## **Making Of The Modern Mind The Surfacing Of Consciousness In Social Thought:**

**Making of the Modern Mind** Philip Hodgkiss,2001-08-01 The Making of the Modern Mind traces the emergence of consciousness in social thought from the 17th Century to the 21st Against the classical notions of consciousness and self alternative agendas began to be developed in the 19th Century by figures as diverse as Marx and Nietzsche The struggles between classical conceptions of consciousness and these alternatives which promised more radical and emancipatory interpretations continued into the 20th Century From the start the concept of consciousness connected with a range of other notions Questions of the self and of identity were widely disputed in the Enlightenment whilst the 20th Century contributed new concerns chiefly the philosophical issues of being and acting and the problematic status of reality for a theory of mind Today consciousness is viewed much more as a public and linguistic world rather than a private and mentalistic one The Making of the Modern Mind explores the contemporary debates around consciousness and identity crucially setting the analysis within its social and historical context Written in a clear and engaging style the book will be of interest to students in Philosophy Psychology Sociology and Anthropology

**Social Thought and Rival Claims to the Moral Ideal of Dignity** Philip Hodgkiss,2018-04-16 The relation between changes in society over historical time and the concomitant transformation of a concept that depicts something of intrinsic value in that society is complex and contingent Social Thought and Rival Claims to the Moral Ideal of Dignity attempts to see if we can get any closer to a rounded three dimensional view of dignity by drawing on the historical record on philosophy and social thought more widely and finally on contributions that present dignity in a rather more public and political light In thus tracing the fortunes of human dignity we find that it has not always been viewed as a straightforwardly laudable principle Social Thought and Rival Claims to the Moral Ideal of Dignity examines the reasons behind what turns out to be really quite pronounced the ambiguous status of the idea and ideal of dignity

**Liberating Sociology: From Newtonian Toward Quantum Imaginations: Volume 1: Unriddling the Quantum Enigma** Mohammad H. Tamdgidi,2020-01-20 In this major new study in the sociology of scientific knowledge social theorist Mohammad H Tamdgidi reports having unriddled the so called quantum enigma This book opens the lid of the Schr dinger s Cat box of the quantum enigma after decades and finds something both odd and familiar Not only the cat is both alive and dead it has morphed into an elephant in the room in whose interpretation Einstein Bohr Bohm and others were each both right and wrong because the enigma has acquired both localized and spread out features whose unriddling requires both physics and sociology amid both transdisciplinary and transcultural contexts The book offers in a transdisciplinary and transcultural sociology of self knowledge framework a relativistic interpretation to advance a liberating quantum sociology Deeper methodological grounding to further advance the sociological imagination requires investigating whether and how relativistic and quantum scientific revolutions can induce a liberating reinvention of sociology in favor of creative research and a just global society This however necessarily leads us to confront an elephant in the room the quantum enigma In

Unriddling the Quantum Enigma the first volume of the series commonly titled Liberating Sociology From Newtonian toward Quantum Imaginations sociologist Mohammad H Tamdgidi argues that unriddling the quantum enigma depends on whether and how we succeed in dehabituating ourselves in favor of unified relativistic and quantum visions from the historically and ideologically inherited classical Newtonian modes of imagining reality that have subconsciously persisted in the ways we have gone about posing and interpreting or not the enigma itself for more than a century Once this veil is lifted and the enigma unriddled he argues it becomes possible to reinterpret the relativistic and quantum ways of imagining reality including social reality in terms of a unified nonreductive creative dialectic of part and whole that fosters quantum sociological imaginations methods theories and practices favoring liberating and just social outcomes The essays in this volume develop a set of relativistic interpretive solutions to the quantum enigma Following a survey of relevant studies and an introduction to the transdisciplinary and transcultural sociology of self knowledge framing the study overviews of Newtonianism relativity and quantum scientific revolutions the quantum enigma and its main interpretations to date are offered They are followed by a study of the notion of the wave particle duality of light and the various experiments associated with the quantum enigma in order to arrive at a relativistic interpretation of the enigma one that is shown to be capable of critically cohering other offered interpretations The book concludes with a heuristic presentation of the ontology epistemology and methodology of what Tamdgidi calls the creative dialectics of reality The volume essays involve critical comparative integrative reflections on the relevant works of founding and contemporary scientists and scholars in the field This study is the first in the monograph series Tayyebeh Series in East West Research and Translation of Human Architecture Journal of the Sociology of Self Knowledge XIII 2020 published by OKCIR Omar Khayyam Center for Integrative Research in Utopia Mysticism and Science Utopystics OKCIR is dedicated to exploring in a simultaneously world historical and self reflective framework the human search for a just global society It aims to develop new conceptual methodological theoretical historical practical pedagogical inspirational and disseminative structures of knowledge whereby the individual can radically understand and determine how world history and her his selves constitute one another Reviews Mohammad H Tamdgidi s Liberating Sociology From Newtonian Toward Quantum Imaginations Volume 1 Unriddling the Quantum Enigma hits the proverbial nail on the head of an ongoing problem not only in sociology but also much social science namely many practitioners allegiance consciously or otherwise to persisting conceptions of science that get in the way of scientific and other forms of theoretical advancement Newtonianism has achieved the status of an idol and its methodology a fetish the consequence of which is an ongoing failure to think through important problems of uncertainty indeterminacy multivariation multidisciplinary and false dilemmas of individual agency versus structure among many others Tamdgidi has done great service to social thought by bringing to the fore this problem of disciplinary decadence and offering in effect a call for its teleological suspension thinking beyond disciplinarity through drawing upon and communicating with the resources of

