Urban Futures for Central Canada Larry S. Bourne, Ross D. MacKinnon, Jay Siegel, James W. Simmons, 1974-12-15

Urban problems are now a dominant social issue; the essays in this volume consider the direction some of these problems may take in Central Canada. Three broad themes are discussed: forecasting a spectrum of methodologies and urban forecasts; assessing the consequences of these forecasts at two levels: the growth of cities as an urban system and the growth and form of individual cities or urban regions; and assessing the role of changes in public policy. Specific topics include forecasting methodology in a spatial context; population and employment growth; migration; transportation innovations; communication linkages; regional economic structure; economic fluctuations; the effects of public policy controls within a system of cities; land use and redevelopment; household mobility; and social change; the spread of urban fields and communities and neighbourhoods within cities.
