Zeufack,Fulbert Tchana Tchana,Aly Sanoh,2024-04-05 In 2019 African heads of state and governments launched in fanfare the African Continental Free Trade Agreement AfCFTA a historic agreement for economic transformation across the continent But now comes the hard bit how to make the agreement a success In this book senior experts from

across the world come together to provide a comprehensive analysis of the conditions needed for AfCFTA to successfully spur economic development in Africa. It puts forward three foundations for success: demography dividend, digital economy and economic diversification. In addition to trade policy, the book recommends that African policymakers should strengthen fiscal and monetary policy coordination, adopt and implement the appropriate regulatory environment and build suitable connectivity infrastructure. The stakes are high. If implemented correctly, the book argues that AfCFTA could speed up trade within Africa, which could double every five years. Success would mean growth, investment, changing trade patterns, jobs, economic transformation, poverty reduction and a continental market for services. Driven by concrete evidence-based strategies for long-term growth, this book is an essential read for policy makers, development practitioners, economics researchers and everyone with an interest in the future of Africa.

The Policy Paradox in Africa Elias Ayuk, Mohamed Ali Marouani, 2007. It provided technical and financial support to economic research centres in sub-Saharan Africa (SSA) so that they can undertake policy relevant research with the goal of influencing economic policy making. In January 2005, the Secretariat organized an international conference in Dakar, Senegal, during which participants from key economic think tanks presented their experiences in the policy development process in Africa. Of particular interest was the role of economic research and economic researchers in policy making. The authors examine the extent to which economic policies that are formulated in the sub-continent draw from research based on local realities and undertaken by local researchers and research networks in Africa.
