Open Mind Discriminating Mind Reflections On Human Possibilities:

Open Mind, Discriminating Mind Charles T. Tart,1992 Homesick Lyla Yastion,2018-09-15 Human induced climate change is emerging as the most critical issue of the modern era Ninety seven percent of climate scientists now confirm that human extraction and burning of fossil fuels along with rampant deforestation is causing a rapid build up of carbon dioxide and other greenhouse gases in air and water These emissions heat up the planet and may be pushing Earth s capacity beyond the threshold at which equilibrium can be restored Global warming is sustained by a global capitalist economy dependent upon the fossil fuel industry and agribusiness both of which are unsustainable The toxic effects of air pollution ocean acidification and soil degradation are harming the health of all species Through an interdisciplinary approach that brings in the perspectives of the physical sciences psychology anthropology economics cultural history and spirituality Homesick investigates the evolutionary path by which human beings have arrived at this precarious juncture It proposes that this perilous detour in human cultural evolution arises from a fallacious belief that the human species unlike other species is not bound by ecological laws but has a special right to control and master the natural world Human beings suffer from the illusion that they are separate from the Earth their planetary home which is perceived as an object a commodity to exploit through technology They have forgotten what indigenous peoples still remember humanity is part of not apart from the natural world Homesick argues that cultural transformation towards a sustainable future is possible when human beings reawaken to Nature as partner and provider As memory of their embeddedness in the natural world is aroused they will experience love and respect for the interdependent web of life that sustains them This reawakening incrementally induces a radical change in thinking within society and sets in motion a paradigm shift Cultural institutions are then reshaped to match this new benign worldview *The Outline of Parapsychology* Jesse Hong Xiong,2010 This work of systematic parapsychology aims to construct a framework and system of parapsychology taking a comprehensive approach to the field The book states that parapsychology has a different philosophical background from the existing science and religions and posits that pantheism could be the theoretical basis of parapsychology Psychology of Meditation S.K. Ghost Talk Robert H. Coddington,2001 There have been many books written about troubled spirits who are trapped on earth and who continue to haunt the living Ghost Talk goes one step further Robert Coddington and his psychic wife Marianne know firsthand that ghosts are among us During a ghost hunt in Richmond Virginia Marianne s body first became the medium for the lost spirit of a teenager named Angelica who forever changed their beliefs about life and death In this spellbinding trip to the other side readers will meet the Coddingtons ghostly subjects in their own words and learn of the Coddingtons extraordinary methods for contacting the lost and frightened souls of the dead Readers will share in another incredible experience how earthbound spirits unaware of their mortal deaths and still trapped on this plane of existence can be guided to the Light The End of Materialism Charles T. Tart,2009 Ideal for scientifically minded individuals curious

about life's spiritual side as well as spiritually inclined people seeking to back up their beliefs this book offers evidence for the existence of telepathy precognition and psychic healing The Psychic's Handbook Julie Soskin, 2012-01-01 Once the seer the priestess and the sage were revered by their community Their roles were considered sacred the practising of an art requiring training and experience like any other art All these individuals tuned into their psycho spiritual powers on our behalf But each of us has always had the ability to draw upon these powers directly inside ourselves This book shows us not only how to exploit our psycho spiritual potential it also shows us how to navigate the different realms of inner experience that are our birthright Psycho spiritual powers can take time and expertise to discern especially for the novice How do we know what we are dealing with Does the information made available to us derive from the subtle energies around the body or does it come from some discarnate being Or perhaps from an alter ego the personification of hopes and fears from aspects of our projected selves This book is drawn from research and first hand experience from thousands of consultations and teaching sessions over many years In addition the author at the end of each chapter uses anecdotes to illustrate and enlighten the reader and these are sometimes humorous sometimes sad sometimes philosophical and always true Well implemented psychic and intuitive guidance can help to move the individual towards wholeness a new dawn based on working with the heart and the energy of unconditional love This in turn radiates out to affect the whole of our society Psycho spiritual powers enlarge our lives beyond measure Julie is preparing those who choose to raise their consciousness and see beyond the immediate The late Eileen Caddy author and co founder of the Findhorn Foundation The Postmodern Brain Gordon G. Globus, 1995-05-18 This interdisciplinary work discloses an unexpected coherence between recent concepts in brain science and postmodern thought A nonlinear dynamical model of brain states is viewed as an autopoietic autorheotic self organizing self tuning eruption under multiple constraints and guided by an overarching optimization principle which insures conservation of invariances and enhancement of symmetries The nonlinear dynamical brain as developed shows quantum nonlocality undergoes chaotic regimes and does not compute Heidegger and Derrida are appropriated as dynamical theorists who are concerned respectively with the movement of time and being Ereignis and text Diff rance The chasm between postmodern thought and the thoroughly metaphysical theory that the brain computes is breached once the nonlinear dynamical framework is adopted The book is written in a postmodern style making playful opportunistic use of marginalia and dreams and presenting a nonserial surface of broken complexity Series A The Five Stages of the Soul Harry R. Moody, David Carroll, 1998-07-13 An exciting exploration of the spiritual passages we go through as we age from midlife crises to the search for inner purpose and the rich possibilities they offer for fulfillment in the life journey Based on twenty years of research The Five Stages of the Soul is the first book to focus squarely on the spiritual passages that the majority of us go through offering readers a detailed road map of their quest for meaning and self discovery Interweaving psychology religion myth and literature Harry Moody in the bestselling tradition of Joseph Campbell Thomas Moore and Scott

