Meta-Learning in Computational Intelligence Norbert Jankowski,Włodzisław Duch,Krzysztof Grąbczewski,2011-06-10 Computational Intelligence CI community has developed hundreds of algorithms for intelligent data analysis but still many hard problems in computer vision signal processing or text and multimedia understanding problems that require deep learning techniques are open Modern data mining packages contain numerous modules for data acquisition pre processing feature selection and construction instance selection classification association and approximation methods optimization techniques pattern discovery clusterization visualization and post processing A large data mining package allows for billions of ways in which these modules can be combined No human expert can claim to explore and understand all possibilities in the knowledge discovery process This is where algorithms that learn how to learn come to rescue Operating in the space of all available data transformations and optimization techniques these algorithms use meta knowledge about learning processes automatically extracted from experience of solving diverse problems Inferences about transformations useful in

different contexts help to construct learning algorithms that can uncover various aspects of knowledge hidden in the data. Meta learning shifts the focus of the whole CI field from individual learning algorithms to the higher level of learning how to learn. This book defines and reveals new theoretical and practical trends in meta learning inspiring the readers to further research in this exciting field.

The Invertebrate World of Australia's Subtropical Rainforests Geoff Williams, 2020-09-01

The Invertebrate World of Australia's Subtropical Rainforests is a comprehensive review of Australia's Gondwanan rainforest invertebrate fauna covering its taxonomy, distribution, biogeography, fossil history, plant community and insect-plant relationships. This is the first work to document the invertebrate diversity of this biologically important region as well as explain the uniqueness and importance of the organisms. This book examines invertebrates within the context of the plant world that they are dependent on and offers an understanding of Australia's outstanding but still largely unknown subtropical rainforests. All major and many minor invertebrate taxa are described and the book includes a section of colour photos of distinctive species. There is also a strong emphasis on plant and habitat associations and fragmentation impacts as well as a focus on the regionally inclusive Gondwana Rainforests Central Eastern Rainforest Reserves of Australia World Heritage Area. The Invertebrate World of Australia's Subtropical Rainforests will be of value to professional biologists and ecologists as well as amateur entomologists and naturalists in Australia and abroad.

Complex Kleinian Groups Angel Cano, Juan Pablo Navarrete, José Seade, 2012-11-05

This monograph lays down the foundations of the theory of complex Kleinian groups, a newly born area of mathematics whose origin traces back to the work of Riemann, Poincaré, Picard and many others. Kleinian groups are classically discrete groups of conformal automorphisms of the Riemann sphere and these can be regarded too as being groups of holomorphic automorphisms of the complex projective line CP^1 . When going into higher dimensions there is a dichotomy. Should we look at

conformal automorphisms of the n sphere or should we look at holomorphic automorphisms of higher dimensional complex projective spaces These two theories are different in higher dimensions In the first case we are talking about groups of isometries of real hyperbolic spaces an area of mathematics with a long standing tradition In the second case we are talking about an area of mathematics that still is in its childhood and this is the focus of study in this monograph This brings together several important areas of mathematics as for instance classical Kleinian group actions complex hyperbolic geometry chrystallographic groups and the uniformization problem for complex manifolds
