Patient Care In Neurology:

Patient Care in Neurology Adrian C. Williams, 1999 This book addresses modern attitudes to and management of the common neurological conditions reflecting the shift in clinical neurology from being a largely diagnostic service to becoming a specialty based on treatment longterm education and support of patients Throughout the emphasis is on developing a close working relationship between neurologists psychiatrists rehabilitation staff and specialist nurses and the importance of the team approach to patient care including consideration of the patient's own experience of their situation and the role of community services such as lay societies and charities This is the only text presenting this holistic approach to neurological care The aim of this book is to stimulate debate about the best service provision for neurology covering considerations relevant to the commissioning of services running outpatient clinics transcultural issues and the role of the nurse specialist The book assesses the role of neurogenetics in preventive neurology and opportunities for the continued application of gene therapy techniques Also covered are the psychosomatic conditions often faced by a neurologist and the management of the secondary psychological results of organic neurological disease

Intensive Care in Neurology and Neurosurgery Daniel Agustin Godoy, Gustavo Rene Piñero, 2013-03 Neuromonitoring is the tool of trade in intensive care and should incorporate cutting edge technology with patience repeated clinical observation careful identification of neuroworsening The aim of the book is to be of practical use and to assist the clinical

practice of the busy physician The clinical examination belongs to the introductory section of the book and an abundance of technology with specific emphasis on the importance of intracranial pressure comes in the following parts Since the patient with an injured brain can have chances only if other organs and systems as the lungs and the acid base equilibrium etc are preserved a section of the book covers the interactions between the affected brain and other organs The way the brain reacts to different insults has common aspects as inflammatory responses edema etc but also specific features Sections five to nine summarize the most relevant pathologies from ischemic to hemorrhagic lesions trauma tumors etc and also mentions new comers as the specific problems related to the expanding field of neuroradiological interventions Finally neurointensive care does not exist without knowledgeable nurses The intracranial pressure measurement starts or unfortunately ends with a catheter well maintained and that becomes vital when the drainage of hydrocephalus is concerned Dealing with patients with severe brain damage has plenty of ethical implications up to the problems related to brain death and organ donation This book is published in two volumes *Hankey's Clinical Neurology* Philip B. Gorelick, Fernando D. Testai, Graeme J.

Hankey, Joanna M. Wardlaw, 2020-12-29 The rapid expansion of clinical knowledge in the field of neurology warrants a new edition of this highly regarded textbook of neurology In addition to the anchor chapters on major areas such as headache stroke developmental disorders dementia epilepsy acquired metabolic disorders and others several new chapters have been added to meet the clinical demand for those in practice This edition features new chapters on neurotoxicology neuroimaging and neurogenetics including basic and more advanced concepts for the practitioner Finally as the health care system continues to evolve a new chapter on population health and systems of care reflects current practice in team care patient centric approaches and value based care Pithy bullet points and standard prose allow the reader to assimilate concepts and key messages with ease Summary tables neuroimages photomicrographs neuroanatomic drawings gross and microscopic neuropathologic specimen photos graphics and summary boxes further enhance the text Chapters are crafted in a way to appeal to both the visuospatial and analytic functional centers of the brain as we stimulate the senses and learn Hankey's Clinical Neurology Third Edition will be of value to medical students physicians in training neurology fellows neurologist and neurosurgeon practitioners and advanced practice professionals e g nurse practitioners and physician assistants who are faced with neurologic practice challenges **Advocacy in Neurology** Wolfgang Grisold, Walter Struhal, Thomas

Grisold, 2019-02-07 Advocacy is a broad term that covers activities aimed at increasing attention awareness information nursing treatment and support to improve the outcome of patients These actions can be focused directly towards patients or indirectly via third parties Although advocacy is present in all medical specialties neurology in particular finds itself in need of strong advocacy tools as the diagnosis treatment long term care and associated resource and social issues have become increasingly complex While some physicians implicitly or explicitly act as advocates there is a lack of holistic research in order to clarify the meaning of advocacy along with concrete methods and strategies Advocacy in Neurology provides an

integrated approach to the concept of advocacy in neurology Structured in five sections the book begins by explaining the term advocacy in general before elaborating on the areas of interest within neurology The text goes on to offer concrete strategies and tools for clinicians to deploy advocacy in their daily work and then discusses specific neurological diseases to point out and explain where advocacy is or could be beneficial The book ends with an outlook presentation of results and an ending conclusion Advocacy in Neurology offers a practical perspective on advocacy activities in neurology aiming to show when and why they are important for neurology

