Patterns In Chinas Use Of Force Evidence From History And Doctrinal Writings:

Patterns in China's Use of Force Mark Burles, Abram N. Shulsky, 2000 The People's Republic of China has often used force in ways that surprised and perplexed other countries. The Chinese appear to believe that by carefully designing military operations to achieve maximum political effect they can successfully use force even when the overall military balance is unfavorable. China's past successes in using force in this way while avoiding a massive reaction from its adversaries may give it confidence that it can succeed in the future as well. And China may feel that it can afford to accept greater risks. Many of the past uses of force occurred when China either was not a nuclear power or did not have a secure nuclear second strike capability. The possession of strategic nuclear weapons may enable the Chinese leadership to run risks that it otherwise could not. This is tempered however by the facts that China ran its past risks when it had some degree of support from one superpower against the other and that after decades of economic development China now has more to lose if it underestimates the risks.

China's Use of Military Force Andrew Scobell, 2003-09-08 In this unique study of China's militarism Andrew Scobell examines the use of military force abroad as in Korea 1950 Vietnam 1979 and the Taiwan Strait 1995 1996 and domestically as during the Cultural Revolution of the late 1960s and in the 1989 military crackdown in Tiananmen Square. Debunking the view that China has become increasingly belligerent in recent years because of the growing influence of soldiers Scobell concludes that China's strategic culture has remained unchanged for decades. Nevertheless the author uncovers the existence of a Cult of Defense in Chinese strategic culture. The author warns that this Cult of Defense disposes Chinese leaders to rationalize all military deployment as defensive while changes in the People's Liberation Army's doctrine and capabilities over the past two decades suggest that China's twenty-first century leaders may use military force more readily than their predecessors.

China's Use of Military Force in Foreign Affairs Markus B. Liegl, 2017-03-16 This book explains why China has resorted to the use of large scale military force in foreign affairs. How will China use its growing military might in coming crisis and existing conflicts? This book contributes to the current debate on the future of the Asia Pacific region by examining why China has resorted to using military force in the past. Utilizing fresh theoretical insights on the causes of interstate war and employing a sophisticated methodological framework the book provides detailed analyses of China's intervention in the Korean War the Sino Indian War China's border clashes with the Soviet Union and the Sino Vietnamese War. It argues that China did not employ military force in these wars for the sake of national security or because of material issues under contestation as frequently claimed. Rather the book's findings strongly suggest that considerations about China's international status and relative standing are the principal reasons for China's decision to engage in military force in these instances. When reflecting the study's central insight back onto China's contemporary territorial conflicts and problematic bilateral relationships it is argued that the People's Republic is still a status seeking and thus highly status sensitive actor. As a result China's status ambitions should be very carefully observed.

and well taken into account when interacting with the PRC This book will be of much interest to students of Chinese foreign policy Asian politics military and strategic studies and IR in general **Parameters** ,2001 *China's Crisis Behavior* Kai He,2016-04-07 Since the end of the Cold War China has experienced several notable interstate crises the 1999 embassy bombing incident the 2001 EP 3 mid air collision with a United States aircraft and the Diaoyu Senkaku dispute with Japan China s response to each incident however has varied considerably Drawing from a wealth of primary sources and interviews this book offers a systematic analysis of China s crisis behavior in order to identify the factors which determine when Chinese leaders decide to escalate or scale down their response to crises Inspired by prospect theory a Nobel Prize winning behavioral psychology theory Kai He proposes a political survival prospect model as a means to understand the disparities in China s behavior He argues that China s response depends on a combination of three factors that shape leaders views on the prospects for their political survival status including the severity of the crisis leaders domestic authority and international pressure **China's Asia Pacific Strategy and India** N K Tripathi,2010-11-11 The book is a project of United Service Institution of India **Competitive Strategies for the 21st Century** Thomas G. Mahnken,2012-08-08 The U S today faces the most complex and challenging security environment in recent memory even as it deals with growing constraints on its ability to respond to threats Its most consequential challenge is the rise of China which increasingly has the capability to deny the U S access to areas of vital national interest and to undermine alliances that have underpinned regional stability for over half a century Thus the time is right for the U S to adopt a long term strategy for dealing with China one that includes but is not limited to military means and that fully includes U S allies in the region This book uses the theory and practice of peacetime great power strategic competition to derive recommendations for just such a strategy After examining the theory of peacetime strategic competition it assesses the U S China military balance in depth considers the role of America s allies in the region and explores strategies that the U S could adopt to improve its strategic position relative to China over the long term **China's Modernizing Military** Kenneth S. Fu,2001 Does China have the military capability to threaten Taiwan What are China s intentions with its newly modernizing military How much of a threat does that pose to the United States The assumption generally is that the United States will intervene in some form in the event that China attacked Taiwan But what if the U S does not intervene and Taiwan does not succumb to threats alone Can China back up its threats and succeed in an invasion of Taiwan using only its conventional forces How successful has the PLA modernization drive been so far and what promise does it hold in the next few years to achieve the objective of taking Taiwan back by force The purpose of this thesis is to measure the results of China s military modernization efforts and determine if the PLA has the capability to defeat Taiwan in a conventional war and succeed in an invasion of the island Abstract from web site **Principles And Laws In World Politics: Classical Chinese Perspectives On Global Conflict** Walter Wan Fai Lee,2021-12-02 The search for universal principles and laws in world politics is a colossal common task for all civilisations It should not be monopolised by

