Introductory Concepts in Information Science Melanie Norton, Melanie J. Norton, 2000 Presents a unique and carefully researched introduction to the practical and theoretical concepts of information science and examines the impact of the Information Age on society and its institutions Drawing on recent research into the field as well as from scholarly and trade publications the monograph provides a brief history of information science and coverage of key topics including communications and cognition information retrieval bibliometrics modeling economics information policies and the impact of information technology on modern management An essential volume for graduate students practitioners and any professional who needs a solid grounding in the field of information science **Access Services in Libraries** Gregg Sapp, 2019-12-05

This book first published in 1992 establishes a theoretical base for access services while also suggesting connections between theory and practice It provides fresh thinking that re examines previous writings in this area presents new experimental designs and results creates contemporary organizational solutions and adopts innovative techniques for increasing users access to library materials within constrained budgets Access services librarians circulation department librarians and library managers especially those who are considering a reorganization that will include access services will benefit from the philosophical and theoretical articles as well as practical advice on the design delivery and evaluation of responsive library services Chapters in this invaluable book fill the gap in the literature about access services including theoretical descriptions of access services current developing trends in access services the historical development of the access services concept practical studies related to common access services issues and projections of future challenges

Systems Librarian Thomas C. Wilson, 1998-08 Guided by the editorial support of colleagues in the Library and Information Technology Association LITA author Tom Wilson head of systems at University of Houston Libraries demystifies this critical specialty In clear nontechnical language Wilson answers the befuddling question What is a systems librarian Wilson lays no claim to the one right answer Instead The Systems Librarian Designing Roles Defining Skills will lead you in formulating your own answer which is the first step to making sound decisions Managing the Economics of Owning, Leasing and Contracting Out Information Services Anne Woodsworth, James F. Williams II, 2018-10-26 First published in 1993 the purpose of this book is to identify and describe the most important factors that must be considered in making decisions about the optimal ways to provide access to information in short the best way to use the humans the machines and the intangible resources known as information particularly at the organizational level In recent years executives have begun to outsource computing and telecommunications functions primarily to control costs Traditional libraries and information centres have been disbanded in favour of service contracts or outright leasing of staff Both the public and private sectors are examining their information service operations from the point of view of cost effectiveness Decisions about owning versus leasing of information are being made daily Decision makers are finding that they must deal differently with funding and

budgeting of information systems and libraries from their earlier practice New paradigms for these service functions already exist Not only have corporations and governments begun to contract out entire information service operations but libraries themselves have begun to consider the costs effectiveness and implications of outsourcing some of their operations and services This book provides a framework for decision makers to view and review information services within their organizations Entire units components of libraries and information centres are defined and untangled so that the widest variety of organizations can analyse their own environments Each chapter is accompanied by comments from a broad range of experts in the information field

Patterns and Options for Managing Information Technology on Campus Anne Woodsworth,1991 In colleges and universities information technology IT has become a key factor in the execution of day to day operations as well as the promotion of goals and missions As a variety of technologies are put into place in many areas of the campus from the dorm room to the dean s office the need for cohesion and co operation among these systems has increased and effective management of IT has become critical
