**A Spiritual Hypothesis** Daniel Punzak, 2017-04-06 Traditional Western religion explains that each human has a spiritual aspect called a soul However several passages in the Bible allude to humans having a soul and a spirit Dan has explored this idea and found numerous modern psychological findings that support this notion Shamanism and some Eastern religious concepts also support this idea Diverse concepts such as creativity and mental illness can be explained by the idea that two spiritual forms are in each human

*Spiritualism and Society (Routledge Revivals)* G. K. Nelson, 2013-10-18 First published in 1969 this title explores the origins of Spiritualism as a religious movement The first part is a history of Spiritualism with a focus on its origins within America and the development of the organisation within itself Next Nelson considers the rise of Spiritualism in Britain using evidence taken from contemporary journals other publications and interviews Finally the Spiritualist movement is analysed in terms of sociological theory looking at the Church and the definition of a Cult as well as concepts of authority and leadership This is a fascinating work which will be of great interest to students researching the origins and development of the movement of Spiritualism and its relationship with society

*Astrology and Psychic Phenomena* Andre Kole, Terry Holley, 2016-09-06 Astrology Tarot cards Ouija boards spiritism psychic healing palm reading and old fashioned fortune telling now called psychic consulting all these are popular in America today Psychic hotlines are heavily represented on television with testimonials to their amazing ability to give people accurate details about their past and predictions about their future Are psychics indeed gifted with supernatural powers Andre Kole and Terry Holley show convincingly how the success of these and other paranormal phenomena depends on deceit and slight of hand rather than on genuine supernatural powers This is an age when countless groups and movements new and old mark the religious landscape in our culture As a result many people are confused or uncertain in their search for spiritual truth and meaning Because few people have the time or opportunity to research these movements fully the Zondervan Guide to Cults and Religious Movements series provides essential information and insights for their spiritual journeys The second wave of books in this series addresses a broad range of spiritual beliefs from non Trinitarian Christian sects to witchcraft and neo paganism to classic non Christian religions such as Buddhism and Hinduism All books but the summary volume Truth and Error contain five sections A concise introduction to the group being surveyed An overview of the group's theology in its own words Tips for witnessing effectively to members of the group A bibliography with sources for further study A comparison chart that shows the essential differences between biblical Christianity and the group Truth and Error the last book in the series consists of parallel doctrinal charts compiled from all the other volumes Three distinctives make this series especially useful to readers

Information is carefully distilled to bring out truly essential points rather than requiring readers to sift their way through a sea of secondary details. Information is presented in a clear easy to follow outline form with menu bar running heads. This format greatly assists the reader in quickly locating topics and details of interest. Each book meets the needs and skill levels of both nontechnical and technical readers providing an elementary level of refutation and progressing to a more advanced level using arguments based on the biblical text. The writers of these volumes are well qualified to present clear and reliable information and help readers to discern truth from falsehood.

**Randi's Prize** Robert McLuhan, 2010 James The Amazing Randi is a stage magician who says he has a million dollars for anyone who can convince him they have psychic powers. No one has even come close to winning. Proof says sceptical scientists that there is no such thing as the paranormal. But are they right? In this illuminating and often provocative analysis Robert McLuhan examines the influence of Randi and other debunking sceptics in shaping scientific opinion about such things as telepathy psychics ghosts and near death experiences. He points out that scientific researchers who investigate these things at first hand overwhelmingly consider them to be genuinely anomalous. But this has shocking implications for science for society and for even perhaps for ourselves as individuals. Hence the sceptics insistence that they should rather be attributed to fraud imagination and wishful thinking. However this extraordinary and little understood aspect of consciousness has much to tell us about the human situation. McLuhan suggests. And at a time when militants are polarising the debate about religion its mystical spiritual element offers an optimistic and enlightened way forward. Randi's Prize is aimed at anyone interested in spirituality or those curious to know the truth about paranormal claims. It's an intelligent and readable analysis of scientific research into the paranormal which uniquely also closely examines the arguments of well known sceptics.

**Power of the Mind: Living and Coping with Psychic Abilities, Spiritual Gifts, and Paranormal Information** Renee Lloyd, 2011-03-02 Living and coping with psychic abilities spiritual gifts and paranormal information.

