Shah,2009-05 Simple sets of equations were derived to describe the absorption of microwave power MP in 3 region lossy transmission lines in terms of S parameter reflection and transmission amplitudes Different sets of equations were derived to describe different assumptions about the amplitudes of the reflection coefficients at the different boundaries These equations were used to analyze S parameter measurements on a transmission line that had a microfluidic channel in its middle region The channel was empty for one set of measurements and filled with water for a second set of measurements Most of the reflection assumptions considered here produced similar results for the fraction of the applied MP that was absorbed by a water filled microchannel III Your Room at the End Charlie Hudson,2011-07-08 A very thought provoking read Aging and end of life preparation is an important discussion It can help make a difficult time less stressful Sylvia E J Kidd Director of Family Programs Association of the US Army After enduring several painful months witnessing the decline and ultimate death of a loved one author Charlie Hudson recognized that she needed to radically change her views on the realities of aging Known for her easy storytelling style in both fiction and non-fiction Hudson departs from her usual subject matter here tackling aging mental decline and death topics we so often avoid Your Room at the End will help you sidestep the many landmines offering
