Making It Better:

Making Better Decisions Itzhak Gilboa, 2010-10-19 *Making Better Decisions* introduces readers to some of the principal aspects of decision theory and examines how these might lead us to make better decisions. Introduces readers to key aspects of decision theory and examines how they might help us make better decisions. Presentation of material encourages readers to imagine a situation and make a decision or a judgment. Offers a broad coverage of the subject including major insights from several sub disciplines: microeconomic theory, decision theory, game theory, social choice, statistics, psychology and philosophy. Explains these insights informally in a language that has minimal mathematical notation or jargon even when describing and interpreting mathematical theorems. Critically assesses the theory presented within the text as well as some of its critiques. Includes a web resource for teachers and students.

Making Better Buildings Chris Magwood, Jen Feigin, 2014-03-25 Sustainable building from the ground up: the pros and cons of the latest green and natural materials and technologies.

Making Better Choices Charles E. Phelps, Guruprasad Madhavan, 2021 Our collective decisions usually revolve around three basic factors: First, how many people are affected by the decision; Second, how many people make the decision; Third, how important is the decision both to the makers and recipients of the decisions.

Making Better Social Worlds Robyn Penman, Arthur Jensen, 2019-10-10 Do you despair about the divisiveness, the hatred and the lack of compassion in our social world? Are you looking for a better way to manage the complexities and demands of 21st century social life? Well, this book offers just such a way. Following the adage of Einstein that you cannot solve problems with the mindset that created it, you are introduced to a new way of thinking and acting that opens up possibilities for a more hopeful future than the one we currently face. The new mindset presumes that we create our social worlds in communication; that our relationships with people matter deeply to the quality of our lives; and that living with difference enriches us. The authors draw on the Theory of the Coordinated Management of Meaning for inspiration, making dense concepts and technical language more accessible so that you can use the theory. You are introduced to such notions as relational beings, self-reflexivity and storied worlds along with what it can mean to engage in joint action, dialogue and cosmopolitan communication. By drawing on these ideas and implementing them in our everyday interpersonal communication, the authors show how changing our communication practices can bring about social and cultural change.

Making Better Places Richard Hayward, 2013-10-22 *Making Better Places: Urban Design Now* discusses how to make better places: how monotonous or rich urban development can be; how appropriate to traffic requirements urban improvements are; or how sustainable an urban design approach can be to existing and future urban dispersal. The book reviews the gap existing between the various environmental disciplines leading to the emergence of urban design as well as the gap between the rhetoric and practical achievements of urban design. The practice of urban design entails the premise that environments are to be created and transformed to provide the most opportunities for the largest number of people. By using an urban tissue plan, the urban

developmental planner can produce and evaluate site development appraisal and design proposals The book also provides an abstract perspective that considers built forms as a set of signs to provide a mechanism which shows the modification of urban space The text also addresses the issue of urban change in established centers the urban fringe and beyond as well as cites four examples of exploration by intervention The book can prove beneficial to urban planners sociologists and policy makers involved in urban and social development *Making Better Decisions* Pekka J. Korhonen, Jyrki Wallenius, 2020-08-18

Making Better Decisions Using Systems Thinking Jaap Schaveling, Bill Bryan, 2017-10-26 This book provides a framework to help managers go beyond simply fighting fires every day offering the tools to address the underlying causes of recurring problems and deliver long term solutions The most obvious part of any problem is the pain it causes The desire to end the pain and find a solution any solution that will make it go away now is usually so great that it blinds managers to the underlying systemic cause of the problem The result is that we solve the problem today and then it comes back again tomorrow or next week again and again We are only addressing the symptoms but never understanding the cause like picking the flower heads off weeds but not digging them out at the roots Schaveling and Bryan offer the insights and tools managers and leaders need to achieve a longer term and more effective approach by stepping back and analysing the system as a whole And at the heart of any system are human beings notoriously short term and pain averse creatures who will behave in whatever way minimises pain today even at the expense of pain tomorrow They show how to detect the behavior patterns that have become engrained in the organisation and which underlie complex situations so that root causes of problems can be identified Once the system responsible for the problem is understood smarter decisions can be made to devise interventions that solve the core problem instead of wasting energy
