## **Making Equity Planning Work:**

**Making Equity Planning Work** Norman Krumholz, John Forester, 1990-05-18 From 1969 to 1979 Cleveland's city planning staff under Norman Krumholz's leadership conducted a unique experiment in equity oriented planning. Fighting to defend the public welfare while also assisting the city's poorest citizens, these planners combined professional competence and political judgment to bring pressing urban issues to the public's attention. Although frequently embroiled in controversy while serving three different mayors, the Cleveland planners not only survived but accomplished impressive equity objectives. In this book, Norman Krumholz and John Forester provide the first detailed personal account of a sustained and effective equity planning practice that influenced urban policy. Krumholz describes the pragmatic equity planning agenda that his staff pursued during the mayoral administrations of Carl B. Stokes, Ralph J. Perk, and Dennis J. Kucinich. He presents case studies illuminated with rich personal experience of the Euclid Beach development, the Clark Freeway, and the tax delinquency and land banking project that resulted in a change in the State of Ohio's property law, among others. In the second part of the book, John Forester explores the implications of this experience and the lessons that can be drawn for planning public management and administrative practice more generally. [The SAGE Handbook of GIS and Society](#) Timothy Nyerges, Helen Couclelis, Robert McMaster, 2011-04-13 The definitive guide to a technology that succeeds or fails depending upon our ability to accommodate societal context and structures. This handbook is lucid, integrative, comprehensive, and above all prescient in its interpretation of GIS implementation as a societal process. Paul Longley, University College London. This is truly a handbook, a book you will want to keep on hand for frequent reference and to which GIS professors should direct students entering our field. Selection of a few of the chapters for individual attention is difficult because each one contributes meaningfully to the overall message of this volume. An important collection of articles that will set the tone for the next two decades of discourse and research about GIS and society. *Journal of Geographical Analysis*. Over the past twenty years, research on the evolving relationship between GIS and Society has been expanding into a wide variety of topical areas, becoming in the process an increasingly challenging and multifaceted endeavour. The SAGE Handbook of GIS and Society is a retrospective and prospective overview of GIS and Society research that provides an expansive and critical assessment of work in that field. Emphasizing the theoretical, methodological, and substantive diversity within GIS and Society research, the book highlights the distinctiveness and intellectual coherence of the subject as a field of study while also examining its resonances with and between key themes and among disciplines ranging from geography and computer science to sociology, anthropology, and the health and environmental sciences. Comprising 27 chapters, often with an international focus, the book is organized into six sections.

Foundations of Geographic Information and Society Geographical Information and Modern Life Alternative Representations of Geographic Information and Society Organizations and Institutions Participation and Community Issues Value Fairness and Privacy Aimed at academics researchers postgraduates and GIS practitioners this Handbook will be the basic reference for any inquiry applying GIS to societal issues

**Dialogues in Urban and Regional Planning** Bruce Stiftel, Vanessa Watson, 2005 Dialogues in Urban and Regional Planning offers a selection of the best urban planning scholarship from each of the world's planning scholarship communities. The papers presented illustrate the concerns and the discourse of planning scholarship communities and provide a glimpse into planning theory and practice by planning academics around the world. Readers will find this collection valuable in opening new avenues for exploration. This book has been put together by the Global Planning Education Association Network GPEAN. The nine member associations of GPEAN are the Association of African Planning Schools AAPS, the Association of Collegiate Schools of Planning ACSP in USA, the Association of Canadian University Planning Programs ACUPP, the Association of European Schools of Planning AESOP, the Association of Latin American Schools of Urban Planning ALEUP, the National Association of Urban and Regional Postgraduate and Research Programs ANPUR in Brazil, the Australia and New Zealand Association of Planning Schools ANZAPS, the Association for the Development of Planning Education and Research APERAU and the Asian Planning Schools Association APSA.

