Moseley,Matthew A. Schnurr,Rachel Bezner-Kerr,2017-10-02 This volume

examines the dominant neoliberal agenda for agricultural development and hunger alleviation in Africa The text reviews the history of African agricultural and food security policy in the post colonial period across a range of geographical contexts in order to contextualise the productionist approach embedded in the much heralded New Green Revolution for Africa This strategy supported by a range of international agencies promotes the use of hybrid seeds fertilisers and pesticides to boost crop production This approach is underpinned by a new and unprecedented level of public private partnerships as donors actively work to promote the private sector and build links between African farmers input suppliers agro dealers agro processors and retailers On the consumer end increased supermarket penetration into poorer neighbourhoods is proffered as a solution to urban food insecurity The chapters in this volume complicate understandings of this new approach and raise serious questions about its effectiveness as a strategy for increasing food production and alleviating poverty across the continent This book is based on a special issue of African Geographical Review

Agriculture, Diversification, and Gender in Rural Africa Agnes Andersson Djurfeldt, Fred Mawunyo Dzanku, Aida C. Isinika, 2018 This book contributes to the understanding of smallholder agriculture in sub Saharan Africa through addressing the dynamics of intensification and diversification within and outside agriculture in contexts where women have much poorer access to agrarian resources than men

The Give and Take of Sustainability Michelle Hegmon, 2017-04-24 Sustainability strives to meet the needs of the present without compromising the future but increasingly recognizes the tradeoffs among these many needs Who benefits Who bears the burden How are these difficult decisions made Are people aware of these hard choices This timely volume brings the perspectives of ethnography and archaeology to bear on these questions by examining case studies from around the world Written especially for this volume the essays by an international team of scholars offer archaeological and ethnographic examples from the southwestern United States the Maya region of Mexico Africa India and the North Atlantic among other regions Collectively they explore the benefits and consequences of growth and development the social costs of ecological sustainability and tensions between food and military security

Innovations as Key to the Green Revolution in Africa Andre Bationo, Boaz Waswa, Jeremiah M. Okeyo, Fredah Maina, Job Maguta Kihara, 2011-08-30 Africa can achieve self sufficiency in food production through adoption of innovations in the agriculture sector Numerous soil fertility and crop production technologies have been generated through research however wide adoption has been low African farmers need better technologies more sustainable practices and fertilizers to improve and sustain their crop productivity and to prevent further degradation of agricultural lands The agricultural sector also needs to be supported by functional institutions and policies that will be able to respond to emerging challenges of globalization and climate change

The Smoke of London William M. Cavert, 2016-04-07 The Smoke of London uncovers the origins of urban air pollution two centuries before the industrial revolution By 1600 London was a fossil fuelled city its high sulfur coal a basic necessity for the

poor and a source of cheap energy for its growing manufacturing sector The resulting smoke was found ugly and dangerous throughout the seventeenth and eighteenth centuries leading to challenges in court suppression by the crown doctors attempts to understand the nature of good air increasing suburbanization and changing representations of urban life in poetry and on the London stage Neither a celebratory account of proto environmentalism nor a declensionist narrative of degradation The Smoke of London recovers the seriousness of pre modern environmental concerns even as it explains their limits and failures Ultimately Londoners learned to live with their dirty air an accommodation that reframes the modern process of urbanization and industrial pollution both in Britain and beyond [Corn](#) Michael Owen Jones,2017-09-15

Originating in Mesoamerica 9 000 years ago maize or as we know it corn now grows in 160 countries In the New World indigenous peoples referred to corn as Our Mother Our Life and She Who Sustains Us Today the United States is the world s leading producer of corn and you can find more than 3 500 items in grocery stores that contain corn in one way or another from puddings to soups margarine to mayonnaise In *Corn A Global History* Michael Owen Jones explores the origins of this humble but irreplaceable crop The book traces corn back to its Mesoamerican roots following along as it was transported to the Old World by Christopher Columbus and then subsequently distributed throughout Europe Africa and Asia Jones takes readers into the deliciously disparate culinary uses of corn including the Chilean savory pie pastel de choclo Japanese corn soup Mexican tamales a Filipino shaved ice snack and the South African cracked hominy dish umngqusho favored by Nelson Mandela Covering corn s controversies celebrations and iconic cultural status Jones interweaves food folklore history and popular culture to reveal the vibrant story of a world staple *Teaching American History in a Global Context* Carl J.

