Howard Saul Becker

Psychedelic Review No5 1965:

Introduction to the New Existentialism Colin Wilson, 2019-04-15 Colin Wilson revitalised existentialism with a completely new approach to the philosophy. The six volumes of his Outsider series created an existentialism that is not paralysed by its own nihilism. This book first published in 1966 is a clear summary of the ideas of the Outsider cycle and also develops them to a new stage. Wilson's new existentialism sees philosophy as an intellectual adventure that aims at a real command and control of human existence and this book is its clearest exponent. Institutions and the Person Howard Saul Becker, Blanche Geer, David Riesman, Robert S. Weiss, 2017-07-12 Everett C Hughes had a great impact on the field of sociology as a whole and on an entire generation of sociologists. Some of Hughes' former students and colleagues honor him in this book. The essays address the main themes in his work over the years and illustrate as well Hughes' impact on the contributors, many of whom are themselves senior figures in the field. The book as a whole provides a distinguished and representative sampling of a major stream of contemporary sociological thought. Each of the five main divisions in the book covers one aspect of Hughes' work. The first deals with the study of occupations and professions, a field in which Hughes was a leader. The second section deals with race relations and other situations in which peoples of differing cultures meet. Beginning with his own work in French Canada many years ago, Hughes' interests spread and the breadth of this interest is seen in chapters on India, Peru, and race relations in the United States. Problems of organizations, how they are put together and how they work, are contained in a third section. A fourth section reflects Hughes' interest in the impact of institutional experience on the people who participate in social institutions and includes chapters on occupational socialization, status passage, and the use of drugs. A final section develops still another of Hughes' interests: social science method. Presenting some of the most important topics of contemporary theory and research, this book remains profitable reading for every member of the discipline.

Sociological Work Howard Saul Becker, The papers in this volume, including two important and previously unpublished essays on sociological method, represent most of Howard Becker's work of the past twenty years that has not appeared in book form. They reflect the way of thinking about society and how to study it that has established Professor Becker's place among the leading sociologists of our time. The result is an important statement of the distinctive theoretical and methodological views associated with the Chicago School of sociology, reflecting a deep concern with the study at first hand of the processes and human consequences of collective action and interaction. The first part of the book treats problems of method as problems of social interaction and lists a series of research problems which require analytic attention: gaining access to research sites, choosing a theoretical framework within which to approach a group or community, avoiding error, and developing hypotheses. They also exemplify this approach by analyzing the interactional aspects of definition, proof with qualitative evidence, bias, and the value commitments of sociology. Part Two illustrates Professor Becker's approach through full reports on two of his major research projects. Part Three contains four theoretical statements on how

people change a sociological approach to what psychologists call personality and Part Four makes important contributions to the study of deviance The papers here ask what we can learn about American society from looking at its common forms of deviance and illustrate the need to study deviance as part of the general study of society not as an isolated specialty

Art as Adventure Rosemary O'Neill, James P. Werner, 2018-07-26 This volume represents a collection of six essays written by artists and art historians about journeys to places and methods of practice that challenge perceived taxonomies The artist as traveler has deep historical precedents as contemporary art production today and has historically followed political economic and cultural expansion The role of the artist as witness reporter geographer collector and educator exemplifies the significance of mobility geographic and cultural mediation in the productions of art and visual culture and the critical questions raised as a result The book encompasses a variety of perspectives on how artist travelers have embraced and contextualized the places people cultures and overall experiences encountered on their journeys Each chapter unveils different and unique approaches which artists have taken in reacting and creating as part of a journey in which they are often the outsiders to the culture and place Visual mappings conveying geo locative walking data recreations of indigenous ritual as installation participatory video installations uncovering community perspectives and a reflective diary about walking across lands affected by natural disaster are some of the ways these artists and historians examine the experiences the artists have encountered abroad Each piece is completely unique yet united in the act of journey and pursuit of alternative narrative born of the experience
