Makers Of The Media Mind Journalism Educators And Their Ideas:

Makers of the Media Mind Wm. David Sloan, 2014-07-10 Makers of the Media Mind is a collection of analytical essays focusing on the most important and original ideas contributed to the field of mass communication by journalism educators. Divided into six sections representing the most prominent areas of specialization in the field, this text serves two significant purposes: first, it acquaints readers with the lives of preeminent journalism educators; second, it provides concise discussions and evaluations of the most compelling ideas those educators have to offer. The editor and contributors to this text contend that ideas cannot be appreciated fully without an understanding of the creators of those same ideas. They hope that this volume's coverage of creators as well as concepts will demonstrate that journalism education has played a critical role in the making of the media mind.

The A to Z of Journalism Ross Eaman, 2009-10-12 Journalism is the discipline of gathering, writing, and reporting news, and it includes the process of editing and presenting news articles. Journalism applies to various media, including but not limited to newspapers, magazines, radio, television, and the internet. The word journalist started to become common in the early 18th century to designate a new kind of writer about a century before journalism made its appearance to describe what those writers produced. Though varying in form from one age and society to another, it gradually distinguished itself from other forms of writing through its focus on the present, its eye-witness perspective, and its reliance on everyday language. The A to Z of Journalism relates how journalism has evolved over the centuries. This is done through a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries on the different styles of journalism, the different types of media, and important writers and editors.

Journalism in the United States Edd Applegate, 2011-05-19 Print and broadcast journalism in the United States have changed in recent years as a result of millions of people using the Internet and social media for obtaining some or most of the information they desire. So notes professor of journalism Edd Applegate, who after surveying the decline in circulation and advertising revenues of newspapers and broadcast and radio news stations and the rise of cable news and website journalism, outlines in *Journalism in the United States: Concepts and Issues* the effect of this sea of change on key matters in journalism today. In this work, Applegate updates readers on the current conditions of the print and broadcast industries with chapters on a variety of topics: from theories of the press to the structure of the print and broadcast industries; from the role of advertising and public relations to the role of the changing view of the press; views of and commitments to objectivity and news balance. Throughout, Applegate obliges readers to wrestle with how the change in medium from print or broadcast to Web is not the main culprit in how the news has changed. Instead, he illustrates how many of the core issues remain unchanged and what is needed is a more complex analysis of core concepts and issues and how these have been affected from freedom of the press to the treatment of minorities by the evolution of news as a business and the education of journalists today for that business. With a selected bibliography and an index to assist the reader, this book is a wonderful text for upper-level undergraduates, graduates, and

college faculty with journalism or mass communications courses as well as for academic libraries *Encyclopedia of American Journalism* Stephen L. American girls and young women the other in Athens and attended by young white women with elite backgrounds Focusing on the period between 1880 and 1925 Case s analysis shows how race gender sexuality and region worked within these institutions to shape education Her comparative approach shines a particular light on how female education embodied the complex ways racial and gender identity functioned at the time As she shows the schools cultivated modesty and self restraint to protect the students Indeed concerns about female sexuality and respectability united the schools despite their different student populations Case also follows the lives of the women as adult teachers alumnae and activists who drew on their education to negotiate the New South s economic and social upheavals Women and Journalism Deborah

taking place in media education for educators and administrators in comm depts **Media Ethics and Accountability Systems** Claude-Jean Bertrand,2018-04-17 Over the last few years the O J Simpson case then the Lewinsky Clinton affair and scores of minor scandals have dominated the US press often taking precedence over important domestic and international issues This tabloidization of the news media both here and abroad has proved that the market cannot insure media quality In a democracy for media to function well they must be free of both political and economic muzzling The only solution is to add self regulation or quality control by professionals and public to the other two forces the market and state regulation In this controversial volume Claude Jean Bertrand sets out to define a set of accountability systems democratic efficient and harmless to insure true freedom and quality of media This brief highly literate volume focuses not on philosophical

foundations of media ethics or case stories but on what is now missing in the codes Many books deal with media ethics but few deal with accountability Media Ethics and Accountability Systems zeroes in on the many nongovernmental methods of enforcing quality control and on the difficulty of getting the media microcosm to accept such accountability To remedy this lack Bertrand proposes rethinking existing media accountability systems some 30 to 40 in number and creation of new ones He observes that existing systems are rooted in four basic approaches training the education of citizens in media use and the incorporation of ethics courses in journalistic education evaluation criticism positive and negative not only from politicians consumerists and intellectuals but from media professionals themselves monitoring by independent academic experts over extended periods of time into the long term effects and feedback giving ear to the various segments of media users and their needs and tastes rather than scrutinizing sales and ratings Media Ethics will be of particular interest to academics in the fields of communication and journalism as well as to the general reader with an interest in public issues and a civic concern for society

Education for Democracy

Chad Alan Goldberg, 2020-11-17 American public universities were founded in a civic tradition that differentiated them from their European predecessors steering away from the pursuit of knowledge for its own sake Like many such higher education institutions across the United States the University of Wisconsin's mission known as the Wisconsin Idea emphasizes a responsibility to serve the needs of the state and its people This commitment which necessarily requires a pledge to academic freedom has recently been openly threatened by state and federal actors seeking to dismantle a democratic and expansive conception of public service Using the Wisconsin Idea as a lens Education for Democracy argues that public higher education institutions remain a bastion of collaborative problem solving Examinations of partnerships between the state university and people of the state highlight many crucial and lasting contributions to issues of broad public concern such as conservation LGBTQ rights and poverty alleviation The contributors restore the value of state universities and humanities education as a public good contending that they deserve renewed and robust support *Journalism Standards of Work Today* Stephen A. Banning, 2020-09-02 This research examines journalism ethics to answer the questions of whether we still need journalism ethics in the twenty first century if it is possible to exercise journalistic standards of work and if so on what values should these ethics be based in a world much different from that which existed when the first journalism codes of ethics were formulated in the nineteenth and early twentieth centuries To distill the motivations and essence of the early journalistic standards of work the book discusses the function of media in a democracy and the formation of mass media during the first industrial revolution as well as its consequential change in journalists' locus of control and how journalists self identified The sudden creation of mass media pushed some journalists to create ethical principles which would guide the newly empowered press an effort which culminated in the creation of the first national code of journalistic ethics in 1923 The book closely examines the elements of the 1923 Canons of Journalism finding them to contain timeless values despite their original application to now dated technology It highlights the basic elements and applies them to media today in a way that interfaces with new technology without abandoning the essential components of equipping citizens for representative governance *Biographical Dictionary of Modern American Educators* Shirley Ohles, Frederik Ohles, John Ramsay, 1997-10-28 Widely praised Greenwood's Biographical Dictionary of American Educators Greenwood 1978 quickly became a standard reference work for students and scholars of American education This new volume includes biographical sketches of more than 400 notable researchers leaders reformers critics and practitioners from all major fields of education and extends the coverage of its predecessor to the mid 20th century Its topical range encompasses such diverse areas as psychology music health measurement and evaluation science special education history and administration It treats education at all levels including early childhood elementary and secondary higher and adult Most of the educators profiled were active in the 20th century but several dozen have been included from the 19th century A special effort has been made to include women and educators of color whose contributions have often been overlooked in the past Each biographical
