## **Making Of New Labours European Policy:**

*The Making of New Labour's European Policy* Russell Holden, 2001-12-17 Russell Holden considers the policy reversal on Europe made by the Labour Party between 1983 and 1999. It charts and analyzes how the Party became pro-European with particular emphasis on how this change was conceived and implemented. In so doing it concentrates on how the European issue became a political priority and dynamic tool for promoting economic reform and Party unity, two essential requirements in making the Party New Labour a credible alternative government in the eyes of the general public. **New Labour and the European Union** Stefano Fella, 2018-05-08 This title was first published in 2002. This book makes a valuable contribution to the literature on the UK-EU relationship and on the development of the Labour party since Tony Blair became leader in 1994, providing a detailed examination of the process of policy making undertaken by Labour in relation to the 1996-97 intergovernmental conference (IGC) of the EU. It tracks policy development from opposition to government, culminating in the conclusion of treaty negotiations at Amsterdam in June 1997. The book moves beyond the existing literature in providing an original account of policy making based on internal party and government sources. It highlights a New Labour approach to the EU set in place by the time of the Amsterdam summit and characteristic of the Blair government's European policy thereafter, and suggests that this approach represents both continuity and change with previous UK governments and a break from the European social democratic perspective that had been central to Labour's previous pro-European conversion.

Harold Wilson, Denmark and the making of Labour European policy Matthew Broad, 2017-11-28 Explores how the European policies of the British Labour Party and Danish Social Democrats evolved between 1958 and enlargement of the European Economic Community (EEC) in 1973, comparing how they each responded to the integration process at key moments and more innovatively highlights the impact of informal contacts between them. **New Labour and the European Union** Oliver Daddow, 2013-01-18 This book explores Tony Blair and Gordon Brown's attempt to sell the European ideal to the British people. New Labour came to power in 1997, promising to modernize the country and make it fit for the twenty-first century. In foreign policy, Blair and Brown set about rethinking core components of the British national identity, especially the country's relationship to its past and its role in the world. Rebranding Britain, they argued, meant helping the British people feel comfortably at home in the European Union. What did New Labour achieve and did its European policy succeed? How did Blair and Brown try and persuade the British to accept a European future? What were the obstacles they faced and the strategies they used to overcome them? This timely study of New Labour's effort to build a pro-European consensus in Britain argues that the government failed to live up to its early promises. Based on evidence from well over one hundred of Blair and Brown's foreign policy speeches, supplemented by interviews with policy makers, advisers, and speech writers from the time, the book is sympathetic to the challenge New Labour set itself but also critical of the rhetorical techniques it used to advance the Europeanist cause. Trapped between a broadly hostile media and an apathetic public, Blair and Brown failed to provide

the necessary leadership to see Britain to a European future Theoretically informed empirically robust and methodologically innovative this novel book will appeal to anyone interested in contemporary British foreign policy the New Labour project and Euroscepticism in Britain *Britain and Europe* N.J. Crowson,2010-10-18 This textbook provides a comprehensive account of Britain s uneasy relationship with continental Europe from 1918 to the present day Unlike other books on the subject the author considers Europe in its broadest sense and examines a wider history than just Britain s relations with the European Union EU This includes pre war history and the role of key political institutions outside the EU such as the Council of Europe and the Western European Union Subjects covered include how the experience of the inter war years and the Second World War helped shape attitudes towards the EU european perspectives on Britain as well as the other way round key theories on European integration the changing nature of Britain s global role issues of sovereignty and legitimacy the role of political parties and the Europeanisation of national government the rise of Euroscepticism in British politics and how Europe has become entwined in the ideological battles of the main political parties Exploring the political diplomatic and military relationship between Britain and Europe this accessible and wide ranging textbook is essential core reading for students of British and European history and politics **Governing as New Labour** Steve Ludlam,Martin J. Smith,2017-10-07 This follow up volume to the same editors highly acclaimed *New Labour in Government* provides a systematic assessment of Blair s first term and the continuities and changes into his second Bringing together specially commissioned chapters by leading authorities in a tightly edited format it places particular emphasis on the evolution of New Labour s political performance policy and statecraft set in its historical ideological and organizational context **The Labour Party and the world, volume 2** Rhiannon Vickers,2013-07-19 This is the second book in a unique two volume study tracing the evolution of the Labour Party s foreign policy throughout the 20th century to the present date This is the first comprehensive study of the history of the Labour Party s worldview and foreign policy It argues that Labour s foreign policy perspective should be seen not as the development of a socialist foreign policy but as an application of the ideas of liberal internationalism Volume Two provides a critical analysis of Labour s foreign policy since 1951 It examines Labour s attempts to rethink foreign policy focusing on intra party debates the problems that Labour faced when in power and the conflicting pressures from party demands and external pressures It examines attitudes to rearmament in the 1950s the party s response to the Suez crisis and the Vietnam War the bitter divisions over nuclear disarmament and the radicalisation of foreign and defence policy in the 1980s It also examines Labour s desire to provide moral leadership to the rest of the world The last two chapters focus on the Blair and Brown years with Blair s response to the Kosovo crisis to 9 11 and his role in the war on terror Whereas Blair s approach to foreign affairs was to place emphasis on the efficacy of the use of military force Brown s approach instead placed faith in the use of economic measures This highly readable book provides an excellent analysis of Labour s foreign policy It is essential reading for students of British politics the Labour Party and foreign policy Old

