Invisible Digital Aylish Wood,2024-01-11 Invisible Digital helps us makes sense of something we cannot see by presenting an innovative approach to digital images and digital culture At its heart is a novel method for exploring software used in the creation of moving images as markers of converging cultural organizational and technological influences The three main case studies of Invisible Digital are the animated feature Moana 2016 and the computer games No Man s Sky 2016 and Everything 2017 All three were created using procedural techniques simulation software for Moana and procedural content generation for No Man s Sky and Everything Production culture disclosures associated with procedural techniques often emphasize the influences of automated systems and their algorithms making them ideal for a study that

interrogates digital processes The approach of Invisible Digital is informed by relational theories and the concept of entanglement based on materialist perspectives combined with insights from work that more explicitly interrogates algorithms and algorithmic culture Aylish Wood employs the notion of assemblages to introduce the concept of material cultural narratives Using this conceptual framework she draws out material cultural narratives for each case study to demonstrate what they reveal about software and digital culture These analyses of software provide a widely applicable method through which moving image studies can contribute more fully to the wider and growing debates about algorithmic culture

Make a Splash Alison Bell, *Soil Erosion* Jürgen Schmidt, 2013-11-11 Accelerated degradation of soils and surface waters produce increasing problems in many parts of the world Within this context the book addresses the topic Application of Physically Based Soil Erosion Models in order to present some essential tools for improving land use strategies and conservation measures Over the last 20 years the need for more accurate assessments of soil losses and sediment yields has led to the development of some highly complex process based soil erosion models In 14 papers specialists from 5 European countries the USA and Brazil report on practical applications of these models and give insight into the latest developments This book will help to implement state of the art soil erosion prediction technologies within soil and water conservation planning and assessment Hence the book should be of special interest to agricultural and environmental engineers hydrologists soil scientists and geoscientists