Clinical Neurology of Aging Martin Albert, MD, PhD, FAAN,Janice Knoefel, MD, MPH,2011-01-11 Clinical Neurology of Aging Third Edition continues the tradition of the First 1984 and Second 1994 editions with 60 chapters written by the world s elite clinicians from neurology geriatrics and research on all aspects of geriatric neurology Aging does not automatically imply decline Many older people find joy in their friendships and their willingness to look at the world with a calmer view than they may have had in youth This clinically focused book is designed to help clinicians help older persons maintain that joy Now divided into 9 comprehensive sections the Third Edition contains subjects ranging from geriatric assessment to pain management and palliative care Specific sections include Introduction to Geriatric Neurology Neurological Assessment in Aging Cognitive Disorders in Aging Motor Disorders in Aging Neuropsychiatric Illness in Aging Sensory Disturbance in Aging Peripheral Neurology of Aging Disease States in Elderly and Neurological Therapeutics With a deft touch the editors Drs Martin Albert and Janice Knoefel have incorporated the geriatric care perspective and a quality oriented approach to health care throughout the volume The result the definitive reference useful for all clinicians caring for older people and informative to those who set policies that affect research and clinical practice

Neurological Disorders World Health Organization,2006 Although there are several gaps in understanding the many issues related to neurological disorders we know enough to be able to shape effective policy responses to some of the most common This book describes and discusses the increasing public health impact of common neurological disorders such as dementia epilepsy headache disorders multiple sclerosis neuroinfections neurological disorders associated with malnutrition pain associated with neurological disorders Parkinson s disease stroke and traumatic brain injuries It provides information and advice on public health interventions that may reduce their occurrence and consequences and offers health professionals and planners the opportunity to assess the burden caused by these disorders The clear message that emerges is that unless immediate action is taken globally the neurological burden is likely to become an increasingly serious and unmanageable

The Practice of Emergency and Critical Care Neurology Eelco F. M. Wijdicks,2024-08 The Practice of Emergency and Critical Care Neurology is the classic and comprehensive reference for physicians caring for patients with critical neurologic disorders at risk of deterioration and in need of immediate attention This third edition is richly illustrated and contains new chapters on the basics of neuroimaging pharmacology issues in the intensive care setting intoxications critical care ultrasound and more

The Practice of Emergency and Critical Care Neurology Eelco F. M. Wijdicks, MD, PhD, FACP,2010-06-22 The Practice of Emergency and Critical Care Neurology serves as the definitive authoritative reference on the care of the patient with a critical neurologic disorder at risk of deterioration and in need of immediate attention This

work is an expanded new edition of the book on the management of patients with critical neurologic disorders. This single authored monograph is broad in scope and follows the patients from the very moment they enter the emergency department to their care in the neurosciences intensive care unit. This book condenses the essential information into several sections. These are: The General Principles of Recognition of Critically Ill Neurologic Patients in the Emergency Department; The Evaluation of Presenting Symptoms Indicating Urgency and Critical Emergency; General Principles of Management of Critically Ill Patients; Monitoring Devices and Diagnostic Tests; Complete Management of Specific Disorders in the Neurosciences Intensive Care Unit; Postoperative Neurosurgical and Neurointerventional Complications; Management of Medical Complications; and End of Life Care. This accessibly written book differs from the conventional by specifically following the time course of clinical complexities as they emerge and change. It offers advice on how to diagnose and manage acute neuromuscular respiratory failure, acute worrisome headache, acute febrile confusion, acute diplopia, acute movement disorders, acute paraplegia, seizures, and coma of uncertain cause in the emergency department. The major disorders requiring neurocritical care are covered in great detail and include traumatic brain injury, aneurysmal subarachnoid hemorrhage, cerebral hemorrhage, hemispheric ischemic stroke, basilar artery occlusion, acute bacterial meningitis, and encephalitis, myasthenic crisis, and severe Guillain Barre syndrome. This book comes with a pocket book of selected tables and figures. This booklet covers all essential points for quick reference and has been considered a survival guide for the house staff.
