Making Of English Towns A Vista Of 2000 Years:

The Making of English Towns David Lloyd,1998 An account of the evolution of English towns this book investigates medieval street plans and houses and looks at the powerful influence which medieval churches had on their towns It charts the dramatic impact of the Industrial Revolution and the development of Georgian London and of country towns The author also re evaluates the underrated contributions of Victorian architects taking his study up to the building of the first garden city This comprehensive account covers over 440 towns over the whole of England and Wales The Image of Georgian Bath 1700-2000 Peter Borsay,2000-07-06 This interdisciplinary study explores the evolution structure and uses of the image of Georgian Bath from its genesis in the eighteenth century to its renaissance in the twentieth century In recent decades there has been both a popular resurgence of interest in heritage and tradition and a growing academic awareness of the power of imagery in shaping the lives of individuals and societies There is perhaps no city in Britain so saturated in history and layered with historic imagery as Bath It therefore provides an ideal case study to investigate the dynamic fusion and impact of the forces of past and representation The dominant perception of Bath today is that of a classical and particularly Georgian city In this stimulating and scholarly study Peter Borsay examines the construction and development of this image Its principal components biography and architecture are explored together with the media through which it was constructed and transmitted as well as its commercial social political and psychological uses Dr Borsay concludes by relating the findings for Bath to current debates on towns heritage and the nature of history The Making of English Towns David W.