the Western liberal paradigm Thirty years after the end of the Cold War global conflicts have been satisfactorily resolved neither by communism nor liberalism Humanitarian intervention now under the cover of the responsibility to protect R2P has destabilised many societies leaving justice undone This inspiring book invites debates on the post liberal imagination of emancipated Leviathan an almighty political authority which exercises awe and force to restore order as well as enshrines globally negotiated values of common conscience and reinvented cosmopolitanism Human well being will truly become reality when we synergise pre modern and pre liberal ways of thinking worldviews ethics and aesthetic styles by means of cross civilisational cross disciplinary fundamental research and let an emancipated Leviathan exercises principles and laws of virtue derived from the study The starting point of such intellectual innovation is China This book explores the application of classical Chinese resources to the innovation of thoughts in contemporary Chinese international relations IR It examines whether Knowledge Archaeology of Chinese International Relations KACIR coined by the author responds sensibly to today s issues of international ethics and global justice The book contends that emancipative hermeneutics holds the key to the Chinese soft power puzzle A bottom up non nationalistic and non ethnocentric approach to the Chinese civilisation will reinvent intellectual pluralism and cosmopolitan elements in the Chinese tradition that interact constructively with and ultimately transcend the liberal Western model Strolling from contemporary IR back to ancient Chinese philosophy then striding into the future searching for common principles and laws this insightful book is a must read for those who want to reflect on global conflicts in this era of great uncertainty and transformation as well as those who love to make our world a better place to live in

The U.S. Army in Asia, 2030-2040 Terrence K. Kelly,James Dobbins,David A. Shlapak,David C. Gompert,Eric Heginbotham,Peter Chalk,Lloyd Thrall,2014-08-22 Looking to the 2030 2040 time frame U S policy and military strategy will need to strike a balance among maintaining a cooperative relationship with China deterring Chinese aggression in regional disputes and preparing for the possibility that China could become more assertive The U S Army will have an important role to play in preparing for these developments and for protecting and furthering U S interests in the region

Thinking Beyond Boundaries Hugh Liebert,John Griswold,Isaiah Wilson,2015 Since future political and military leaders as well as policymakers will face the challenge of collective action within the confines of an uncoordinated international system the book urges them to consider what role domestic and foreign factors should play in their decision making processes

Nuclear Deterrence in the 21st Century Thérèse Delpech,2012-03-28 Deterrence remains a primary doctrine for dealing with the threat of nuclear weapons in the 21st century The author reviews the history of nuclear deterrence and calls for a renewed intellectual effort to address the relevance of concepts such as first strike escalation extended deterrence and other Cold War era strategies in today s complex world of additional superpowers smaller nuclear powers and nonstate actors

The United States and Asia ,2001 Publisher Provided Annotation The past 20 years have been a time of relative peace in Asia and notwithstanding the 1997 1998 financial crisis a period of robust economic growth as

well Currently however Asia is beset by a variety of problems that could well imperil the stability it has long enjoyed including territorial disputes nuclear rivalry rising nationalist sentiments and increased military capabilities This report summarizes the manner in which the United States can best meet these challenges and thereby ensure continued peace and stability in the region In the interests of this goal the report outlines an integrated political military and economic strategy that the United States can pursue to inhibit the growth of rivalries in Asia and more broadly prevent the rise of instability in the region Also delineated are changes in U S military posture that will be made necessary by this strategy

