The Decision-Making Process of Investor-State Arbitration Tribunals Mary Mitsi, 2018-12-28 In the course of a single investor state dispute an arbitrator may make numerous decisions from interpreting the treaty or national laws to taking into account case law customs and policies In practice this process raises important issues regarding the consistency of decisions and the predictability and legitimacy of the decision making process in general Investment arbitration tribunals have developed a specialised process of legal decision making adapted to the interpretational needs that arise in the context of an investor state dispute and to the transnational characteristics of the investment arbitration framework This is the first book to offer an in depth analysis of the transnational characteristics of investment arbitration and to analyse the interpretive arguments of investment tribunals and the way they use treaties precedent policies general principles of law and customary law in their decision making process Drawing on publicly available arbitral case law supplemented with personal interviews with investment arbitrators the author touches on such concepts and practices as the following an overview of various decision making genres of arbitral tribunals attitudinal economic strategic and legal the legal argumentation triptych of language rhetoric dialogue the specific language arbitrators have developed when interpreting the law how arbitrators use the concepts standards rules principles and rights the importance of the legal reasoning of arbitral awards and the role of rhetoric therein concepts of acceptability audience and legitimacy limitations of the public international law interpretive methodology enshrined in the Vienna Convention interpretation of precedents customary law general principles of law and policies the way national and international legal orders interact in the context of interpretation and how decision making is connected to the issues of predictability consistency and the rule of law The core of the book proposes a novel full edged dialogical network theory for analysing the interpretation process As an exemplary demonstration of developing theory to

keep up with practice this unique book provides a deeply engaged means for enhancing the practice of international arbitration Its introduction of a new field of interdisciplinary analysis employing legal argumentation theories is sure to provide inestimable guidance for institutions and policymakers especially in light of recent proposals for the creation of a permanent investment arbitration court Given that unveiling the legal decision making process is critical for the well being of the whole dispute resolution procedure and that being aware of how arbitrators interpret the law can constitute a roadmap for counsel s arguments and approaches when dealing with cross border disputes the topic of this book is relevant for both academics and practitioners and its significance can only grow as recourse to investor state arbitration continues to expand