Psychology, Religion, and Spirituality James M. Nelson, 2009-02-17 Over a century ago psychologists who were fascinated with religion began to study and write about it. Theologians and religious practitioners have responded to this literature producing a fascinating dialogue that deals with our fundamental

und standings about the human person and our place in the world This book provides an introduction to the important conversations that have developed out of these interchanges The dialogue between psychology and religion is difficult to study for a number of reasons First it requires knowledge of both psychology and religion People with a background in psychology often lack a solid understanding of the religious traditions they wish to study and theologians may not be up to date on the latest developments in psychology Second it requires conceptual tools to organize the material and understand the basic problems involved in any attempt to connect the science of psychology with religion These concepts can be found in many places for instance in the writings of philosophers of science but they are complex and often hard to follow for those without a proper theological and philosophical background Finally authors who write on the topic come to the study of psychology and religion from a variety of academic and personal backgrounds This makes for wonderful diversity in conversations but it makes understanding and mastery of the material quite difficult

### **Seeing God in Our Birth**

**Experiences** Helen Holmes, 2020-05-20 There has been a recent surge in the examination of the evolutionary roots of religious belief all trying to identify where the human desire to seek the supernatural and the divine comes from This book adds a new and innovative perspective to this line of thought by being the first to link prenatal and perinatal experiences to the origins of these unconscious underpinnings of our shared images of God The book poses a ground breaking paradigm by thinking about our earliest images of God whether theist or atheist within a psychoanalytic framework comparing and contrasting the thought of Freud and Rizzuto It looks at the issue of images of God from a diversity of psychological perspectives including attachment theory developmental theory and bio psychosocial perspectives This analysis leads to the conclusion that in parallel to postnatal findings uterine and birth experiences can predispose individuals to form God representations later in life through underpinning affective and environmental factors This is a bold study of the development of one of humanity's most fundamental aspects As such it will be of great interest to scholars of the psychology of religion psychology psychoanalysis religious studies and early infant development

**The Two Worlds**, 1929 *Legitimizing Scientific Knowledge* Francis Remedios, 2003-01-01 The first book to provide an in depth examination of Steve Fuller's politically oriented social epistemology Legitimizing Scientific Knowledge compares Fuller's social epistemology with other interest oriented and truth oriented social epistemologies The result is a carefully argued in depth analysis of the work of a groundbreaking philosopher of science

*Enlightenment Pie* Lisa M. Gunshore, 2018-10-26 It seems that everywhere we look these days we see more and more people carrying weight To someone on the outside they may only see the unhealthy side effects of poor diet and pass judgements on the person's ability to care for themselves What may not be seen is the deep layers of emotional baggage that this person is carrying and their lack of self love that ultimately affects their choices when caring or ultimately not caring for themselves The baggage is really layering what we have acquired throughout this lifetime and others and it has manifested into physical weight that we carry in our bodies emotional weight and spiritual weight in the

form of karma The purpose of this book is to teach you how to release this weight from your spirit mind and body I have learned from my own experience that to truly lose weight we must complete the inner work of all the aspects of our lives By looking at those difficult pieces of ourselves that is our weight we bring to the surface many destructive emotions By working through these emotions and facing them rather than stuffing them away we are able to overcome this weight once and for all This book is not really about changing your diet but instead is about transforming all aspects of yourself and changing your life

**Exploring Therapy, Spirituality and Healing** William N. West, 2010-12-13 What place does spiritual need and healing have in the counselling room Denying the spiritual dimension of personal distress can be potentially hurtful to clients but the issue of spirituality is also fraught with professional and ethical issues for therapists This book draws on original research to move the debate about spiritual need forwards in relation to therapeutic practice supervision and training An international team of contributors offer a diverse range of perspectives to critically explore a wide spectrum of spiritual issues including prayer pastoral care and traditional healing Edited by a leading figure in the field this book Illuminates experiences of both clients and practitioners through detailed case vignettes Draws on cutting edge research in this growing field Invites readers to address their own therapeutic practice with hands on discussion points This measured and thoughtful approach provides a fascinating insight to an often complex and controversial topic As such the book is essential reading for trainees and practitioners of counselling and psychotherapy
