Reflections On Human Nature:

Reflections on Human Nature Arthur O. Lovejoy, 2020-02-03 He discusses the theory of human nature held by the founders of the American Constitution giving special attention to James Madison and the Federalist Papers **Reflections on Human Nature** Arthur Oncken Lovejoy, 2019 Originally published in 1961 Arthur O Lovejoy beginning with his book *The Great Chain of Being* helped usher in the discipline of the History of Ideas in America In *Reflections on Human Nature* Lovejoy devotes particular attention to influential figures such as Hobbes Locke Bishop Butler and Mandeville tracing developments and changes in the concept of human nature through the seventeenth and eighteenth centuries He also discusses the theory of human nature held by the founders of the American Constitution giving special attention to James Madison and the Federalist Papers *Reflections on the Human Condition* Eric Hoffer, 1973 This collection of aphorisms and philosophical comment represents Eric Hoffer at his best It offers stunning insights that strike home with startling frequency often most uncomfortably it has a fine unity a well defined theme That some of the statements invite argument and questioning is inevitable and stimulating Here is a book of the wry epigram and the icy aphorism which made his earlier books so appealing and gained for him a wide audience Publisher description The Art of Political Leadership Fred I. Greenstein, 2006 Fred Greenstein has been a paragon of scholarship and practical advice in his many years of work on the presidency Here some of the leading scholars of the presidency and leadership studies come together to pay tribute to Greenstein and his work Original essays reflect the broad sweep of Greenstein s scholarship from the systematic study of personality and politics to the analysis of chief executives from Woodrow Wilson on The essayists pay special attention to the political styles advisory systems and decision making processes of presidents from the 1920s to today In his studies of the American presidency Greenstein pioneered the use of archival documents to test hypotheses and illuminate issues that bear on the performance of the modern executive office The distinguished list of contributors to this volume include John Burke Robert A Dahl Alexander and Juliette George Betty Glad Alonzo Hamby Erwin Hargrove John Kessel Anthony King Kenneth Kitts J Donald Moon and Fred Greenstein s first and last graduate students at Princeton Larry Berman and Meena Bose Greenstein himself generously writes a new essay on Plumbing the Presidential Psyche adding to his substantial contributions to political psychology *Comparative Reflections on Persons and Selves* Pavel Stankov, Michael Dufresne, 2023-06-14 What matters in personal survival What makes self awareness possible If there is no permanent self should we be altruistic These and other questions were tackled by the international participants in the 2018 Uehiro Graduate Student Philosophy Conference at University of Hawai i at M noa Their responses explore the subject of subjecthood from interdisciplinary and comparative perspectives Some approach it from an analytic point of view others from a historical and as many as five draw from non Western traditions to argue their points We have selected seven of the 21 papers presented at the conference Given their comparative scope they provide a slightly unusual sample of the discussions in philosophy of self

and personhood today The collection would be of interest not only to graduate students and professional philosophers but also to anyone curious about the comparative methods used to investigate the self in philosophy **Human Nature**

Malcolm Jeeves,2006-04 Malcolm Jeeves former editor in chief of Neuropsychologia a leading international scientific journal in behavioral and cognitive neuroscience explores the intersection of science and faith in defining what it means to be human He reports on recent scientific research on consciousness and the link between mind brain and behavior He examines issues such as determinism by indicating the possible relevance of chaos theory to enduring concerns about freedom and responsibility He looks at similarities and differences between human nature and animal nature He reexamines traditional dualist views of soul and body in the light of contemporary research on mind and brain and argues for a wholistic model This leads to addressing questions such as does spiritual awareness depend on the intactness of our brains or does spirituality stand apart from our biological substrate Liberty, Property, and the Foundations of the American Constitution Ellen

Reflections on Communication, Education, Scholarship, and Life Xin-An Lu, 2003-07 Our actions in education business and government are no longer guided by conscious ideals but by entrenched practices that are products of expediency indolence and even tyranny Inveterate and ubiquitous problems abound Students hate school Employees dislike their jobs Professors become disinclined toward teaching Boredom and procrastination are everywhere There are promotion requirements such as scholarly publications by college professors that promote nothing and benefit none except to move the person into the next nominal category along the spectrum of the organizational ladder We are plagued with senseless competitive patterns and numerical evaluations that make life a mere matter of rat race the winning of which does not uplift us into the sublimity of humanity but trammel us in the degradation of being rats Essays in this book reflect on and search for answers to widespread and inveterate problems that degenerate modern life into mere livelihood Products in sober solitude rather than in the societal cacophony most essays in the book were written during the author's doctoral studies
