Making Globalization Good The Moral Challenges Of Global Capitalism:

Making Globalization Good John H. Dunning, 2004-09-16 Table of contents **Making Globalization Good** John H. Dunning, 2004-09-16 Gordon Brown Jonathan Sacks Joseph Stiglitz Hans Kung Shirley Williams and a dozen other leading thinkers in international business and ethics identify the pressing moral issues which global capitalism must answer How can we develop a global economic architecture which is efficient morally acceptable geographically inclusive and sustainable over time If global capitalism arguably the most efficient wealth creating system currently known to man is to be both economically viable and socially acceptable each of its four constituent institutions markets governments supranational agencies and civil society must not only be technically competent but also be buttressed and challenged by a strong moral ethos The book includes contributions from leading academics politicians and moralists Recognizing that solutions will not come from any one quarter and that any serious discussion of a just and equitable system will touch on questions of ethics and faith the book approaches the issues from a range of different disciplines and forums **Education in the Era of**

Globalization Klas Roth, Ilan Gur-Ze'ev, 2007-10-11 Education seems to have lost its orientation in Western culture and is in disarray all over the globe in time of global transitions Globalizing capitalism is the general headline for some of the most profound deep and dramatic developments in our era that education must address The response of educationalists is only in its beginning and there is an urgent need to address the dramatic changes inflicted on promised to our era philosophically sociologically culturally ecologically physically aesthetically and politically In the proposed book we try to address the challenge of globalization to education in the broadest sense of the concept of education by treating this challenge in various perspectives through different disciplines and topics within which the challenge of globalization is conceived as the most profound dynamic of this historical moment a development that is realized in many diverse and different levels fields and spaces of human and natural existence The various texts in this collection written by some of the famous and interesting scholars in the field of philosophy of education and the sociology of education try to address the richness and diversity of the challenge of globalization It tries to reconstruct historically sociologically and philosophically the roots the practices and the fruits of globalization as a threat and as a gateway for new possibilities for today's education The collection is a meeting point for research that is not only analytical and critical but also offers new roads and possibilities for education in the 21st century in face of globalization As such this collection is unique in this field and opens the door for further research and public discussion on the future role of education **New Challenges for International Business Research** John H.

Dunning, 2010-01-01 In this final collection of his essays John Dunning looks back on more than 40 years of research in International Business IB whilst at the same time considering possibilities for the future Is there a way to sustainable investment? Katja Treichel, 2008-07-17 Inhaltsangabe Introduction The issue of foreign direct investment FDI as one of the key features of globalisation continues to attract widespread attention particularly since its rapid increase in the last decade

While some see FDI as a panacea for overcoming poverty others point precisely to the opposite and recall the negative image often connected to multinational corporations MNCs embodied in child labour environmental catastrophes and exploitation of cheap work force Opinions on the benefits of FDI for development differ considerably but so does the observed reality In some countries FDI has in fact contributed to economic progress and fallen poverty rates Other countries by contrast have not been able to reap the repeatedly praised fruits of investment flows such as job creation and technological spillovers or did not even attract significant amounts of FDI But in the highly inter dependent and inter connected world that we live in now extreme views cannot and should not set the tone for future debates Neither the retreat into isolated and protectionist patterns nor the advocacy of a downright neo liberal credo seem to be viable options For one thing FDI has outstripped official development aid in numbers and no single country has lifted itself out of poverty in the last 50 years without integrating into the world market For another simple liberalisation measures have not always increased FDI flows into host developing countries and where they did FDI flows have not automatically brought with them the desired benefits for development The term development should be understood in a sustainable sense and thus goes far beyond the rise of the gross national product per capita It means according to the frequently quoted Brundtland report development that meets the needs of the present without comprising the ability of future generations to meet their own needs Without neglecting the importance of raising income levels it puts special emphasis on enhancing the skills and competencies of people who should harness and shape their ecological economic and social environment in sustainable ways Crucial with this understanding of development is on one hand its long term perspective and on the other the interplay between the economic social and environmental dimension both making any action oriented towards development a highly complex matter As a consequence the presumption that all kinds of investment flows

Grace and Global Justice Richard Gibb, 2006-10-18 What does it mean for the twenty first century church to conceive of itself as a community defined by the covenant of grace Grace and Global Justice explores the ramifications of this central Christian doctrine for the holistic mission of the church in the context of a globalized world

Smart Governance Helmut Willke, 2007 Offers a different perspective on global governance from the vantage point of a global knowledge society Employing a case study of the global financial system and an analysis of several governance regimes this work contends that markets legal systems and morality must evolve to cope with uncertainty build capacities and achieve resilience

