Magic Bullet Understanding The Revolution In Military Affairs:

The Magic Bullet? Tim Benbow, 2004-06-30 Bombing by use of laser guided weaponry is evolution not revolution aircraft have been bombing for more than 85 years but a network of sensors in space or on the sea bed that can track every move without human involvement may be revolution This and other technical advances may enable intervention and prevention without conflict certainly with non lethal weaponry The future structure of armed forces the nature and size of defence industries the potential risk of there being a single superpower and many other matters depend on how much the present and future change in military affairs is evolution and how much is genuine revolution This study based on report papers prepared for the Ministry of Defence and praised for their clarity offers clear analysis of the debate for lay students of current and military affairs as well as professionals working in the fields of politics science security and military strategy and planning

Fifth Generation Warfare Armin

Krishnan, 2024-03-11 This book outlines the concept of Fifth Generation Warfare 5GW and demonstrates its relevance for understanding contemporary conflicts Non kinetic modes of attack and war waged by groups or non state actors at the societal level has been termed 5GW This book discusses the theory of generational warfare and explores the key ideas of 5GW such as secrecy the manipulation of proxies the manipulation of identity and culture including disinformation and big data and the use of psychological warfare These techniques are used to achieve strategic objectives such as inducing desired behaviour and controlling human terrain without resorting to overt war or overt violence The text expands the debate on 5GW by exploring emerging technologies and how they could be used for maliciously shaping human society and even for maliciously changing the genetic makeup of a population for the purpose of unprecedented social control The work closes with comments on the possibility of a Sixth Generation of Warfare which targets technical systems to possibly collapse a society through strategic sabotage Overall the book demonstrates the relevance of 5GW for understanding contemporary conflicts from the Arab Spring to the war in Ukraine in terms of the need for dominating the human domain This book will be

of interest to students of security and technology defence studies and International Relations *War, Peace and International Relations* Colin Gray, James J. Wirtz, 2023-10-24 This textbook provides a comprehensive introduction to the strategic history of the past two centuries showing how those 200 years were shaped and reshaped extensively by war The book takes a broad view of what was relevant to the causes courses and consequences of conflict The volume provides students with a strong grounding in the contribution of war to the development of the modern world from the pre industrial era to the age of international terrorism and smart weapons Covering all the major wars of the past two centuries the third edition has been revised and updated and now includes new introductory essays at the start of each section to help students recognize historical turning points and strategic themes revised and updated material on the post Cold War period accommodating new developments and contemporary perspectives new material on non Western views on strategy especially Sun Tzu a new chapter on The age of acceleration and great power competition starting with the death of Bin Laden and ending with the Ukraine crisis a new Conclusion offering a synthesis between the message of earlier editions and the state of strategy today This textbook will be essential reading for students of strategic studies security studies war studies International Relations and international history *Changing War* Gary Sheffield, Peter Gray, 2013-10-24 In 1918 the British Expeditionary Force BEF played a critical role in defeating the German army and thus winning the First World War This Hundred Days campaign August to November 1918 was the greatest series of land victories in British military history 1918 also saw the creation of the Royal Air Force the world s first independent air service from the Royal Flying Corps and the Royal Naval Air Service Until recently British histories of the First World War have tended to concentrate on the earlier battles of 1916 and 1917 and often underplayed this vitally important period *Changing War* fills this significant gap in our knowledge by providing in depth examinations of key aspects of the operations of the British Army the Royal Air Force and its antecedents in the climactic year of the First World War Written by a group of established historians and emerging scholars it sheds light not only on 1918 but on the revolutionary changes in warfare that took place at that time **US Intervention Policy and Army Innovation** Richard Lock-Pullan, 2004-08-02 *US Intervention Policy and Army Innovation* examines how the US Army rebuilt itself after the Vietnam War and how this has affected US intervention policy from the victory of the Gulf War to the failure of Somalia the Bosnian and Kosovo interventions and the use of force post 9 11 Richard Lock Pullan analyzes the changes in US military intervention strategy by examining two separate issues the nature of the US Army as it rebuilt itself after the Vietnam War and the attempts by the US to establish criteria for future military interventions He first argues that US strategy traditionally relied upon national mobilization to co ordinate political aims and military means he subsequently analyzes how this changed to a formula of establishing militarily achievable political objectives prior to the use of force Drawing on a vast body of material and on strategic culture and military innovation literature Lock Pullan demonstrates that the strategic lessons were a product of the rebuilding of the Army s identity as it became a professional all

volunteer force and that the Army's new doctrine developed a new way of war for the nation embodied in the AirLand Battle doctrine which changed the approach to strategy This book finally gives a practical analysis of how the interventions in Panama and the Gulf War vindicated this approach and brought a revived confidence in the use of force while more recent campaigns in Somalia Kosovo and Bosnia exposed its weaknesses and the limiting nature of the Army's thinking The legacy of the Army's innovation is examined in the new strategic environment post 9/11 with the operations in Afghanistan and Iraq
