

ARTERIES & VEINS

Fact

- The main branches of the carotid arch are the brachiocephalic artery (which gives off the right subclavian and right common carotid arteries), the left common carotid artery, and the left subclavian artery.
- The subclavian artery extends over the first rib, where it becomes the axillary artery.
- The axillary artery passes the insertion of the long head of the biceps, where it is referred to as the brachial artery.
- The subclavian, axillary, and brachial arteries diverge into several branches.
- Branches of the subclavian artery are the vertebral, internal thoracic, thyrocervical trunk, circumflex humeri, and dorsal scapular arteries.
- Branches of the axillary artery are the superior thoracic, thoracoacromial, lateral thoracic, subscapular, anterior circumflex, and posterior circumflex arteries.
- Branches of the brachial artery are the deep brachial, superior ulnar collateral, inferior ulnar collateral, radial, and ulnar arteries.
- The axillary vein is formed by the brachial vein (where the main tributary is the basilic vein) and the cephalic vein.
- The right and left gastric arteries are located along the lesser curvature of the stomach.
- The right and left gastroepiploic arteries lie along the greater curvature of the stomach.
- The superficial palmar arch of the hand lies distal to the deep palmar arch, and is supplied primarily by the ulnar artery.
- The deep palmar arch is supplied primarily by the radial artery.

Memory Tip

- The right side has the brachiocephalic artery.
- The left side is left without one.

"Veins in The Vein Division"

- "Six Tubes lie Surrounding the Aorta"

- "Divisions Seen Investing the vein ulnarly"

- The veins of the arm are as seen at ABBAC (Axillary, Brachial, Basilic, Cephalic).

- The most gastric is deeper (or lower) than the second gastroepiploic.

- The most gastroepiploic is longer (or greater) than the second gastric.

- The palmar arches are roughly under two distinct creases in the skin of the hand (see diagram).

- The location of the corresponding crease (on the radial or ulnar side of the hand) indicates the vessel which primarily supplies that arch.

COMPARISON BETWEEN THE ARRANGEMENT OF THE UPPER & LOWER EXTREMITIES

- The arrangement of the arteries in the arms and legs are roughly similar.
- However, below the middle third of the femur, the arrangements in the leg are rotated later (i.e., the lower corresponds to the ulnar, the plantar surface of the foot corresponds to the palm).

Upper Extremity	Lower Extremity
Brachial artery	Femoral artery
Deep brachial artery (profunda)	Deep femoral artery (profunda)
Anterior/posterior humeral circumflex	Medial/lateral femoral circumflex
Brachial artery (an ulnar)	Popliteal artery
Arteries at the elbow	Circulator artery
Radial artery	Posterior tibial artery
Ulnar artery	Peroneal artery
Posterior tibiofibular artery	Anterior tibial artery
Dorsal carpal arch	Arteries at the foot
Superficial/deep palmar arches	Plantar arch

NERVES

Fact

- The cranial nerves include the Olfactory (I), Optic (II), Oculomotor (III), Trochlear (IV), Trigeminal (V), Abducens (VI), Facial (VII), Vestibulocochlear (VIII), Vagus (IX), Accessory (XI), and Hypoglossal (XII).
- The organization of the brachial plexus is Root, Trunk, Division, Cords, and Branches.
- The branches of the brachial plexus (VII, or motor nerve) are Radial, Axillary, Muscular, Median, and Circumflex.
- The third, fourth, and fifth cervical nerves join to form the phrenic nerve, which innervates the diaphragm.
- The branches of the median nerve are the Anterior interosseous, Phrenic cutaneous, Recurrent, and Common palmar digital.
- Complexes send impulses toward the cell body.
- Axons send impulses away from the cell body.
- The SI innervates all of the muscles of the eye except for the lateral rectus, which is innervated by the VI, and the Superior Oblique, which is innervated by the IV.

Memory Tip

- "On Old Olmstead Farming Egg, A Frenchman And German Housed A Hog"

- "Robert Taylor Drinks Coffee Black"

- Five words in two (the first words in "Two Below Be My Cut")

- "C3, 4, and 5 keep the diaphragm alive"

- "Mythology the branches of the median nerve"

- "Dendrites - toward, Axons - away"