Religion in International Politics and Development J. A. Rees, 2011 This unique and fascinating book illustrates that in moving the research agenda forward despite whatever methodological pitfalls that may await in the attempt the dynamics of religion must now be considered to be of central and abiding importance in the study of world politics An illuminating case study of the World Bank's engagements with religion faith communities institutions and social movements provides insights into the current discourse on religion in international relations John A Rees argues that religion is of equal importance to other structures of international relations IR and questions where religion is operating in

world politics rather than what religion is in an essential sense He constructs a new model for differentiating three distinct discourses of religion in the theory and practice of world politics which he applies to the IR sphere of international development and encourages new thinking in the field by answering conceptual and methodological challenges in religion research This book will prove an enlightening point of reference for academics and researchers in the fields of religion world politics international relations and development studies as well as for international organisations development theorists and practitioners working in conjunction with faith based organisations

Redefining Human Rights in the Struggle for Peace and Development Terrence E. Paupp, 2014-01-20 Examines the history of the struggle to advance human rights and provides a global framework of constitutional protections to implement these rights

Human Resource Management Jawad Syed, Robin Kramar, 2017-04-26 The fully revised and updated second edition of this core textbook builds on the previous edition's success to bring an even sharper exploration of HRM in a real world global context With a critical approach that is woven into the chapters and encourages students to question assumptions in HRM there is a consistent focus on the impact of globalization the ways in which theory has addressed the implications of a globalized workforce and the way HRM works in multinational corporations Boasting a truly global orientation this textbook draws on the expert knowledge of chapter authors from around the world combining international case studies with a strong offering of pedagogical features While adopting a rigorous academic approach the book is also designed to engage students and elicit independent thought This is an ideal core textbook for undergraduate and postgraduate students studying on general business and management degrees specialist HRM degrees and international business degrees In addition this an important supplementary text for International HRM modules and HRM modules on MBA programmes New to this Edition Brand new chapters on Talent Management International Assignments Managing Global and Migrant Workers and Sustainable HRM Revised and refreshed international case studies including an array of examples from diverse non western regions of the world HRM in the news boxes comprising issues from the media that are relevant to each chapter topic Stop and reflect boxes containing thought provoking questions that encourage critical thinking

A Strategic and Tactical Approach to Global Business Ethics, Second Edition Lawrence A. Beer, 2015-01-12 The inclusion of ethically driven elements into the strategic planning process of multinational corporations MNCs is an emerging consideration in the modern era of globalization Firms pursuing cross border activities in any capacity and to whatever degree or scale are increasingly coming into contact with differences in morally applied decision making that affects their operational success and sustainability The choices made require the use of clear and unambiguous codes of conduct for embedded managers abroad The implementation of a properly administered code coupled with a program of corporate social responsibility CSR can add value to a company while its misapplication or exclusion can diminish value

Handbook of Islamic Marketing Özlem Sandıkcı, Gillian Rice, 2011-01-01 This is an especially timely publication given the current metamorphosis of politics in the Middle East and North Africa

and Gillian Rice are to be congratulated for having sensed the need for a Handbook that will alert marketers to the vast market opportunities offered by Muslim consumers. It is essential to become attuned to the values and principles of Islamic cultures that will drive consumption product and service choices, brand preference and brand loyalty in coming years. The scholars who have contributed to this Handbook come from many different backgrounds to offer a kaleidoscope of research and recommendations on how best to serve this previously overlooked segment of consumers who make up a quarter of world markets.

Lyn S Amine, Saint Louis University, US: This ambitious and timely collection will be enormously valuable to readers in the practice and study of the growing field of Muslim marketing and branding. Essays range expertly across key sectors, notably finance, food and fashion, and territories of Muslim majority and minority population. Contributors elaborate the diversity of Muslim experiences, beliefs and practices that must be taken into account by marketing professionals seeking to exploit this newly recognized market. Academic authors provide helpful postscripts for marketers making clear the links between their nuanced, historicized understanding of contemporary transnational, global and local forms of Muslim identity and practice. This book provides an essential guide to those who study and those who participate in Muslim branding and marketing.

Reina Lewis, London College of Fashion, UK: The Handbook of Islamic Marketing provides state of the art scholarship on the intersection of Islam, consumption and marketing and lays out an agenda for future research. The topics covered by eminent contributors from around the world range from fashion and food consumption practices of Muslims to retailing, digital marketing, advertising, corporate social responsibility and nation branding in the context of Muslim marketplaces. The essays offer new insights into the relationship between morality, consumption and marketing practices and discuss the implications of politics and globalization for Islamic markets. This comprehensive Handbook provides an essential introduction to the newly emerging field of Islamic marketing. It is invaluable for researchers and students in international marketing who are interested in the intersection of Islam and marketing as well as those from anthropology and sociology studying Muslim consumers and businesses. The book also supplies vital knowledge for Muslim and non-Muslim business leaders generating commerce in Islamic communities.