Peck charts the passages of countless individuals across the country who have journeyed through the five stages of spiritual awakening common to almost all of us the Call the Search the Struggle the Breakthrough and finally the Return Dr Moody's insightful and wonderfully affirming narrative reveals the challenges and opportunities offered us by the spiritual stages we go through as we explore the question of meaning in our lives **Extra-Planetary Experiences** Thomas James

successful models used by ancient cultures the world over to raise adolescent boys Explains the negative effects of Western youth culture and how it can be transformed Offers instructions for integrating basic rites of passage into modern family life and youth programs For tens of thousands of years all across the globe societies have been coping with raising adolescents Why is it then that native cultures never had the need for juvenile halls residential treatment centers mood altering drugs or boot camps How did they avoid the high incidence of teen violence America is experiencing and how did they prevent their youth from relying on drugs and alcohol the use of which has become so prevalent in Western society In From Boys to Men Bret Stephenson shows readers that older cultures didn't magically avoid adolescence instead they developed successful rituals and rites of passage for sculpting teen boys into healthy young men From Aleutian Eskimos to Polynesian Islanders

from tribal Africans to Australian Aborigines each culture found archetypal ways to initiate their boys into the adult community Stephenson explains the basics of rites of passage and offers insight into how to reintroduce these successful practices and traditional understandings into modern family life and programs for youth He discusses the damaging effects of our youth culture and the negative teen products that are fueled by corporate America and reveals how we can counteract these negative forces by using meaningful rites of passage to create a society with happy and healthy adolescent boys

The Deep Democracy of Open Forums Arnold Mindell, 2002-11-01 Most of us are terrified of conflict says Arnold Mindell PhD author of fifteen books and internationally recognized for his innovative synthesis of Jungian therapy dreams and bodywork But we needn't be His burning passion is to create groups and organizations where everyone looks forward to group processes instead of fearing them He calls this the deep democracy of open forums where all voices thoughts and feelings are aired freely especially the ones nobody wants to hear Since 1992 one of Mindell's prime interests has been the bringing of deeper awareness to group conflicts Conflict work without reference to altered states of consciousness is like a flu shot for someone in a manic or depressed state of consciousness Most group and social problems cannot be well facilitated or resolved without access to the dreamlike and mystical atmosphere in the background The key is becoming aware of it Mindell introduces a new paradigm for working in groups from 3 to 3 000 based on awareness of the flow of signals and events You can take the subtlest of signals indicating the onset of emotions such as fear anger hopelessness and other altered states and use them to transform seemingly impossible problems into uplifting community experiences As Mindell explains I share how everyone people in schools and organizations communities and governments can use inner experiences dreaming and mysticism in conjunction with real methods of conflict management to produce lively more sustainable conscious communities

MOUNTAINS AND MINDS Robert Wheeler, 2010-11-12 History and psychology indicate that people have inherent needs for stimulation and challenge meaning and goals social support moral authority explanation of existence and the possibility of transcendence Whether these needs result from physical evolution or intelligent design they produce a concern about ultimate cause meaning and purpose for existence known as the ontological imperative Since understanding ultimate concerns is beyond physical science elusive and mysterious people tend to attribute explanation to a metaphysical realm resulting in spirituality Mountains symbolize obstacles in meeting the needs and

experiences in climbing mountains provide a vehicle both actually and figuratively for exploring associated mechanisms and impacts Pursuit of the ontological imperative stimulates the attitude of spirituality that becomes conceptualized into personal religious systems forming beliefs that can be shared with others Shared religions acquire dogma structure ritual faith and worship that then become institutional religions As science develops physical explanations supplant metaphysical explanations that many times conflict with religion Faith in established belief competes with science producing a great dilemma A great paradox is that both are needed despite the conflict The first chapter relates a personal experience climbing Mount Fuji that nearly ended in disaster with the question of why people do such things Chapter 2 is a brief summary of research supporting the human need of stimulation and challenge Subsequent chapters alternate between mountain climbing experiences and brief summaries of research about why people continue to pursue difficult tasks progressing from stimulation emotions consciousness search for ultimate reality involving ontological imperative spirituality personal religion and institutional religion and finally to pragmatic reality involving science religion dilemma and need for both paradox This bottom up approach leads to the final chapter s proposal for ameliorating conflict and dilemma caused by some religious beliefs by accepting the great paradox and pursuing a seemingly unattainable goal recognizing personal characteristics of spirituality exemplified in the five factor model of personality adopting an attitude of agnosticism whereby the limitations of present knowledge are acknowledged and accepting ecumenical humanism whereby alternate beliefs are tolerated Such an approach might be classified as pragmatic pluralism A basic theme is that for life to be meaningful and manageable people need a sense of purpose and coherence that is best met by having a belief about the unknown and doubt of its validity Contact author at wheelerrj@juno.com *The Tao of Liberation* Mark Hathaway, Leonardo Boff, 2009 Drawing on insights from quantum physics deep ecology and the new cosmology they articulate a new vision of liberating action Hathaway and Boff lay out a path of spiritual renewal ecological transformation and authentic liberation