quantum theory not as a fetish but instead as an opening for other possibilities of social including human understanding The implications are far reaching as they offer as the main title attests liberating sociology from persistent epistemic shackles and thus many disciplines and fields connected to things social This is exciting work A triumph The reader is left with enthusiasm for the second volume and theorists of many kinds with proverbial work to be done Professor Lewis R Gordon Honorary President of the Global Center for Advanced Studies and author of *Disciplinary Decadence Living Thought in Trying Times* Routledge Paradigm 2006 and *Freedom Justice and Decolonization* Routledge forthcoming 2020 Social sciences are still using metatheoretical models of science based on 19th century newtonian concepts of time and space Mohammad H Tamdgidi has produced a tour de force in social theory leaving behind the old newtonian worldview that still informs the social sciences towards a 21st century non dualistic non reductionist transcultural transdisciplinary post Einsteinian quantum concept of TimeSpace Tamdgidi goes beyond previous efforts done by titans of social theory such as Immanuel Wallerstein and Kyriakos Kontopoulos This book is a quantum leap in the social sciences at large Tamdgidi decolonizes the social sciences away from its Eurocentric colonial foundations bringing it closer not only to contemporary natural sciences but also to its convergence with the old Eastern philosophical and mystical worldviews This book is a masterpiece in social theory for a 21st century decolonial social science A must read Professor Ramon Grosfoguel University of California at Berkeley Tamdgidi s *Liberating Sociology* succeeds in adding physical structures to the breadth of the world changing vision of C Wright Mills the man who mentored me at Columbia Relativity theory and quantum mechanics can help us to understand the human universe no less than the physical universe Just as my *Creating Life Before Death* challenges bureaucracy s conformist orientation so does *Liberating Sociology* liberate the infinite possibilities inherent in us Given our isolation in the Coronavirus era we have time to follow Tamdgidi in his journey into the depth of inner space where few men have gone before It is there that we can gain emotional strength just as Churchill Roosevelt and Mandela empowered themselves That personal development was needed to address not only their own personal problems but also the mammoth problems of their societies We must learn to do the same Bernard Phillips Emeritus Sociology Professor Boston University

**Thinking Through Art** Katy Macleod, 2013-01-11 Focusing on a unique arena *Thinking Through Art* takes an innovative look at artists experiences of undertaking doctorates and asks If the making of art is not simply the formulation of an object but is also the formation of complex ideas then what effect does academic enquiry have on art practice Using twenty eight pictures never before seen outside the artists universities *Thinking Through Art* focuses on art produced in higher educational environments and considers how the material product comes about through a process of conceiving and giving form to abstract thought It further examines how this form which is research art sits uneasily within academic circles and yet is uniquely situated outside the gallery system The journal articles from eminent scholars artists philosophers art historians and cultural theorists demonstrate the complexity of interpreting art as research and provide students and scholars with an invaluable resource for