Europe, New Europe and the Transatlantic Security Agenda Kerry Longhurst, Marcin Zaborowski, 2013-09-13 The post September 11th security policies of Poland the UK France the US and Germany presented in this new book illustrate how and why the Atlantic community ruptured over Iraq a result in part it is argued of the existence of particular national strategic cultures Whilst the longer term effects of Iraq for the transatlantic security agenda have yet to fully transpire what is certain is that the EU s ambitions to become a credible security actor have been seriously questioned as has the notion of multilateralism as an international norm as has the function of international law The book addresses these issues by considering the evolution of the EU s role in the world and the development of American perspectives on the transatlantic security agenda This volume was previously published as a special issue of the journal European Security

**Ideas and Economic Crises in Britain from Attlee to Blair (1945-2005)** Matthias Matthijs, 2012-08-21 During the period from 1945 to 2005 Britain underwent two deep seated institutional transformations when political elites successfully challenged the prevailing wisdom on how to govern the economy Attlee and Thatcher were able to effectively implement most of their political platforms During this period there were also two opportunities to challenge existing institutional arrangements Heath s U turn in 1972 signalled his failure to implement the radical agenda promised upon election in 1970 whilst Tony Blair s New Labour similarly failed to instigate a major break with the Thatcherite settlement Rather than simply retell the story of British economic policymaking since World War II this book offers a theoretically informed version of events which draws upon the literatures on institutional path dependence economic constructivism and political economy to explain this puzzle It will be of great interest to both researchers and postgraduates with an interest in British economic history and the fields of political economy and economic crisis more widely

**Constitution-Making and the Labour Party** M. Evans, 2003-10-15 Since coming to power in 1997 the Labour government s programme of constitutional reform represents an historic challenge to both British constitutional doctrine and Labour Party orthodoxy Mark Evans examines the nature and extent of this challenge and argues that the New Constitutionalism is a key element of a policy agenda that in its most crucial aspects reflects the continuing transformation of the British industrial welfare state into a competition state Constitution Making and the Labour Party analyzes key areas of reform under the Blair government from the perspective of Labour Party history and contemporary policy analysis

**Britain and the European Union** Andrew Geddes, 2013-01-15 Britain s relationship with the EU has always been riddled with doubt scepticism and awkwardness This much needed new book examines why how and with what effect the EU has become such a contentious issue in UK politics It places the debate in historical context by starting with an overview of debates about membership in the 1950s and 1960s and then goes on to examine the impact of Britain s membership since 1973 across core policy areas including economic and monetary union agriculture and foreign and security policy Andrew Geddes outlines major changes in the scope of the European project and assesses how central devolved and local governments have responded to the EU The book also assesses the EU s impact on domestic policies assessing debates within and between the main parties and charting the rise of Euroscepticism as a key trend in contemporary British politics Engagingly written this text provides a comprehensive and up to date analysis both of the EU s impact on Britain and of Britain s contribution to the EU
