing intervention of law into psychiatry Unmatched in breadth and coverage and thoroughly updated from the first edition this comprehensive text and reference is an essential resource for psychiatry residents law students and practitioners alike **Criminal Court Consultation** Richard Rosner, Ronnie B. Harmon, 2012-12-06 During the 1980s those of us who were involved in forensic psychiatry have seen an increase in the interest in our subspecialty This increased interest has been from psychiatrists lawyers judges and correctional officials as well As a part of this demand for our services there has also been an increase in the demand for detailed quality in our reports and testimony Whether this is the result of the educational efforts of the American Academy of Psychiatry and the Law the establishment of the American Board of Forensic Psychiatry the stimulation of thought by the publication of this series Critical Issues in American Psychiatry and the Law or Supreme Court decisions such as Ake v Oklahoma is anybody s guess My experience as an observer of the development of the patient s rights movement was that there was a coalescence of numerous forces such as the new human rights movement the active mental health bar and the development of neuroleptics I therefore suspect that there are a multitude of factors contributing to the new interest in forensic psychiatry and the elevation of the standards of forensic experts Regardless of the causes those who are practicing

forensic psychiatry today are expected to conduct more thorough evaluations and to report findings more completely No longer will simple conclusory statements be acceptable The forensic psychiatrist is expected to present data in a clear understandable detailed reliable and competent fashion whether testifying or in a report

Mental Disorder and Criminal Law Robert Schopp,Richard L. Wiener,Brian H. Bornstein,Steven L. Willborn,2008-10-09 Robert F Schopp Recent Supreme Court decisions categorically preclude the application of capital punishment to convicted offenders who were below the age of eighteen or mentally 1 retarded at the time they committed the crimes for which they were sentenced Neither opinion suggests that offenders in these categories cannot be criminally responsible for their offenses and the Atkins opinion explicitly recognizes that some mentally 2 retarded offenders can qualify as criminally responsible for their offenses In each case part of the reasoning in support of the exemption from capital sentences purports to show that capital punishment of these offenders would serve neither the retributive 3 nor the deterrent functions of criminal punishment Both opinions focus substantial attention on the retributive rationale contending that these offenders lack sufficient 4 culpability blameworthiness or depravity to merit capital punishment The opinions recognize that a categorical bar for all offenders below a specified age or level of intelligence might exempt some individuals who do not lack culpability sufficient to justify capital sentences The opinions draw categorical rules however to avoid the risk that some individuals who lack sufficient culpability to deserve capital punishment will be misidentified as sufficiently culpable to merit capital sentences The dissenting opinions in each case recognize that offenders in these categories have limitations that render them less culpable on average than unimpaired offenders who commit similar crimes Law, Psychiatry, and the Mental Health System Alexander D.