their art and cultural studies courses     A Matter of Choice Philip Hodgkiss,2021-10-28 A Matter of Choice represents a substantive discussion of the concept of choice in human affairs taken against the backdrop of ethics and religion Drawing on a range of contributions Hodgkiss demonstrates in this study that though often not the primary issue under consideration a concern with choice has featured continually in human thought from the Hellenistic world of the Stoics to the post Kantian environment of modern philosophy Moreover he argues that the social and historical dimension of choice has been consistently underplayed and that the role of choice in modern economic and political developments is underestimated at our peril Through a critical account of the literature Hodgkiss adeptly diagnoses the insufficiency of the current conception of the choice making sovereign individual in the contemporary liberal democratic capitalist context and outlines the implications of this philosophy for the choice maker     **Stability in Postcolonial African States** Emmanuel Bueya,2017-11-22 This book explores the instability of the African postcolonial state and demonstrates that such a fundamental crisis can be solved only through discourses and practices that are designed beyond the Westphalian model of the modern state and out of the neo patrimonialistic system of African governance The challenge of instability will not be overcome by rebuilding the African nation state undermined by social contradictions and complex emergencies rather stability will be achieved by opening a public space of agonistic democracy that is supported mainly by an overlapping consensus on justice The author argues that by reading critically the African philosophy of solidarity is contradicted by structural violence and inequality The political instrumentalization of kinship provokes the exclusion of minorities the marginalization of masses and the instability of the entire society Governance is reduced to mere conflict management The solution of legitimate violence becomes another version of the problem of institutional incapacity The author's contention is people are the ultimate and permanent agents of stability and the ground of stability must not be a strong state but the politics of reciprocity and union among people that implies a sense of justice in the power sharing and in the decision making process     IBSS: Sociology: 2002 Vol.52 Compiled by the British Library of Political and Economic Science,2004-03-01 First published in 1952 the International Bibliography of the Social Sciences anthropology economics political science and sociology is well established as a major bibliographic reference for students researchers and librarians in the social sciences worldwide Key features Authority Rigorous standards are applied to make the IBSS the most authoritative selective bibliography ever produced Articles and books are selected on merit by some of the world's most expert librarians and academics Breadth today the IBSS covers over 2000 journals more than any other comparable resource The latest monograph publications are also included International Coverage the IBSS reviews scholarship published in over 30 languages including publications from Eastern Europe and the developing world User friendly organization all non English titles are word sections Extensive author subject and place name indexes are provided in both English and French Place your standing order now for the 2002 volumes of the the IBSS Anthropology 2002 Vol 48 December 2003 234x156 Hb 0 415 32634 6 195 00 Economics 2002 Vol 51 December 2003 234x156 Hb 0 415 32635

Wood,2017-07-15 This book s central claim is that a close reading of Augustine s epistemology can help political theologians develop affirmative accounts of political liberalism This claim is set in a scholarly context that is profoundly hostile to constructive theological readings of liberal culture As a corrective to such antagonism this book suggests that far from being natural opponents Christian communities can work fruitfully with political liberals based on common principles A key component in this argument is the theological reevaluation of the ancient skeptical tradition While the ancient skeptics are habitually treated by scholars as minor characters in the story of Augustine s theological development this volume argues that they played a significant role in shaping both Augustine s theology and the subsequent character of the Augustinian tradition By placing Augustine s reading of the skeptics in dialogue with contemporary culture this book constructs a viable form of liberal Christian politics that is attentive both to his sin sensitive account of public life and his eschatological vision of the church *The Romantic Economist* Richard Bronk,2009-02-05 Since economies are dynamic processes driven by creativity social norms and emotions as well as rational calculation why do economists largely study them using static equilibrium models and narrow rationalistic assumptions This book argues that economists should look for new techniques in Romantic poetry and philosophy **Personhood, Identity and Care in Advanced Old Age** Higgs, Paul,Gilleard, Chris,2016-10-05 As humans live longer the elderly population increases and the challenges we face in addressing their needs continue to evolve This book explores the theoretical and practical issues raised by advanced aging in the contemporary world Developing new sociological theory Paul Higgs and Chris Gilleard suggest that mental and physical frailty forms a central theme in narratives about deep old age and that discussions of personhood are needed to address this concept After examining key terms like personhood the fourth age frailty and abjection Higgs and Gilleard consider the broader implications of these concepts for issues of care both its meanings and its management As the care needs of the elderly and options for meeting these needs grow more complex it is important to examine our collective hopes and fears concerning the end of life including questions about personhood and expectations for the quality and content of end of life care **Freudian Unconscious and Cognitive Neuroscience** Vesa Talvitie,2018-05-08 The aim of Freudian Unconscious

and Cognitive Neuroscience is to create a conception of the Freudian things around the unconscious that takes seriously both the clinical data gathered in the scope of psychoanalytic clinical practice during the past 110 years and the empirical and theoretical achievements of cognitive neuroscience and evolutionary theory Tensions between the psychoanalytic and other views give a hint that the task is anything but easy **Radical Philosophy** ,2001 **The Journal of the Royal**

**Anthropological Institute** ,2002 Articles on all aspects of anthropology **Forthcoming Books** Rose Arny,2001-08

The Philosophers' Magazine ,2001 **Root of Thought** Henry Kong,2010-05-12 Consciousness is a clever adaptation for life as a social ape But like all adaptations it has its limits Lion claws and butterfly wings are made of tissue and proteins that require proper diet and maintenance to keep their integrity Likewise a fully functioning conscious system is a phenomenon that requires a well nourished neural substrate to keep it going It is important to point out that a healthy brain is necessary but not sufficient for consciousness because not all of the brain is conscious There are great swaths of brain that are crucially important for maintaining the vegetative functions of homeostasis such as breathing heartbeat temperature and sleep With a hundred billion neurons and a hundred trillion synapses the brain is the most complex adaptation known Yet we know shockingly little about how it enables the human mind to become conscious make decisions believe in God and behave morally However recent discoveries in cognitive neuroscience behavioral genetics and evolutionary psychology are beginning to revolutionize old conceptions of nature and nurture reason and passion and automatic versus willfully chosen actions **Root of Thought** will take readers on a remarkable journey through the landscape of the mind in search of its biological basis
