Organizing Special Education Needs A Critical Approach

Madeleine Arnot, Len Barton

Organizing Special Education Needs A Critical Approach:

Organizing Special Education Needs Andrea Freeman, Harry Gray, 1989-10-28 This book provides a general overview of the major issues concerning special educational needs and how appropriate educational provision can be organized and managed in the school system It is written from a perspective in which the needs of the child are paramount The book explains how children may be manipulated and misused in the school system where elements such as professional interests and administrative convenience tend to influence decision making Special needs are defined in the broadest sense and the general principles outlined and discussed are those which would be applied in any humanistic and student centred systems

Support Services and the Curriculum Penny Lacey, Jeanette Lomas, 2013-11-26 This work on support services for special education needs offers an overview of current practice along with details of current stumbling blocks It then deals with working with the whole child within the curriculum training needs and developing an action plan to find the way forward

Nurture Groups in School and at Home Paul Cooper, Yonca Tiknaz, 2007 The authors present evidence of the success of nurture groups and examine what factors affect the success of the group From this they draw key messages for effective practice including the importance of recognising a child's emotional needs and meeting them and the role of the relationship between the teaching staff co-ordinating the group

Special Educational Needs and Inclusive Practices Fabio Dovigo, 2017-01-28 Today school is becoming a rapidly changing learning environment Thinking about students as a homogeneous population is no longer allowed as diversity in terms of culture language gender family organisation learning styles and so on has emerged as a key challenge for education today The debate on Special Educational Needs largely reflects this challenge as working in school implies careful reconsideration of what we mean by normal and special Current educational intervention is generally based on a deficit and within child model of facing SEN whereas very little attention is given to the role of learning environments The focus is on the child more than on the whole class and on cognition and technical provisions more than on affective sociocultural and community dimensions of learning Conversely regarding students and their needs as hidden voices allows us to adopt a transformative approach which sees diversity as a stimulus for the development of educational practices that might benefit all children and help school to become an inclusive and moving organisation The aim of the book is twofold on the one hand it offers a systematic overview of the inclusive education state of the art in six countries Germany Italy Norway Sweden UK and USA based on the contributions by well known scholars such as Christy Ashby Barbara Brokamp Fabio Dovigo Kari Nes Mara Westling Allodi Tony Booth and Beth Ferri on the other hand the book analyses five cases of good practices of inclusion related to different subjects and school levels

Visual Impairment Heather Mason, Stephen McCall, 2013-05-24 First published in 1998 This book embodies the positive philosophy that children with a visual impairment are entitled to access to the full national curriculum during their school years In the UK education placements for pupils and students with special needs range across a continuum from special schools and

colleges with day or residential attendance to specialist units or individual integration into mainstream provision Placement results from inter disciplinary assessment and consultation and requires parental agreement Lack of sight and measurably impaired vision constitute special needs in educational terms The writers who have contributed to this major text are teachers and lecturers from both the specialist and mainstream areas of provision and have considerable first hand

experience in teaching pupils and students with a visual impairment **The SAGE Handbook of Special Education** Lani Florian,2013-12-14 The second edition of The SAGE Handbook of Special Education provides a comprehensive overview of special education offering a wide range of views on key issues from all over the world The contributors bring together up to date theory research and innovations in practice with an emphasis on future directions for the role of special education in a global context of inclusion This brand new edition features New chapters on families interagency collaboration and issues of lifelong learning The UN Convention on the Rights of Persons with Disabilities Policy reform proposals Equity and social justice in education The impact of new thinking on assessment Issues and developments in classification The preparation and qualifications that teachers need The Handbook s breadth clarity and academic rigour will make it essential reading for researchers and postgraduate students and also for practitioners teachers school managers and administrators
