Guide to College Writing Assessment Peggy O'Neill, Cindy Moore, Brian Huot, 2009-04-15 While most English professionals feel comfortable with language and literacy theories assessment theories seem more alien English professionals often don't have a clear understanding of the key concepts in educational measurement such as validity and reliability nor do they understand the statistical formulas associated with psychometrics But understanding assessment theory and applying it by those who are not psychometricians is critical in developing useful ethical assessments in college writing programs and in interpreting and using assessment results A Guide to College Writing Assessment is designed as an introduction and source book for WPAs department chairs teachers and administrators Always cognizant of the critical components of particular teaching contexts O'Neill Moore and Huot have written sophisticated but accessible chapters on the history theory application and background of writing assessment and they offer a dozen appendices of practical samples and models for a range of common assessment needs Because there are numerous resources available to assist faculty in assessing the writing of individual students in particular classrooms A Guide to College Writing Assessment focuses on approaches to the kinds of assessment that typically happen outside of individual classrooms placement evaluation exit examination programmatic assessment and faculty evaluation Most of all the argument of this book is that creating the conditions for meaningful college writing assessment hinges not only on understanding the history and theories informing assessment practice but also on composition programs availing themselves of the full range of available assessment practices

Reconstructing Response to Student Writing Dan Melzer, 2023-08-07 In *Reconstructing Response to Student Writing* Dan Melzer makes the argument that writing instructors should shift the construct so that peer response and student self assessment are more central than teacher response Presenting the results of a national study of teacher and peer response and student self assessment at institutions of higher education across the

United States Melzer analyzes teacher and peer response to over 1 000 pieces of student writing as well as 128 student portfolio reflection essays He draws on his analysis and on a comprehensive review of the literature on response to introduce a constructivist heuristic for response aimed at both composition instructors and instructors across disciplines Melzer argues that teachers and researchers should focus less on teacher response to individual pieces of student writing and more on engaging in dialogue with student self assessment and peer response focusing on growth and transfer rather than products and grades *Reconstructing Response to Student Writing* especially when taken together with Melzer's previous book *Assignments across the Curriculum* provides a comprehensive and large scale view of college writing and responding across the curriculum in the United States

First-Year University Writing L. Aull, 2015-03-04 *First Year Writing* describes significant language patterns in college writing today how they are different from expert academic writing and how to inform teaching and assessment with corpus based linguistic and rhetorical genre analysis

Bulletin Midwest Modern Language Association, 1982

Assignments across the Curriculum Dan Melzer, 2014-08-15 In *Assignments across the Curriculum* Dan Melzer analyzes the rhetorical features and genres of writing assignments through the writing to learn and writing in the disciplines perspectives Presenting the results of his study of 2 101 writing assignments from undergraduate courses in the natural sciences social sciences business and humanities in 100 postsecondary institutions in the United States *Assignments across the Curriculum* is unique in its cross institutional breadth and its focus on writing assignments The results provide a panoramic view of college writing in the United States Melzer's framework begins with the rhetorical situations of the assignments the purposes and audiences and broadens to include the assignments genres and discourse community contexts Among his conclusions is that courses connected to a writing across the curriculum WAC initiative ask students to write more often in a greater variety of genres and for a greater variety of purposes and audiences than non WAC courses do making a compelling case for the influence of the WAC movement Melzer's work also reveals patterns in the rhetorical situations genres and discourse communities of college writing in the United States These larger patterns are of interest to WAC practitioners working with faculty across disciplines to writing center coordinators and tutors working with students who bring assignments from a variety of fields to composition program administrators to first year writing instructors interested in preparing students for college writing and to high school teachers attempting to bridge the gap between high school and college writing
