The Berlin Enigma D. F. Harrington, 2017-11-22 As John Harrington grew older he sat down with his daughter to share the story of his life What she learned made her rethink the man who had raised her The tale begins with his childhood in the Australian outback and follows his immigration to England and enrollment in the British forces in 1914 After being injured in France he is hired by the British Foreign office which sends him to Berlin as a passport clerk in the 1930s For the next ten years he lives in a world of intrigue and espionage as the Nazi regime grows stronger around him This is a compelling inside look at the rise of Nazism in the 1930s from subtle changes in the people's everyday behaviour to Hitler's sinister consolidation of power It is an eyewitness account of an era we all read about but rarely experience with such a personal touch Having promised not to release the story until after his passing Darlene Harrington now shares her father's remarkable life which will change the way we understand the Second World War and the impact one person can have on history

Sustainable Communities and Green Lifestyles Tendai Chitewere, 2017-08-09 Sustainable communities raise questions about the compatibility of capitalism and environmentalism and how we can green our way of life in a capitalist economy that values short term production and consumption over long term conservation and simple living If capitalism and its drive towards consumption has produced social and environmental degradation is it the best medium to identify solutions Sustainable Communities and Green Lifestyles examines one ecovillage as it attempts to create a sense of community while

reducing its impact on the natural environment Through extensive participant observation the book demonstrates how ecovillages are immersed within a larger discourse of class race and lifestyle choices highlighting the inseparability of environmental sustainability and social justice Sustainable communities are confronted by the contradictions of green consumption and must address social inequality or risk focusing inward on personal green consumerism creating mere green havens for the few who can afford to live in them This book cautions of redirecting environmentalist efforts away from structural solutions and onto personal environmentalism offers a critical perspective on the challenges of an emerging green lifestyle This book offers a critical perspective on the direction of US environmentalism and contributes to debates in environmental studies anthropology and urban planning