Shaking the Heavens and Splitting the Earth Roger Cliff, 2011 Less than a decade ago China's air force was an antiquated service equipped almost exclusively with weapons based on 1950s era Soviet designs and operated by personnel with questionable training according to outdated employment concepts Today the People's Liberation Army Air Force PLAAF appears to be on its way to becoming a modern highly capable air force for the 21st century This monograph analyzes publications of the Chinese military previously published Western analyses of China's air force and information available in published sources about current and future capabilities of the PLAAF It describes the concepts for employing forces that the PLAAF is likely to implement in the future analyzes how those concepts might be realized in a conflict over Taiwan assesses the implications of China implementing these concepts and provides recommendations about actions that should be taken in response

Dangerous Thresholds Forrest E. Morgan, Karl P. Mueller, Evan S. Medeiros, Kevin L. Pollpeter, Roger Cliff, 2008-07-29 Escalation is a natural tendency in any form of human competition and today's security environment demands that the United States be prepared for a host of escalatory threats This analysis of escalation dynamics and approaches to escalation management draws on a range of historical examples from World War I to the struggle against global Jihad to inform escalation related decisionmaking

International Law, Conflict and Development Walter Kälin, Robert Kolb, Christoph Spenlé, Maurice Voyame, 2010-01-11 Experience and research have long shown an intrinsic link between human rights conflict and development This interdependence between different areas doctrines and disciplines calls for a genuinely coherent holistic approach in International Affairs With the challenges the work for the protection and respect of humanity encounters this book intends to bring together articles and ideas that indicate the complexity of such an endeavor The chapters written by academics and practitioners encompass snapshots of crucial development lines as well as conceptual ideas and frameworks In doing so the book provides insight to the principal understanding that peace efforts encapsulating human rights conflict management and development can only be sustained and flourish as long as conflicting parties have at least a minimal consensus and will to settle their differences peacefully As a Liber Amicorum for Joseph Voyame the book honors the determination for humanity and respect for human dignity and peaceful mitigation of conflict which marked his life and work

The U.S. Army and the Asia-Pacific Andrew Scobell, The United States has key economic and security interests in the Asia Pacific region In recent decades the Asia Pacific has experienced rapid economic growth a wave of

democratization and the emergence of a web of regional and sub regional multilateral institutions All these developments have contributed to enhancing the pace and prosperity of the region The author highlights the significant and ongoing contribution of the U S Army in deterring war executing smaller scale contingencies and shaping the security environment He advocates a robust pro active Army presence for the foreseeable future Such a presence will ensure the promotion and protection of U S national interests in the region

Power and Responsibility in Chinese Foreign Policy Yongjin

Zhang,Greg Austin,2014-01-10 The People s Republic of China is now over fifty years old Long considered an outsider or a club of one in international relations China has recently become more active in international institutions Is China becoming a responsible power in global and regional international relations How accurate is the traditional perception of China What factors may be motivating the changes in China s approach to international institutions and its perceptions of its own role in the world There is no certainty that China is becoming a more responsible power recent developments may be just another manifestation of realpolitik Power and Responsibility in Chinese Foreign Policy provides a vital insight into these issues analysing the critical issues in China s international relations China s regional and global diplomatic and security problems the changing role of the People s Liberation Army human rights religious and democratic movements and the concept of responsibility Power and Responsibility in Chinese Foreign Policy is an insightful and vital introduction to all sides of the current debate over China s international relations

Interpreting China's Grand Strategy Michael D. Swaine,Sara A. Daly,Peter W. Greenwood,2000-03-22 China s continuing rapid economic growth and expanding involvement in global affairs pose major implications for the power structure of the international system To more accurately and fully assess the significance of China s emergence for the United States and the global community it is necessary to gain a more complete understanding of Chinese security thought and behavior This study addresses such questions as What are China s most fundamental national security objectives How has the Chinese state employed force and diplomacy in the pursuit of these objectives over the centuries What security strategy does China pursue today and how will it evolve in the future The study asserts that Chinese history the behavior of earlier rising powers and the basic structure and logic of international power relations all suggest that although a strong China will likely become more assertive globally this possibility is unlikely to emerge before 2015 2020 at the earliest To handle this situation the study argues that the United States should adopt a policy of realistic engagement with China that combines efforts to pursue cooperation whenever possible to prevent if necessary the acquisition by China of capabilities that would threaten America s core national security interests and to remain prepared to cope with the consequences of a more assertive China
