Handbook of Clinical Behavioral Pediatrics Alan M. Gross, Ronald S. Drabman, 2013-03-07 Since 1978 the editors have collaborated on several research projects and spent many hours at conventions discussing research graduate education and patient care The idea for this volume arose when we both

concluded that the area of behavioral pediatrics needed a how to book Several important scholarly reviews had recently appeared They presented excellent summary information concerning the general assumptions and theories underlying the area of behavioral medicine with children But these volumes devote very little attention to the application of clinical methods What was needed we thought was a book that would allow graduate students and practicing clinicians the opportunity to peer into the minds of eminent practitioners and understand their thinking Thus the book was conceived Editing books represents a special kind of challenge One has to sell an idea to a group of distinguished colleagues They have to believe enough in that idea to devote the considerable time and effort necessary to bring thought into reality In this case there were two ideas we tried to sell to our colleagues

Supportive Care in Cancer Therapy Donald J. Higby, 2012-12-06 Where do you begin to look for a recent authoritative article on the diagnosis or management of a particular malignancy The few general oncology textbooks are generally out of date Single papers in specialized journals are informative but seldom comprehensive these are more often preliminary reports on a very limited number of patients Certain general journals frequently publish good indepth reviews of cancer topics and published symposium lectures are often the best overviews available Unfortunately these reviews and supplements appear sporadically and the reader can never be sure when a topic of special interest will be covered Cancer Treatment and Research is a series of authoritative volumes which aim to meet this need It is an attempt to establish a critical mass of oncology literature covering virtually all oncology topics revised frequently to keep the coverage up to date easily available on a single library shelf or by a single personal subscription We have approached the problem in the following fashion First by dividing the oncology literature into specific subdivisions such as lung cancer genitourinary cancer pediatric oncology etc Second by asking eminent authorities in each of these areas to edit a volume on the specific topic on an annual or biannual basis Each topic and tumor type is covered in a volume appearing frequently and predictably discussing current diagnosis staging markers all forms of treatment modalities basic biology and more

E. Murdoch, 2011-03-01 **Radiation Therapy in Pediatric**

Oncology J. Robert Cassady, 2012-12-06 The diagnosis of cancer in a child is a devastating finding not only to the parents but often to the child Even though the situation is relatively easy to accept among adults it is difficult to accept among children because of their general helpless state The advances that have been made in the management of a child with cancer in the last 20 years have been dramatic in character These have occurred not only by virtue of the contributions from early diagnosis and more precise staging but also from the contributions made by surgery radiation therapy and the more widespread utilization of chemotherapy regimens This volume by J Robert Cassady sets forth the position of radiation oncology in the management of the child with cancer Radiation therapy remains an important and significant part of the treatment of this group of diseases The book presents the basic knowledge with regards to pediatric oncology and how it relates to radiation therapy It gives a timely overview on the topic and is essential for all radiation oncologists involved in the management of children with cancer Hamburg Philadelphia June 1994 H P HEILMANN LUTHER W BRADY Preface This book provides a thorough review of the role that radiation therapy currently plays in the management of most childhood tumors Extensively augmented with figures and tables where appropriate it also provides a concise review of current diagnostic and therapeutic approaches for major childhood malignancies Extensive and up to date reference lists are an added benefit *Handbook of Depression in Children and Adolescents* William M. Reynolds, Hugh F. Johnston, 2013-11-22 Anyone who has ever been close to a seriously depressed child has undoubtedly been affected by the youngster's vulnerability misery and pain Indeed it is much like caring for a child who is in physical pain For the child in the depths of depression no activity is fun nothing can be enjoyed and no one can provide enough consolation or comfort At times the youngster may cry or whimper There may be fits of defiance or rage and sometimes withdrawal into a numb sullen silence A

child in this state tries the patience of parents and siblings Remedies of every sort are tried including gifts punishments bribes lectures pleading and a host of others Such efforts occasionally provide temporary relief but more often they seem to make matters worse Commonly there is an emotional wall of anger and frustration between a depressed child and other family members that may inevitably lead to further isolation and withdrawal If too much time passes without their being helped many depressed children and adolescents come to believe that suicide offers the only real relief for their pain Currently there is a Depression Awareness Week that includes free screening at participating health and mental health settings around the United States and is designed to identify depression in adults suggesting that society's awareness of depression and psychiatric disorders is focused to a large extent on adults The Cancer Patient and Supportive Care Donald J. Higby, 2012-12-06 During the course of editing Supportive Care in Cancer Therapy Martinus Nijhoff Publishers 1983 it became apparent that several topics would have to await a second volume Furthermore development of new information and evolution of ideas continues This volume continues the intent of the first to present reviews of issues relating to supportive care and to identify areas where further definition and further research is needed The physician reading this volume will find the contents though provoking In addition to reviews authored by physicians there are chapters authored by non physicians who present a different perspective and a different style of writing Reverend Bigler writes from his long experience as a chaplain for cancer patients and tries to identify the changes that take place in the personality of the chaplain who works with dying patients Ms Kil lion and Ms Powell try to describe what an Oncology Nurse is rather than what one does Attorneys Reese and Price present a very practical summation of issues which face the cancer patient and their chapter could easily be copied and offered to one's patients furthermore this chapter gives direction to the physician who is frequently called upon for advice regarding issues which lie entirely outside his/her formal training Excellent reviews on more medical subjects are here Cancer in the Elderly should provoke oncologists to re-examine their approach to the geriatric patient **Women in pediatric oncology vol II: 2022** Yong-mi Kim, Joanna Kitlinska, 2023-07-21
