Making Globalisation Hc:

Education in Global Health Policy Making and Management Eduardo Missoni, Fabrizio

Tediosi, 2013-11-17T00:00:00+01:00 Global health has been increasingly recognized as a key element of sustainable development. The recent increase in the number of public and private global health actors and the complex global governance for health boosted the need for professionals who combine a thorough understanding of health related challenges with multidisciplinary training in social sciences, economics and management. In the past few years this has led not only to the mushrooming of courses dedicated to global health but also academic degrees in global health. By reviewing a recent attempt to innovate the educational offerings in global health policy and management by a consortium of academic institutions in Italy, the book analyzes the recent trends in global health education. The book concludes that while global health and development is certainly an emerging area in the higher education systems of many countries, international offerings in graduate programs are still highly dominated by those taught in medical schools, often failing to combine health sciences with economic, social and management sciences. The multidisciplinary nature of global health education programs should be improved.

Health Equity, Social Justice and Human Rights Fiona McKay, Ann Taket, 2020-04-28 Important links between health and human rights are increasingly recognised and human rights can be viewed as one of the social determinants of health. A human rights framework provides an excellent foundation for advocacy on health inequalities, a value based alternative to views of health as a commodity and an opportunity to move away from public health action being based on charity. This text demystifies systems set up for the protection and promotion of human rights globally, regionally and nationally. It explores the use and usefulness of rights based approaches as an important part of the toolbox available to health and welfare professionals and community members working in a variety of settings to improve health and reduce health inequities. Global in its scope, *Health Equity, Social Justice and Human Rights* presents examples from all over the world to illustrate the successful use of human rights approaches in fields such as HIV/AIDS, improving access to essential drugs, reproductive health, women's health and improving the health of marginalised and disadvantaged groups. Understanding human rights and their interrelationships with health and health equity is essential for public health and health promotion practitioners as well as being important for a wide range of other health and social welfare professionals. This text is valuable reading for students, practitioners and researchers concerned with combating health inequalities and promoting social justice.

Negotiating And Navigating Global Health: Case Studies In Global Health Diplomacy Ellen Roskam, Ilona Kickbusch, 2011-12-28 Diplomacy is undergoing profound changes in the 21st century and global health is one of the areas where this is most apparent. The negotiation processes that shape and manage the global policy environment for health are increasingly conducted not only between public health experts representing health ministries of nation states but include many other major players at the national level and in the global arena. These include philanthropists and public

private players As health moves beyond its purely technical realm to become an ever more critical element in foreign policy security policy and trade agreements new skills are needed to negotiate global regimes international agreements and treaties and to maintain relations with a wide range of actors The intent of this book is to provide learning tools for today s broad group of new health diplomats in the landscape of this ever shifting complex technical and political arena The case studies are told as the negotiations were experienced by individuals who participated in the various debates dialogues negotiations or by experts who have studied them This collection fills an important gap in both knowledge and practice providing insight on how negotiations on global health issues have transpired the successes challenges failures tools and frameworks for negotiation mechanisms of policy coherence ways to achieve global health objectives internationally and how global health diplomacy used as a foreign policy tool can improve relations between nations

Globalisation Great Britain: Parliament: House of Commons: Treasury Committee,2007-10-16 Globalisation is having an enormous impact on the UK s economy creating significant challenges for policy making with the shift in economic power from West to East particularly the rise of China and India in the global economy The effects will be on felt on highly skilled jobs as well as some less skilled employment and public policy needs to respond to the likely implications for the labour market The Committee s report considers domestic policy challenges relating to the promotion of innovation and improving the business environment and the skills base in the economy and issues discussed include the drivers of globalisation trade and protectionism global imbalances as well as the beneficial and adverse effects of globalisation for the UK economy The Committee recommends that in order to promote understanding of the impact of globalisation on jobs and communities the Government should publish an annual review of new developments affecting the impact of and prospects for globalisation Given that protectionist sentiment is increasing posing a threat to the progress of both developed and developing countries the Committee supports the Government s promotion of a successful conclusion to the Doha trade round Globalisation is also threatened by the risk of a disorderly unwinding of global imbalances and the success of a reformed International Monetary Fund will be judged by its performance in ensuring global imbalances are properly addressed
