Playing Politics with History Andrew Beattie, 2008 The ensuing debates and disagreements over the recent past examined by the author open up a window into the wider development of German memory identity and politics after the end of the Cold War **BOOK JACKET**

Playing Politics with Science David B. Resnik, 2009-01-20 In the last decade science in the United States has become increasingly politicized as government officials have been accused of manipulating distorting subverting and censoring science for ideological purposes Political gamesmanship has played a major role in many different areas of science including the debate over global climate change embryonic stem cell research government funding of research the FDA's approval process military intelligence related to Iraq research with human subjects and the teaching of evolution in public schools In *Playing Politics with Science* David B Resnik explores the philosophical political and ethical issues related to the politicalization of science and develops a conceptual framework for thinking about government restrictions on scientific practice Resnik argues that the public has a right and a duty to oversee scientific research to protect important social values and hold scientists accountable for their actions but that inappropriate government control over science can erode the integrity and trustworthiness of research hamper scientific creativity and innovation undermine the fairness and effectiveness of government and policies informed by science discourage talented researchers from working for the government and violate the freedom of scientists Resnik also makes policy recommendations for protecting science from politicalization and maintains that scientific autonomy and government control

must be properly balanced so that restrictions on science can benefit society without undermining scientific research education and expert advice

Playing Politics with Natural Disaster Timothy W. Kneeland, 2020-04-15 Hurricane Agnes struck the United States in June of 1972 just months before a pivotal election and at the dawn of the deindustrialization period across the Northeast The response by local state and national officials had long term consequences for all Americans President Richard Nixon used the tragedy for political gain by delivering a generous relief package to the key states of New York and Pennsylvania in a bid to win over voters After his landslide reelection in 1972 Nixon cut benefits for disaster victims and then passed legislation to push responsibility for disaster preparation and mitigation on to states and localities The impact led to the rise of emergency management and inspired the development of the Federal Emergency Management Agency FEMA With a particular focus on events in New York and Pennsylvania Timothy W Kneeland narrates how local state and federal authorities responded to the immediate crisis of Hurricane Agnes and managed the long term recovery The impact of Agnes was horrific as the storm left 122 people dead forced tens of thousands into homelessness and caused billions of dollars in damage from Florida to New York In its aftermath local officials and leaders directed disaster relief funds to rebuild their shattered cities and reshaped future disaster policies **Playing Politics with Natural Disaster** explains how the political decisions by local state and federal officials shaped state and national disaster policy and continues to influence emergency preparedness and response to this day
