## **Patterns Of Time In Hospital Life A Sociological Perspective:**

*Patterns of Time in Hospital Life* Eviatar Zerubavel, 1979-01 This volume presents an original study in the sociology of time a case description and conceptual analysis of the ways in which the temporal frameworks we customarily take for granted structure social reality The study is based on the author's observation of the activities of medical professionals in a large teaching hospital there he collected data to show that the rhythms of organizational life have particular moral and cognitive dimensions beyond simple regulative functions While individuals customarily adapt to a variety of contexts for anchoring events in time the temporal coordination necessary for collective efforts enforces social controls at multiple levels This sociotemporal order an inherent constituent of social life offers researchers and theoreticians alike a fresh and rewarding analytic perspective *Patterns of Time* will be valued for its several distinctive achievements Foremost among these is a demonstration of the importance of temporality as a topic in its own right Because measurements of time are a commonplace of social life sociologists have tended to ignore the significance of temporality as a feature of social organizations Zerubavel's work is a corrective to this neglect In addition the author's imaginative integration of ethnographic description and theoretical analysis bridges the gap between contrasting methods that has characterized much recent sociological and anthropological work Finally because of the author's selection of the hospital setting sociologists of medicine and the professions will find his study useful for its rich and well observed ethnography as well as its novel analytical approach *Patterns of Time in Hospital Life. A Sociological Perspective*, 1979 **Time Maps** Eviatar

Zerubavel, 2012-06-12 The pioneering sociologist and author of *The Seven Day Circle* continues his analysis of time with this fascinating look at history as social construct Who were the first people to inhabit North America Does the West Bank belong to the Arabs or the Jews Why are racists so obsessed with origins Is a seventh cousin still a cousin Why do some societies name their children after dead ancestors As Eviatar Zerubavel demonstrates in *Time Maps* we cannot answer burning questions such as these without a deeper understanding of how we envision the past In a pioneering attempt to map the structure of collective memory Zerubavel considers the cognitive patterns we use to organize the past and the social grammar of conflicting interpretations of history Drawing on fascinating examples that range from Hiroshima to the Holocaust and from ancient Egypt to the former Yugoslavia Zerubavel shows how we construct historical origins how we tie discontinuous events together into stories how we link families and entire nations through genealogies and how we separate distinct historical periods from one another through watersheds such as the invention of fire or the fall of the Berlin Wall *Time Maps* extends beyond all of the old clichés about linear circular and spiral patterns of historical process and provides us with models of the actual legends used to map history brilliant and elegant Hayden White University of California Santa Cruz

**The Erosion of Autonomy in Long-term Care** Charles W. Lidz, Lynn Fischer, Robert M. Arnold, 1992 In few places in American society are adults so dependent on others as in nursing homes Minimizing this dependency and promoting

autonomy has become a major focus of policy and ethics in gerontology Yet most of these discussions are divorced from the day to day reality of long term care and are implicitly based on concepts of autonomy derived from acute medical care settings Promoting autonomy in long term care however is a complex task which requires close attention to everyday routines and a fundamental rethinking of the meaning of autonomy This timely work is based on an observational study of two different types of settings which provide long term care for the elderly The authors offer detailed descriptions of the organizational patterns and routine practices that erode autonomy of the elderly Their observations lead to a substantial rethinking of what the concept of autonomy means in long term care The book concludes with suggestions on how the autonomy of elderly individuals in long term care institutions might be promoted

*Hidden in Plain Sight* Eviatar Zerubavel, 2015-03-13 Many of us take for granted that what we perceive is a completely accurate representation of the world around us Yet we have all had the experience of suddenly realizing that the keys or glasses that we had been looking for in vain were right in front of us the whole time The capacity of our sense organs far exceeds our mental capabilities and as such looking at something does not guarantee that we will notice it Our minds constantly prioritize and organize the information we take in bringing certain things to the foreground while letting others that which we deem irrelevant recede into the background What ultimately

determines what we perceive and what we do not In this fascinating book noted sociologist Eviatar Zerubavel argues that we perceive things not just as human beings but as social beings Drawing on fascinating examples from science the art world optical illusions and all walks of life he shows that what we notice or ignore varies across cultures and throughout history and illustrates how our environment and our social lives everything from our lifestyles to our professions to our nationalities play a role in determining how we actually use our senses to access the world A subtle yet powerful examination of one of the central features of our conscious life this book offers a way to think about all that might otherwise remain hidden in plain sight

looking for a clear overview of the field      **Comparing the Democratic Governance of Police Intelligence** Thierry Delpeuch, Jacqueline E. Ross, 2016-08-26 Intelligence led policing is an emerging movement of efforts to develop a more democratic approach to the governance of intelligence by expanding the types of expertise and the range of participants who collaborate in the networked governance of intelligence This book examines how the partnership paradigm has transformed the ways in which participants gather analyze and use intelligence about security problems ranging from petty nuisances and violent crime to urban riots organized crime and terrorism It explores changes in the way police and other security professionals define and prioritize these concerns and how the expanding range of stakeholders and the growing repertoire of solutions has transformed both the expertise and the deliberative processes involved      *Virtual Ethnography* Christine Hine, 2000-06-22 Christine Hine rejects the postmodernist reading of the Internet as a site for playfulness and the end of authenticity She argues that the Internet is both a site for cultural formations and a cultural artefact      **Tiny Publics** Gary Alan Fine, 2012-03-01 If all politics is local then so is almost everything else argues sociologist Gary Alan Fine We organize our lives by relying on those closest to us family members friends work colleagues team mates and other intimates to create meaning and order In this thoughtful and wide ranging book Fine argues that the basic building blocks of society itself are forged within the boundaries of such small groups the tiny publics necessary for a robust functioning social order at all levels Action meaning authority inequality organization and institutions all have their roots in small groups Yet for the past twenty five years social scientists have tended to ignore the power of groups in favor of an emphasis on organizations societies or individuals Based on over thirty five years of Fine s own ethnographic research across an array of small groups *Tiny Publics* presents a compelling new theory of the pivotal role of small groups in organizing social life No social system can thrive without flourishing small groups They provide havens in an impersonal world where faceless organizations become humanized Taking examples from such diverse worlds as Little League baseball teams restaurant workers high school debate teams weather forecasters and political volunteers Fine demonstrates how each group has its own unique culture or idioculture the system of knowledge beliefs behavior and customs that define and hold a group together With their dense network of relationships groups serve as important sources of social and cultural capital for their members The apparently innocuous jokes rituals and nicknames prevalent within Little League baseball teams help establish how teams function internally and how they compete with other teams Small groups also provide a platform for their members to engage in broader social discourse and a supportive environment to begin effecting change in larger institutions In his studies of mushroom collectors and high school debate teams Fine demonstrates the importance of stories that group members tell each other about their successes and frustrations in fostering a strong sense of social cohesion And Fine shows how the personal commitment political volunteers bring to their efforts is reinforced by the close knit nature of their work which in turn has the power to change larger groups and institutions In this way the actions and debates begun in small groups can

eventually radiate outward to affect every level of society Fine convincingly demonstrates how small groups provide fertile ground for the seeds of civic engagement Outcomes often attributed to large scale social forces originate within such small scale domains Employing rich insights from both sociology and social psychology as well as vivid examples from a revealing array of real work groups *Tiny Publics* provides a compelling examination of the importance of small groups and of the rich vitality they bring to social life A Volume in the Russell Sage Foundation Series on Trust