Leadership for Environmental Sustainability, Benjamin W. Redekop, 2010-07-02: As the first book in the field of leadership studies to approach sustainability as a multi-faceted leadership challenge, *Leadership for Environmental Sustainability* will help to set the terms of the discussion on this topic among students, scholars and practitioners of leadership for years to come. It explores the connection between leadership and sustainability from a variety of disciplinary perspectives including sociology, history, psychology, business literature, communication and the arts. With short chapters edited for readability, the book is aimed at scholars, practitioners, students and educated lay readers interested in cutting edge research and thinking on this topic.

A Strategic and Tactical Approach to Global Business Ethics, Lawrence A. Beer, 2010-04-18: Ethics is a compendium of moral interpretations steeped in a multitude of religious and philosophical applications. It is subject to various cultural intrusions as well as independent

personal interpretation The study of international business and all related managerial disciplines usually includes ethical content The majority of global management textbooks offer a chapter on ethics and its often misaligned cousin social responsibility They tend to cover the subject matter by stating the problem and then reciting laws enacted to combat social injustice as well as including philosophical theories intended to provide generic direction This iceberg approach a topical view of the issues leaves the average MBA student along with executive cadre longing for more specific guidelines *Loving the Poor, Saving the Rich* Helen Rhee,2012-11-01 The issue of wealth and poverty and its relationship to Christian faith is as ancient as the New Testament and reaches even further back to the Hebrew Scriptures From the beginnings of the Christian movement the issue of how to deal with riches and care for the poor formed an important aspect of Christian discipleship This careful study shows how early Christians adopted appropriated and transformed the Jewish and Greco Roman moral teachings and practices of giving and patronage As Helen Rhee illuminates the early Christian understanding of wealth and poverty she shows how it impacted the formation of Christian identity She also demonstrates the ongoing relevance of early Christian thought and practice for the contemporary church **From Capitalistic to Humanistic Business** Ulrich Steinvorth,Carlos Largacha-Martinez,Claus Dierksmeier,2014-12-22 Transforming Capitalism addresses the challenges to shareholder capitalism It explores fair play in the market place challenges on systemic organizational and individual levels the need to refocus our economic system around community and cooperation the current challenges and transform capitalism International Marketing Sak Onkvisit,John Shaw,2009-05-07 A key text examining the theory and strategy of marketing in a global context this acclaimed text uses academic rigour rather than anecdotal evidence The new edition features key new data updated case studies and a revised companion website Intellectual Property Law Anne Flanagan,Maria Lillf Montagnani,2010-01-01 Professors Flanagan and Montagnani have assembled a volume of essays recognizing that in a global information age intellectual property is not merely a business asset but a social phenomenon The contributors marry consideration of fairness with exploration of efficiency examination of economics with analysis of equity drawing upon expertise and examples from both European and American law The resulting collection will be an invaluable resource on both sides of the Atlantic and around the globe Dan L Burk University of California Irvine School of Law US Intellectual Property Law examines emerging intellectual property IP issues through the bifocal lens of both economic analysis and individual or social justice theories This study considers restraints on IP rights both internal and external to IP law and explores rights disequilibria from the perspective of both the rationale of IP law and the interface with competition law The expert contributors discuss the phenomenon in various contexts of patent trade secret and copyright each a tool to incentivize the growth of knowledge beyond innovation and creativity This timely book will strongly appeal to academics scholars and postgraduate and PhD students interested in where and how the balance to intellectual property law is should or could be set Policymakers will also find this insightful resource invaluable **Handbook of International Business**

Policy Philippe Gugler, Ana T. Tavares-Lehmann, 2024-04-12 Presenting essential research on contemporary foreign direct investment policies this Handbook identifies the wide variety of global policy challenges linked to modern technological, geostrategic and entrepreneurial developments from electoral uncertainties to rapid digitalization

Islamic Finance in Europe Valentino Cattelan, 2013-01-01 Highlighting the impact of current globalization on financial markets this topical book challenges the universality of Western property rights and interprets Islamic finance in Europe as part of a plural financial system where different conceptions of economic justice co-exist and influence each other. The contributing authors analyse key economic development and social integration issues from an Islamic perspective and outline the European approach to accommodating Islamic finance with particular regard to the peculiarities of individual nation states. Set in this context the book presents financial pluralism as a device to enhance a level playing field in the global marketplace as well as to foster a plural open society. Providing a comprehensive and methodological guide to Islamic finance in Europe this book will prove an illuminating and informative read for academics, students and policymakers with an interest in the impact on financial regulation of an increasingly globalized world.