[Globalization](#) Jane Hooper,2017-05-15 Between 1600 and 1800 the promise of fresh food attracted more than seven hundred English French and Dutch vessels to Madagascar Throughout this period European ships spent months at sea in the Atlantic and Indian Oceans but until now scholars have not fully examined how crews were fed during these long voyages Without sustenance from Madagascar European traders would have struggled to transport silver to Asia and spices back to Europe Colonies in Mozambique Mauritius and at the Cape relied upon frequent imports from Madagascar to feed settlers and slaves

In *Feeding Globalization* Jane Hooper draws on challenging and previously untapped sources to analyze Madagascar's role in provisioning European trading networks within and ultimately beyond the Indian Ocean. The sale of food from the island not only shaped trade routes and colonial efforts but also encouraged political centralization and the slave trade in Madagascar. Malagasy people played an essential role in supporting European global commerce with far-reaching effects on their communities. *Feeding Globalization* reshapes our understanding of Indian Ocean and global history by insisting historians should pay attention to the role that food played in supporting other exchanges. [Congotay! Congotay! A Global History of Caribbean Food](#) Candice Goucher, 2014-12-18 Since 1492 the distinct cultures, peoples and languages of four continents have met in the Caribbean and intermingled in wave after wave of post-Columbian encounters with foods and their styles of preparation being among the most consumable of the converging cultural elements. This book traces the pathways of migrants and travellers and the mixing of their cultures in the Caribbean from the Atlantic slave trade to the modern tourism economy. As an object of cultural exchange and global trade, food offers an intriguing window into this world. The many topics covered in the book include foodways, Atlantic history, the slave trade, the importance of sugar, the place of food in African-derived religion, resistance, sexuality and the Caribbean kitchen, contemporary Caribbean identity and the politics of the new globalisation. The author draws on archival sources and European written descriptions to reconstruct African foodways in the diaspora and places them in the context of archaeology and oral traditions, performance arts, ritual, proverbs, folktales and the children's song game *Congotay*. Enriching the presentation are sixteen recipes located in special boxes throughout the book.

History of Rabies in the Americas: From the Pre-Columbian to the Present, Volume I Charles E. Rupprecht, 2023-04-24 Rabies is one of the oldest known pathogens, is incurable and has the highest fatality rate of all infectious diseases. The Americas is the only region with bat rabies virus, including vampire bat rabies. The region is rich in cultural references and notable for many discoveries in the field, including the current vaccine potency test, diagnostic assay, conception of oral vaccines for wildlife, the first human survivor and the first successful canine rabies program executed at a broad level. Rabies remains the most important viral zoonosis with tens of thousands of human fatalities and tens of millions of exposures annually, which can be used to model for other pathogens such as COVID-19. There is an international effort to eliminate human rabies caused by dogs over the next decade and the Americas represent the primary region with the greatest proof of concept evidence to accomplish this goal. This two-volume set addresses the medical history and modern results of rabies in countries throughout the Americas, including the implications of and on cultural, economic, sociological and research developments in the region. Volume I presents an overview of concepts critical to the study of rabies in the region, including evolutionary aspects, reservoir ecology and control, elimination efforts, vaccine development and disease hallmarks and progression. It also analyzes the long-term cultural, social and economic impacts of the disease in the Americas. [Under Osman's Tree](#) Alan Mikhail, 2019-03-08 Osman, the founder of the Ottoman Empire, had a dream in which a tree sprouted from

his navel As the tree grew its shade covered the earth as Osman s empire grew it too covered the earth This is the most widely accepted foundation myth of the longest lasting empire in the history of Islam and offers a telling clue to its unique legacy Underlying every aspect of the Ottoman Empire s epic history from its founding around 1300 to its end in the twentieth century is its successful management of natural resources Under Osman s Tree analyzes this rich environmental history to understand the most remarkable qualities of the Ottoman Empire its longevity politics economy and society The early modern Middle East was the world s most crucial zone of connection and interaction Accordingly the Ottoman Empire s many varied environments affected and were affected by global trade climate and disease From down in the mud of Egypt s canals to up in the treetops of Anatolia Alan Mikhail tackles major aspects of the Middle East s environmental history natural resource management climate human and animal labor energy water control disease and politics He also points to some of the ways in which the region s dominant religious tradition Islam has understood and related to the natural world Marrying environmental and Ottoman history Under Osman s Tree offers a bold new interpretation of the past five hundred years of Middle Eastern history