**Policy, Planning, and People** Naomi Carmon, Susan S. Fainstein, 2013-05-31 The contributors of Policy Planning and People argue for the promotion of social equity and quality of life by designing and evaluating urban policies and plans. Edited by Naomi Carmon and Susan S. Fainstein, the volume features original essays by leading authorities in the field of urban planning and policy, mainly from the United States but also from Canada, Hungary, Italy, and Israel. The contributors discuss goal setting and ethics in planning, illuminate paradigm shifts, make policy recommendations, and arrive at best practices for future planning. Policy Planning and People includes theoretical as well as practice-based essays on a wide range of planning issues: housing and neighborhood transportation, surveillance and safety, the network society, regional development, and community development. Several essays are devoted to disadvantaged and excluded groups such as senior citizens, the poor, and migrant workers. The unifying themes of this volume are the values of equity, diversity, and democratic participation. The contributors discuss and draw conclusions related to the planning process and its outcomes. They demonstrate the need to look beyond efficiency to determine who benefits from urban policies and plans.

**The Sustainable City VIII (2 Volume Set)** S.S. Zubir, C.A. Brebbia, 2013-12-03 With majority of the

Earth's people, now urban dwellers and cities being the most efficient habitat for the utilisation of resources, it is imperative that we continue to support standards of living and efficiencies of urban areas. However, the urbanisation process has not been without its problems. While much has been done to address the original issues surrounding the quality of urban life, new challenges continue to arise. It is no longer sustainable to achieve improvements by means that require greater and greater energy consumption as we did in the past. Despite their complexity, however, cities are a great laboratory for architects, engineers, and other key professionals to apply new ideas and new technology to meet our requirements for more sustainable city environments. Containing papers presented at the latest in a series of conferences organised by the Wessex Institute of Technology, these proceedings split into two volumes address not just environmental, architectural, and engineering concerns but also quality of life, security, risk, and heritage. The diversity of topics and the case studies based on existing projects make the book an important contribution to the literature on urban planning.

**The Affordable Housing Reader** J. Rosie Tighe, Elizabeth J. Mueller, 2013. The Affordable Housing Reader brings together classic works and contemporary writing on the themes and debates that have animated the field of affordable housing policy, as well as the challenges in achieving the goals of policy on the ground. The Reader, aimed at professors, students, and researchers, provides an overview of the literature on housing policy and planning that is both comprehensive and interdisciplinary. It is particularly suited for graduate and undergraduate courses on housing policy offered to students of public policy and city planning. The Reader is structured around the key debates in affordable housing, ranging from the conflicting motivations for housing policy through analysis of the causes of and solutions to housing problems to concerns about gentrification and housing and race. Each debate is contextualized in an introductory essay by the editors and illustrated with a range of texts and articles. Elizabeth Mueller and Rosie Tighe have brought together for the first time into a single volume the best and most influential writings on housing and its importance for planners and policy makers.

*Rethinking Administrative Theory* Jong S. Jun, 2001-10-30. Striving to redirect the study of public administration toward innovation and imagination, deliberative democracy, knowledge transfer, policy making, and ethics and values topics which for too long have been overshadowed by traditional problems of efficiency, productivity, and instrumental rational solutions, this book of diverse essays is certain to invigorate both scholarship and practice. Eighteen leading international scholars evaluate public administration's historical development and explore the significance and value trends in public administration from a variety of cutting-edge theoretical and practical perspectives. Aimed at students and practitioners alike, this collection of essays is certain to stimulate critical thinking and discussion of public administration's aims, mechanisms, and overall effectiveness, as well as the role it plays in democratizing countries.

Planning in the USA is a comprehensive introduction to the policies, theory, and practice of planning, outlining land use, urban planning, and

