More Than Meets the Eye Hanna Zacks, 2011-04-12 In the book More than Meets the Eye A Journey into the Mysteries of Psychic Phenomena I invite the reader to join me in a fascinating trip to the field known as parapsychology Parapsychology or psi phenomena are psychic events which do not lend themselves to regular explanation based on evidence provided by the senses they are said to be extrasensory These phenomena are telepathy clairvoyance psychokinesis and precognition Our communication is based ordinarily on hearing or reading the others words but in telepathic communication we are said to know the others thoughts directly without the mediation of the senses In clairvoyance known also as remote viewing we are said to see remote places without using the eyes In psychokinesis we are said to be able to bend push or break objects without touching them and in precognition we have direct glimpses of the future Are telepathy clairvoyance and other kinds of psychic phenomena real or are they figments of an overly active imagination And what about phenomena such as out of body experiences apparitions of dead people and reincarnation Are such phenomena real On the basis of my own experience of the experiences of people I had interviewed and of information I had gleaned from books by credible authors I reach certain interesting conclusions which I share with the reader

The Origins of Psychic Phenomena Stan Gooch, 2007-02-07 Examines unexplained phenomena in psychiatric and psychological terms rather than occult terms Explores how the unconscious mind manifests paranormal phenomena Shows how the cerebellum the seat of the unconscious is the source of these energies subpersonalities and manifestations Identifies our neglected Neanderthal subconscious as responsible for the rising incidence of paranormal happenings Alien abduction poltergeist attacks incubi succubi split and multiple personalities possessions precognition spontaneous combustion the list of phenomena not just unexplained but ignored by mainstream science seems endless Yet the key to the origin of all these manifestations lies deep within our own brains In The Origins of Psychic Phenomena Stan Gooch explores the functioning of the dream producing part of the brain the cerebellum and how the unconscious mind is able to externalize itself The cerebellum is the physical seat of the unconscious and was once equal to or even superior to the cerebrum as essential to our functioning In modern times it has been shunted into the subliminal yet the cerebellum continues to process our worldly experiences and reveals its concerns in misunderstood often frightening manifestations Gooch explains that Neanderthal Man possessed a much larger cerebellum than Cro Magnon Man and posits that the modern repression of the cerebellum s role in our consciousness has given rise to these supernatural phenomena
