Viola, Carolyn Margolis, 1985-11-17 History of the expedition that surveyed 280 islands mapped 800 miles of the Oregon coast explored the Antarctic coast and collected specimens from all parts of the globe      *Uncle Sam's War of 1898 and the Origins of Globalization* Thomas D. Schoonover, 2013-07-24 The roots of American globalization can be found in the War of 1898 Then as today the United States actively engaged in globalizing its economic order its political institutions and its values Thomas Schoonover argues that this drive to expand political and cultural reach the quest for wealth missionary fulfillment security power and prestige was inherited by the United States from Europe especially Spain and Great Britain Uncle Sam's War of 1898 and the Origins of Globalization is a pathbreaking work of history that examines U S growth from its early nationhood to its first major military conflict on the world stage also known as the Spanish American War As the new nation's military industrial and economic strength developed the United States created policies designed to protect itself from challenges beyond its borders According to Schoonover a surge in U S activity in the Gulf Caribbean and in Central America in the late nineteenth and early twentieth centuries was catalyzed by the same avarice and competitiveness that motivated the European adventurers to seek a route to Asia centuries earlier Addressing the basic chronology and themes of the first century of the nation's expansion Schoonover locates the origins of the U S goal of globalization U S involvement in the War of 1898 reflects many of the fundamental patterns in our national history exploration and discovery labor exploitation violence racism class conflict and concern for security that many believe shaped America's course in the twentieth and twenty first century      **A Great and Rising Nation** Michael A. Verney, 2022-07-27 A Great and Rising Nation illuminates the unexplored early decades of the United States imperialist naval aspirations Conventional wisdom holds that until the Spanish American War of 1898 the United States was a feeble player on the world stage with an international presence rooted in commerce rather than military might Michael A Verney's A Great and Rising Nation flips this notion on its head arguing that early US naval expeditions often characterized as merely scientific were in fact deeply imperialist Circling the globe from the Mediterranean to South America and the Arctic these voyages reflected the diverse imperial aspirations of the new republic including commercial dominance

in the Pacific World religious empire in the Holy Land proslavery expansion in South America and diplomatic prestige in Europe As Verney makes clear the United States had global imperial aspirations far earlier than is commonly thought

Americans regarded tropical America the Holy Land Polynesia and Africa **William Stimpson and the Golden Age of American Natural History** Ronald Scott Vasile,2018-06-19 William Stimpson was at the forefront of the American natural history community in the latter half of the nineteenth century Stimpson displayed an early affinity for the sea and natural history and after completing an apprenticeship with famed naturalist Louis Agassiz he became one of the first professionally trained naturalists in the United States In 1852 twenty year old Stimpson was appointed naturalist of the United States North Pacific Exploring Expedition where he collected and classified hundreds of marine animals Upon his return he joined renowned naturalist Spencer F Baird at the Smithsonian Institution to create its department of invertebrate zoology He also founded and led the irreverent and fun loving Megatherium Club which included many notable naturalists In 1865 Stimpson focused on turning the Chicago Academy of Sciences into one of the largest and most important museums in the country Tragically the museum was destroyed in the Great Chicago Fire of 1871 and Stimpson died of tuberculosis soon after before he could restore his scientific legacy This first ever biography of William Stimpson situates his work in the context of his time As one of few to collaborate with both Agassiz and Baird Stimpson s life provides insight into the men who shaped a generation of naturalists the last before intense specialization caused naturalists to give way to biologists Historians of science and general readers interested in biographies science and history will enjoy this compelling biography The Wardian Case Luke Keogh,2023-01-05 In 1829 surgeon and amateur naturalist Nathaniel Bagshaw Ward discovered that plants enclosed in airtight glass cases could survive for long periods without watering After four years of growing plants under glass in his London home Ward created traveling glazed cases that he hoped would be able to transport plants around the world After a test run from London to Sydney Ward was proven correct and the Wardian case was born It is easy to forget in our technologically advanced and globalized world but prior to the invention of the case it was extremely difficult to transfer plants around the globe as they often died from mishandling cold weather or salt from the ocean In this enthralling book Luke Keogh takes us around the world and through history with the Wardian case He shows that this revolution in the movement of plants transformed the world impacting the commercial nursery trade late nineteenth century imperialism and the global environment The repercussions of this revolution are still with us today **European Encounters with the Yamana People of Cape Horn, Before and After Darwin** Anne Chapman,2010-04-19 A narration of dramas played out from 1578 to 2000 in Tierra del Fuego by the native Yamana Darwin explorers sealers whalers and missionaries
