## **Making Of A Strike:**

Precision Strike Warfare and International Intervention Mike Aaronson, Wali Aslam, Tom Dyson, Regina Rauxloh, 2014-09-15 This book explores whether the new capabilities made possible by precision strike technologies are reshaping approaches to international intervention Since the end of the Cold War US technological superiority has led to a more proactive and some would argue high risk approach to international military intervention New technologies including the capacity to mount precision military strikes from high level bombing campaigns and more recently the selective targeting of individuals from unmanned aerial vehicles UAVs have facilitated air campaigns supported by Special Forces without the commitment of large numbers of troops on the ground Such campaigns include for example NATO s high level aerial bombardment of Milosevic s forces in Kosovo in 1999 and of Gaddafi s in Libya in 2011 and the US operation involving Special Forces against Osama Bin Laden The development of UAVs and electronic data intercept technologies has further expanded the potential scope of interventions for example against Islamic militants in the tribal areas of Pakistan This volume examines three key and interrelated dimensions of these new precision strike capabilities 1 the strategic and foreign policy drivers and consequences 2 the legal and moral implications of the new capabilities and 3 the implications for decision making at the strategic operational and tactical levels This book will be of much interest to students of war and technology air power international intervention security studies and IR *Annual Report of the Commissioner of Labor* United States. Department of Labor, 1899 *Scorecasting* Tobias Moskowitz, L. Jon Wertheim, 2011-01-25 In *Scorecasting* University of Chicago behavioral economist Tobias Moskowitz teams up with veteran Sports Illustrated writer L Jon Wertheim to overturn some of the most cherished truisms of sports and reveal the hidden forces that shape how basketball baseball football and hockey games are played won and lost Drawing from Moskowitz s original research as well as studies from fellow economists such as bestselling author Richard Thaler the authors look at the influence home field advantage has on the outcomes of games in all sports and why it exists the surprising truth about the universally accepted axiom that defense wins championships the subtle biases that umpires exhibit in calling balls and strikes in key situations the unintended consequences of referees tendencies in every sport to swallow the whistle and more Among the insights that *Scorecasting* reveals Why Tiger Woods is prone to the same mistake in high pressure putting situations that you and I are Why professional teams routinely overvalue draft picks The myth of momentum or the hot hand in sports and why so many fans coaches and broadcasters fervently subscribe to it Why NFL coaches rarely go for a first down on fourth down situations even when their reluctance to do so reduces their chances of winning In an engaging narrative that takes us from the putting greens of Augusta to the grid iron of a small parochial high school in Arkansas *Scorecasting* will forever change how you view the game whatever your favorite sport might be **The Making of a Strike** Doris M Ladd, American Council of Learned Societies, 1988 **How to Make a Revolution** Peter Camejo, 1999 *Annual Report of the Commissioner of*