environmental protection policies this fully illustrated book explains the nature of the planning process and the way in which policy issues are identified defined and approached Planning in the USA offers a detailed account of urbanization in the USA Focussing on policies relating to land use urban planning and environmental protection Barry Cullingworth reveals the problematic nature and limitations of the planning process the fallibility of experts and difficulties facing policy makers in their search for solutions Coverage includes Land Use Regulation Transport Housing and Community Development Public Attitudes to Planning Property Rights Environmental Planning and Policies Growth Management Planning and Governance Planning problems are seldom easily solved Barry Cullingworth s Planning in the USA is an essential book for students and planners and all who are concerned with the nature of contemporary urban and environmental problems **Compromise Planning : A Theoretical Approach from a Distant Corner of Europe** Louis C. Wassenhoven, 2022-03-28 The purpose of the book is to elaborate a planning theory which departs from the plethora of theories which reflect the conditions of developed countries of the North West The empirical material of this effort is derived from a country Greece which sits on the edge between North West and South East at the corner of Europe No doubt there is extensive international literature on planning theory in general from a bewildering variety of viewpoints The interested professional or student of urban and regional planning is certainly aware of the dizzying flood of books articles and research reports on planning theory and of their never ending borrowing of obscure concepts from more respectable scientific disciplines from mathematics to philosophy and from physics to economics human geography and sociology He or she probably observed that there is a growing interest in theoretical approaches from the viewpoint of the so called Global South The author of the present book has for many decades faced the impasse of attempting to transplant theories founded on the experience of the North West to countries with a totally different historical political social and geographical background He learned that the reality that planners face is unpredictable patchy and responsive to social processes frequently of a very pedestrian nature Planning strives to deal with private interests which planners are keen to envelop in a single public interest which is extremely hard to define The behaviour of the average citizen far from being that of the neoclassical model of the homo economicus is that of an individual a kind of homo individualis who interacts with the state and the public administration within a complex web of mutual dependence and negotiation The state and its administrative apparatus i e the key determinants and fixers of urban and regional planning policy bargain with this individual offer inducements exemptions derogations and privileges deviate unhesitatingly from their grand policy pronouncements but still defend the rationality and comprehensiveness of the planning system they have legislated and operationalized It is by and large a successful *modus vivendi* but only thanks to a constant practice of compromise Hence the term compromise planning which the author coined as an alternative to all the existing theoretical forms of planning This is the sort of planning and of the accompanying theory with which he deals in this book It is the outcome of experience and knowledge accumulated in a long personal journey of academic teaching in England

and Greece research and professional involvement      **A Good Place to Do Business** Roger Biles, Mark H. Rose, 2022-10-28 This book looks at the politics of downtown business promotion as an urban renewal strategy from the end of World War II to the present with a focus on five case cities Philadelphia Chicago Detroit St Louis and Cleveland      Community Planning Eric Damian Kelly, 2012-09-26 This book introduces community planning as practiced in the United States focusing on the comprehensive plan Sometimes known by other names especially master plan or general plan the type of plan described here is the predominant form of general governmental planning in the U S Although many government agencies make plans for their own programs or facilities the comprehensive plan is the only planning document that considers multiple programs and that accounts for activities on all land located within the planning area including both public and private property Written by a former president of the American Planning Association Community Planning is thorough specific and timely It addresses such important contemporary issues as sustainability walkable communities the role of urban design in public safety changes in housing needs for a changing population and multi modal transportation planning Unlike competing books it addresses all of these topics in the context of the local comprehensive plan There is a broad audience for this book planning students practicing planners and individual citizens who want to better understand local planning and land use controls Boxes at the end of each chapter explain how professional planners and individual citizens respectively typically engage the issues addressed in the chapter For all readers Community Planning provides a pragmatic view of the comprehensive plan clearly explained by a respected authority      **Argument Turn Policy Anal Plan** Frank Fischer, 2002-09-11 First Published in 1993 Routledge is an imprint of Taylor Francis an informa company      Big Plans Kenneth L. Kolson, 2003-11-03 This work springs from the idea that human aspirations for the city tend to overstate the role of rationality in public life The author explores the part serendipity plays in urban experience      **Preserving the Vanishing City** Stephanie Ryberg-Webster, 2023-04-14 Chronicles the rise of historic preservation as a field of advocacy and practice in Cleveland during the 1970s and early 1980s comprehensively documenting the history of preservation within the context of one city s urban decline      Critical Theory, Public Policy, and Planning Practice John Forester, 1993-01-01 Too often attacked as hopelessly abstract contemporary critical social theory can help us to understand both public policy and its analysis In this book John Forester shows how policy analysis planning and public administration are thoroughly political communicative practices that subtly and selectively organize public attention Drawing from Jürgen Habermas s critical communications theory of society Forester shows how policy developments alter the social infrastructure of society He provides a clear introduction to critical social theory at the same time that he clarifies the practical and political challenges facing public policy analysts public managers and planners working in many fields
