Making Knowledge Count Advocacy And Social Science:

Making Knowledge Count Peter Harries-Jones, 1991-04-01 The essays in this collection use case studies to address four vital issues of modern social advocacy The first is the new social framework which has legitimized advocacy and recognized the immense importance of human rights legislation The second issue explored is the adoption of various strategies by advocates in empowering social groups to achieve better self management A third issue is the link between the process of advocacy and social movements In the past the sociological study of collective conflict focused on the confrontation between capital and labour but in recent years social movements have shifted the focus to quality of life or programmed society conflicts Fourth the essays examine the role of academic social science in the new process of advocacy Harries Jones and the other contributors propose that outdated notions of objectivity in the social sciences be replaced by reflexivity social commitment and interested knowledge The case studies of advocacy in this collection include those concerning human rights in Chile race relations refugees community and labour advocacy alternative work training and advocacy in the women s movement The contributors to this volume are Howard Adelman Jinny Arancibia Marcelo Charlin John Cleveland Stewart Crysedale Harry Diaz Don Dippo Jacques Doyer Peter Harries Jones Elspeth Heyworth Peter Landstreet Ronnie Leah Stan Marshall Gareth Morgan Tim Rees Metta Spencer and Carol Tator

Introduction to Conflict Resolution Sara Cobb, Sarah Federman, Alison Castel, 2019-07-02 The field of conflict resolution has evolved dramatically during the relatively short duration of the discipline s existence Each generation of scholars has struggled with the major puzzles of their era providing theories and solutions that meet the needs of the time only to be pushed forward by new insights and at times totally upended by a changing world This introductory course text explores the genealogy of the field of conflict resolution by examining three different epochs of the field each one tied to the historical context and events of the day In each of these epochs scholars and practitioners worked to understand and address the conflicts that the world was facing at that time This book provides a framework that students will carry with them far into their careers enriching their contributions and strengthening their voices Rather than a didactic approach to the field students will develop their critical analytical skills through an inductive inquiry Students will broaden their vocabulary grapple with argumentation and develop critical reading skills

Environmentalism and Cultural Theory Kay Milton, 2002-09-11 The last decade has seen a dramatic increase in the attention paid by social scientists to environmental issues and a gradual acknowledgement in the wider community of the role of social science in the public debate on sustainability At the same time the concept of culture once the property of anthropologists has gained wide currency among social scientist These trends have taken place against a growing perception among specialist and public of the global nature of contemporary issues This book shows how an understanding of culture can throw light on the way environmental issues are perceived and interpreted both by local communities and within the contemporary global arena Taking an anthropological approach the book examines the relationship between human culture and human ecology and considers how a cultural approach to the study of environmental issues differs from other established approaches in social science This book adds significantly to our understanding of environmentalism as a contemporary phenomenon by demonstrating the distinctive contribution of social and cultural anthropology to the environmental debate It will be of particular interest to students and researchers in the fields of social science and the environment
